**Pushing the Limits** Casey Stoner, 2013-10-24 Casey Stoner, the two-time World MotoGP champion, tells his own explosive story. Showing anything is possible when determination meets talent, two-time World MotoGP champion Casey Stoner shares his incredible journey from being a Queensland toddler with an extraordinary ability on a motorbike to his decision to retire at 27 with nothing left to prove. For the first time, he tells of his early family life, the development of his riding skills and why his parents decided to sell everything and travel from Australia to Europe to chase the dream and support his aim to become World Champion when he was only 14 years old. As fearless with his opinions as he is on the racetrack, Casey includes all the highs and lows of his life so far: the real reason he left for Europe so young, his thoughts on racing as it stands today, the riders' hierarchy, the politics of racing, the importance of family, his battle with illness and why he decided to turn his back on a multimillion-dollar contract when he was still winning. And he also lets us in on some of the new goals he has set for himself.

The Grand Prix Motorcycle Kevin Cameron, 2009 by Kevin Cameron, foreword by Kenny Roberts This important book is an authoritative technical analysis of the Grand Prix motorcycle from the beginning of the FIM World Championship in 1949 to the end of the 2008 MotoGP season. Elegantly written by the foremost expert on the subject, the text is packed with factual detail and insightful perspective. This book is quite unlike anything previously published and will be essential reading for all knowledgeable enthusiasts of top-level motorcycle racing. mightily definitive a corking read

The Illustrated History of Moto GP Michael Scott, 2021-08-31 This illustrated history jam packed with more than 150 stunning photographs celebrates high performance motorbike racing since the start of the world championship in 1949. The daring exploits of motorcycle race legends Valentino Rossi, Barry Sheene, Casey Stoner and John Surtees are all gloriously celebrated in Moto GP: The Illustrated History. Each racing decade is dissected and discussed, as are the big incidents, top personalities and technological innovations. To complete the book, motorcycle racing's greatest names - including John Surtees, Giacomo Agostini, Kenny Roberts, Valentino Rossi, Casey Stoner and young phenom Marc Marquez - provide exclusive personal insights and accounts of what it is like to race at speeds of 180mph. Moto GP: The Illustrated History is a unique book which brilliantly conveys the exhilarating spirit of this popular sport.

Moto GP - a photographic celebration Phil Wain, 2018-11-06 'Moto GP is about the individual's story, the battles between the individuals, the different personalities, the different men that are striving for one goal, to win the world championship'. Freddie Spencer, three-time world champion Since its earliest beginnings on public road courses to today's purpose-built championship courses, Moto GP has always been about one thing: pushing man and machine to new heights of performance. Telling the story of how leading manufacturers such as Yamaha, Honda and Suzuki, have strived to build the perfect machine, and detailing the incredible rivalries of such sporting legends as Kenny Roberts and Barry Sheene, Freddie Spencer and Eddie Lawson, Valentino Rossi and Jorge Lorenzo - to name just a few - Phil Wain uncovers the stories behind historic races, the innovations that made the best bikes on the grid and describes the infamous moments in which riders were made champions. Moto GP is a photographic celebration of the heroes, bikes and circuits that have defined the adrenaline-soaked world of motorbike racing.

That Near Death Thing Rick Broadbent, 2012-05-17 The Isle of Man TT - the world's most dangerous race - as seen through the eyes of Cummins, Martin, McGuinness and Dunlop. THAT NEAR DEATH THING is a life-affirming journey to the heart of the world's most dangerous race. The Isle of Man TT is a throwback to a maverick era that existed before PR platitudes and PC attitudes. WILLIAM HILL SPORTS BOOK OF THE YEAR-shortlisted author Rick Broadbent gets inside the helmets of four leading motorcycle racers as they battle fear, fire and family tragedy for a gritty sort of glory. Guy Martin is a tea-drinking truck mechanic and TV eccentric who 'sucks the rabbits out of hedges', but must now deal with the flipside of fame; Conor Cummins is the local hero facing a race

against time as he battles depression and a broken body after falling down the mountain; John McGuinness is the living legend fending off the ravages of middle-age for one last hurrah; Michael Dunlop is the wild child living with one of the most remarkable legacies in sport. They tell their astonishing stories in a book that provides the most rounded, intimate, behind-the-scenes account yet of the last great race. Rick Broadbent has delivered the final word on the Isle of Man TT, one that really gets to grips with an event that continually pulls unsung riders and fans back year after year to witness That Near Death Thing.

