Engineering, Industrial and System Engineering, and Electrical Engineering.

Intelligent Human Systems Integration 2019 Waldemar Karwowski, Tareq Ahram, 2019-01-05 This book presents cutting-edge research on innovative human systems integration and human-machine interaction, with an emphasis on artificial intelligence and automation, as well as computational modeling and simulation. It covers a wide range of applications in the area of design, construction and operation of products, systems and services, including lifecycle development and human-technology interaction. The book describes advanced methodologies and tools for evaluating and improving interface usability, new models, and case studies and best practices in virtual, augmented and mixed reality systems, with a special focus on dynamic environments. It also discusses various factors concerning the human user, hardware, and artificial intelligence software. Based on the proceedings of the 2nd International Conference on Intelligent Human Systems Integration (IHSI 2019), held on February 7–10, 2019, in San Diego, California, USA, the book also examines the forces that are currently shaping the nature of computing and cognitive systems, such as the need to reduce hardware costs; the importance of infusing intelligence and automation; the trend toward hardware miniaturization and power reduction; the need for a better assimilation of computation in the environment; and social concerns regarding access to computers and systems for people with special needs. It offers a timely survey and a practice-oriented reference guide for policy- and decision-makers, human factors engineers, systems developers and users alike.

The Routledge Handbook of Global Perspectives on Homelessness, Law & Policy Chris Bevan, 2024-06-06 This handbook provides a

comprehensive global survey and assessment of the law and policy relating to homelessness prevention. Homelessness is regarded internationally as one of the most pressing issues facing humanity and one of the greatest social challenges of our times. This has been further amplified as a result of the Covid-19 pandemic. Across the globe, there is an enormous divergence in both experiences of and responses to homelessness from governments and state actors. This handbook examines how different jurisdictions from across all five continents of the world have encountered, framed and responded to homelessness. Written by expert scholars and leaders in their field, the book engages in a multidisciplinary and comparative analysis of homelessness as an issue of acute social concern. Understandings of homelessness are geographically, culturally and historically situated, making analysis of each jurisdiction's approach by a national expert deeply insightful. The collection examines legal and extra-legal policy interventions targeted at reducing or preventing homelessness from across the globe. Drawing on diverse perspectives, differing cultures and welfare regimes, it thus constitutes a timely evaluation of current approaches to homelessness internationally. This book will appeal to students and scholars of homelessness, sociology, social policy, anthropology, and urban sociology, as well as international and national policymakers.
