Priests of Our Democracy Marjorie Heins,2013-02-04 In the early 1950s, New York City's teachers and professors became the targets of massive investigations into their political beliefs and associations. Those who refused to cooperate in the questioning were fired. Some had undoubtedly been communists, and the Communist Party-USA certainly made its share of mistakes, but there was never evidence that the accused teachers had abused their trust. Some were among the most brilliant, popular, and dedicated educators in the city. Priests of Our Democracy tells of the teachers and professors who resisted the witch hunt, those who collaborated, and those whose battles led to landmark Supreme Court decisions. It traces the political fortunes of academic freedom beginning in the late 19th century, both on campus and in the courts. Combining political and legal history with wrenching personal stories, the book details how the anti-communist excesses of the 1950s inspired the Supreme Court to recognize the vital role of teachers and professors in American democracy. The crushing of dissent in the 1950s impoverished political discourse in ways that are still being felt, and First Amendment academic freedom, a product of that period, is in peril today. In compelling terms, this book shows why the issue should matter to every American.

Governmental Tracking of Cell Phones and Vehicles Richard M. Thompson, 2011 Law enforcement's use of cell phones and GPS devices to track an individual's movements brings into sharp relief the challenge of reconciling technology, privacy, and law. Beyond the Constitution, a miscellany of statutes and cases may apply to these tracking activities. The primary debate surrounding cell phone and GPS tracking is not whether they are permitted by statute but rather what legal standard should apply: probable cause, reasonable suspicion, or something less. This report will briefly survey Fourth Amendment law as it pertains to the government's tracking programs. It will then summarize federal electronic surveillance statutes and the case law surrounding cell phone location tracking. Next, the report will describe the GPS-vehicle tracking cases and review the pending Supreme Court GPS tracking case, *United States v. Jones*. Finally, the report will summarize the geolocation and electronic surveillance legislation introduced in the 112th Congress.