**Peter Williams Designed To Race** Peter Williams, 2012-10-14 On his day, Peter Williams was the best motorcycle road racer in the world and is one of that small band of sportsmen, 'the best never to win a World Championship'. Peter's unique career in the 1960s and 1970s as racer, designer and development engineer culminated in many great victories on bikes from 125cc to 750cc. For two months in 1967 he lead the 500cc class of the World Championship on his single cylinder 500cc Mkl Arter Matchless Special against the much more powerful Honda and MV Augusta multis of Mike Hailwood and Giacomo Agostini. Just when he was, perhaps, due for a 'works' ride, the Japanese withdrew from Grand Prix road racing and Peter joined the re-emergent manufacturers of Norton. Peter had two consuming passions; riding his motorcycles at 10/10ths of the limit, and for Britain to regain motorcycle supremacy. Indeed, the latter was his mission, his crusade, and so he rode almost exclusively British motorcycles but, interestingly, won his only Grand Prix on a foreign one. Peter's engineering designs gave him advantage on the race track and set the trends for what motorcycles are today. He was one of the first to design and race with disc brakes, the first in the world to design and use cast magnesium wheels and tubeless tyres. Peter won the 1970 500cc class British Championship and was the first in motorcycle racing to benefit from tobacco sponsorship. The 1973 John Player Norton 'Monocoque' incorporated all his previous experiments and the first twin spar frame. The pinnacle of his career came on this machine when he won the Formula 750 TT in the Isle of Man with record race and lap speeds. Peter's racing career came to an end in 1974 with a terrible crash at Oulton Park but his engineering continued with work at Cosworth Engineering and Lotus Engineering. Motorcycle innovation continues, too, with his true monocoque design, his Shell Chassis, which, in its electric drive form, finished 5th in its very first outing in the 2010 TT Zero.

Engine Design Concepts for World Championship Grand Prix Motorcycles Alberto

Boretti, 2012-08-06 The World Championship Grand Prix (WCGP) is the premier championship event of motorcycle road racing. The WCGP was established in 1949 by the sport's governing body, the Fédération Internationale de Motocyclisme (FIM), and is the oldest world championship event in the motorsports arena. This book, developed especially for racing enthusiasts by motorsports engineering expert Dr. Alberto Boretti, provides a broad view of WCGP motorcycle racing and vehicles, but is primarily focused on the design of four-stroke engines for the MotoGP class. The book opens with general background on MotoGP governing bodies and a history of the event's classes since the competition began in 1949. It then presents some of the key engines that have been developed and used for the competition through the years. Technologies that are used in today's MotoGP engines are discussed. A sidebar discussion on calculating brake, indicated, and friction performance parameters provides mathematical information for readers who like such technical details. Future developments of MotoGP engines, including the use of biofuels and recovery of thermal and braking energy, are presented. The introduction concludes with a chart that details the winners of the various classes of WCGP motorcycle racing since the competition began in 1949. The bulk of the book consists of four previously published SAE technical papers that were expressly chosen by Dr. Boretti to provide greater insight to the relationships between engine parameters and performance, namely the influence on friction and mean effective pressure of traditional spark ignited four stroke engines tuned for a narrow high power output. The first paper provides the reader with a quick way to estimate the friction loss and engine output. The second

paper discusses output and fuel consumption of multi-valve motorcycle engines. The third paper, published in 2002, compares WCGP engines developed to comply with the then-new FIM regulations that allowed four-stroke engines in the competition. The fourth paper examines specific power densities and therefore the level of sophistication and costs of MotoGP 800 cm<sup>3</sup> engines. This paper shows the performance of these as well as the 1000cc SuperBike engines. The fifth paper presents four engine concepts including one for a MotoGP/Superbike with 2 and 3 cylinders. The sixth paper compares 3 and 4 in-line, V4, V5, and V6 layouts through 1-D engine simulations. The seventh paper considers the actual operation of 800cc MotoGP engines on the race track, where the percentage of the duration in fully open throttle is less than 20% of the race, but the partial throttle is used for as much as 80% of the race. The final paper in the compendium reports on the Honda oval piston engine concept.

**More than Cricket and Football** Joel Nathan Rosen, Maureen M. Smith, 2016-12-02 Given the presumed dominance of American sport, many fans throughout the hemisphere find it difficult to envision the role of sport beyond the confines of their own continent. And yet, world sport consists of so much more than the games Americans play and so much more than the stereotype of cricket for the elite and football for the working class. As worldwide sport continues to gain in popularity, we also see parallels to many aspects visible in North American sport, particularly celebrity and all its trappings and pitfalls. The success of athletes from other countries in basketball and ice hockey, and the proliferation of stars imported and now exported to and from North America, provides some better examples of sport's international power. It also creates a very new kind of sport celebrity, albeit one that often shows a rather limited reach beyond that star's own country or continent. Thus, rather than focusing on the Western Hemisphere, this collection of some of world sport's most heralded celebrities (including stars of Motocross, surfing, distance running, and more) serves as a sort of passport to many places that make up our global sporting environment.

Valentino Rossi Michael Scott, 2018-01-02 From the day he was born into a racing family on February 16, 1979, Rossi was destined for racing greatness. Rossi started his international racing career in 1996, riding for Aprilia in the 125cc class, and won his first World Championship the following year. Rossi's career would see him go on to win nine Grand Prix World Championships, score 87 wins in 500cc/MotoGP, and many more accolades. This visual biography covers this incredible racer's journey, his victories, rivalries, and transitions from brand to brand. See his incredible battles against the likes of Max Biaggi, Sete Gibernau, and Dani Pedrosa, and why they inspired three films (*Faster*, *Fastest*, *Hitting the Apex*). Get to know Rossi's incredible charm and wit, and why he has achieved rock-star status among racing fans.

**Valentino Rossi, Revised and Updated** Michael Scott, 2022-08-02 Valentino Rossi: Life of a Legend offers an intimate portrait of one of the most successful and iconic legends in the history of MotoGP.

**International interdisciplinary conference "Sketch a subculture"** Jerome Krase, Oleg Maltsev, Douglas Kellner, Steve Gennaro, Elizabeth Haas-Edersheim, Massimo Introvigne, Liudmyla Fylypovych, Frederick Lawrence, Matthew Worley, Lucien Oulahbib, Marco Andreacchio, Nick Ienatsch, Simon McGregor-Wood, Mikhail Minakov, Bernardo Attias, Gavin Watson, Derek Ridgers, Paul Hockenos, Athina Karatzogianni, Paul Rhoads, Ross Haenfler, Phil Cohen, Maxim Lepskiy, Iryna Lopatiuk, Avi Nardia, Sanjay Soekhoe, Marco Trovato, Federico Roso, Costantino Slobodyanyuk, Vitalii

Lunov, Igor Kaprysin, Vladimir Skvorets, Maria Kulyk, Aimar Ventsel, Eduard Boyko, Collected Papers of the International interdisciplinary conference "Sketch a subculture" Subcultures can be so tightly integrated into the contemporary person's daily life that they have become almost indispensable and ubiquitous. Family, job, agreements, responsibilities and negotiations are one thing, but, let us say, skydiving, or riding a bike in the company of motorcycle enthusiasts is a different thing—no less an important part of one's life. The current state of affairs is that almost everyone on this planet belongs to some subculture in one way or another. This another, natural part of one's lifestyle for pleasure is not always considered a subculture, but the heart of the matter does not change because of this. To the point, a person might be a part of more than one subculture, and at the same time know nothing about what it may lead to; they may know nothing about the possible scenarios, goals and intentions of this environment. Even the most attractive and mysteriously formulated idea (for example, attaining Nirvana) remains something inconceivable, for what is Nirvana, and how to understand that this state has been achieved is unknown. The idea has no explanations, no criteria and no parameters. And yet, this does not stop people from pursuing ideas as such. Many voluntarily strive for something they know practically nothing about. Why are subcultures so attractive? Why have they become magnets to researchers, professionals and business persons, among all others? These and many other questions require innovative approaches and an unbiased dialogue in an understandable scientific language. The International interdisciplinary conference "Sketch a subculture" united leading experts, scientists, researchers, practitioners, journalists, photographers and thinkers for this discussion on 6 different online panels, where the following questions were discussed: 1. Problems of choosing a research path in studying a subculture. 2. Plan of researching a subculture: from the idea to the completion of the research, from mythological and religious to scientific and philosophical worldviews. 3. From mythologemes to ideas as foundational elements of subculture formation. Approaches for researching mythologemes that underlie the philosophy of a subculture. 4. Approaches for studying the hierarchy of subcultures. Can we claim that the hierarchical structure of all subcultures is identical? 5. Ways to explore the attributes and symbols of subcultures. 6. The phenomenon of "Subculture in Subculture" and characteristics of its study. The synthesis of ideas in the subculture, reasons for the existence of subcultures, invisible internal mechanisms that maintain their continuance. 7. Frederick Lawrence's drawing as the purpose of subculture research. 8. Can we consider a subculture as a machine that shapes a personality? The idea of death and different ways of implementing this idea by subcultures in daily life. 9. Frederick Lawrence's drawing, the theory of subculture formation, application of prototype method to understand phenomena. 10. Is it true that one idea forms a whole subculture? The pathway in subculture: fatal and successful. 11. The difference between subculture and religion. What are specific elements that shape each institution? 12. Use of religion by other social institutions (business, politics, etc.) for their own purposes. Religion transformation: from divine transcendence to the universal society based on techno-ideological principles.

**Mobilising Design** Justin Spinney, Suzanne Reimer, Philip Pinch, 2017-02-24 This book brings together research working at the boundary between design knowledges and mobilities, offering a novel collection for both theorists and practitioners. Drawing upon detailed case studies, it demonstrates the diverse roles of design in shaping mobility at different spaces and scales: across cities; within different types of buildings and infrastructures; and through commuting, work and leisure activities. A range of international scholars illustrate the designed mobilities of car parks, traffic lights, street benches, pedestrian wayfinding systems and accessible design in the urban environment; they examine spaces within hospitals, airports and train stations and investigate design practices for bicycles, future urban vehicles and MotoGP motorcycle racing. Other contributions explore overlooked mobile artefacts such as television and video game remote controls, 3D printing and the types of packaging which enable objects themselves to move around. This book demonstrates how the tools, assumptions and processes of design shape spaces of mobility, and also illuminates how shifts in the fluidity and circulation of people, practices and materials in turn reconfigure practices of design. Mobilising Design develops multi-disciplinary

understandings of design, drawing upon diverse literatures including design history, product design, architecture and cultural geography. By highlighting often invisible artefacts and associated knowledges and controversies, the book foregrounds the taken-for-granted ways in which everyday mobility is designed. It will be of interest to scholars in geography, sociology, economic history, architecture, design and urban theory.

**100 Years of the Isle of Man TT** David Wright,2013-11-30 Run over the everyday roads of the Isle of Man for over 100 years, the world-famous Tourist Trophy races have gripped the imaginations of successive generations of motorcyclists. From the earliest days of single-speed, belt-driven machines delivering 5 bhp, to the highly developed projectiles of today offering a fearsome 200 bhp, race fans have thronged the roadside banks and watched in awe as the best racing motorcyclists in the world rode the fastest machines of their day around the twists, turns and climbs of the 374 mile Mountain Course, all in pursuit of a coveted Tourist Trophy. This new updated edition covering the 2007 - 2012 races, reveals the event's colourful history through the high-speed activities of great riders such as the Collier brothers, Geoff Duke, Mike Hailwood, Giacomo Agostini, Steve Hislop, Joey Dunlop, John McGuinness and many others. It also looks at the machines and mechanical developments and race organisation, plus the financial rewards and commercial interests; setting them all in the context of the triumphs and tragedies of a great sporting event that has seen average lap speeds rise from 40 mph to over 130 mph. Written in an easy style, this book reveals the Manx TT's colourful history through its great riders, machines, mechanical developments and race organisation and is superbly illustrated with over 250 colour photographs.

Electric Motorcycles and Bicycles Kevin Desmond,2018-12-31 Beginning in 1881, isolated prototypes of electric tricycles and bicycles were patented and sometimes tested. Limited editions followed in the 1940s, but it was not until the lithium-ion battery became available in the first decade of this century that urban pedelecs and more powerful open-road motorcycles—sometimes with speeds of over 200 mph—became possible and increasingly popular. Today's ever-growing fleets of one-wheel, two-wheel and three-wheel light electric vehicles can now be counted in the hundreds of millions. In this third installment of his electric transport history series, the author covers the lives of the innovative engineers who have developed these e-wheelers.
