GPS Exercises/Reminders Michael Manor McMillen ,2016-10-30 GPS/REMINDERS is a secular, ethics-based, language-arts-applied, behavior management tool, for AIAs (Adult-In-Authority) for any type of educational setting. GPS stands for Guided Protocol Scaffolding. The exercises are “guided” because they’re assigned, by an AIA. The term, “protocol,” refers to more appropriate behavior options, for a particular setting, activity, or interaction. “Scaffolding,” represents the entire, interactive, GPS support structure, which benefits students and AIAs alike. These GPS exercises (also known as REMINDERS) draw upon widely recognized, ethical behaviors, codes of conduct, social mores, and good, common-sense judgments, to assist young people, to demonstrate ethical behaviors, in word and deed.

Smart Technology for Aging, Disability, and Independence William C. Mann,2005-07-22 Independent living with smart technologies Smart Technology for Aging, Disability, and Independence: The State of the Science brings together current research and technological developments from engineering, computer science, and the rehabilitation sciences, detailing how its applications can promote continuing independence for older persons and those with disabilities. Leading experts from multiple disciplines worldwide have contributed to this volume, making it the definitive resource. The text begins with a thorough introduction that presents important concepts, defines key terms, and identifies demographic trends at work. Using detailed product descriptions, photographs and illustrations, and case studies, subsequent chapters discuss cutting-edge technologies, including: * Wearable systems * Human-computer interactions * Assisted vision and hearing * Smart wheelchairs * Handheld devices and smart phones * Visual sensors * Home automation * Assistive robotics * In-room monitoring systems * Telehealth After considering specific high-technology solutions, the text examines recent trends in other critical areas, such as basic assistive technologies, driving, transportation and community mobility, home modifications and design, and changing standards of elder care. Students and professionals in the rehabilitation sciences, health care providers, researchers in computer science and engineering, and non-expert readers will all appreciate this text's thorough coverage and clear presentation of the state of the science.

Advances in Multimedia Modeling Kuo-Tien Lee,Wen-Hsiang Tsai,Hong-Yuan Mark Liao,Tsuan Chen,Jun-Wei Hsieh,Chien-Cheng Tseng,2011-01-10 This two-volume proceedings constitutes the refereed papers of the 17th International Multimedia Modeling Conference, MMM 2011, held in Taipei, Taiwan, in January 2011. The 51 revised regular papers, 25 special session papers, 21 poster session papers, and 3 demo session papers, were carefully reviewed and selected from 450 submissions. The papers are organized in topical sections on audio, image video processing, coding and compression; media content browsing and retrieval; multi-camera, multi-view, and 3D systems; multimedia indexing and mining; multimedia content analysis; multimedia signal processing and communications; and multimedia applications. The special session papers deal with content analysis for human-centered multimedia applications; large scale rich media data management; multimedia understanding for consumer electronics; image object recognition and compression; and interactive image and video search.

Pinpoint: How GPS is Changing Technology, Culture, and Our Minds Greg Milner,2016-05-03 One of the most mesmerizing and exhilarating, yet alarming modern technology books...an extraordinary tale. —Gillian Tett, Financial Times Pinpoint tells the fascinating story of a hidden system that touches nearly every aspect of modern life. Tracking the development of GPS from its origins as a bomb guidance system to its present ubiquity, Greg Milner examines the technology’s double-edged effect on the way we live, work, and travel. Savvy and original, this sweeping scientific history offers startling insight into how humans understand their place in the world.

Tracking People Anthea Hucklesby,Raymond Holt,2023-08-30 Tracking technologies are now ubiquitous and are part of many people’s everyday lives. Large sections of the population voluntarily use devices and apps to track fitness, medical conditions, sleep, vital signs or their own or others’

whereabouts. Governments, health services, immigration and criminal justice agencies increasingly rely upon tracking technologies to monitor individuals' whereabouts, behaviour, medical conditions and interventions. Despite the human rights concerns of some organisations and individuals, most wearers and their significant others tend to welcome the technologies. This paradox is only one of the many fascinating challenges raised by the widespread use of tracking technologies which are explored in this book. This book critically explores the ethical, legal, social, and technical issues arising from the current and future use of tracking technologies. It provides a unique and wide-ranging discussion, via a cross-disciplinary collection of essays, on issues relating to technological devices and apps whose use is imposed upon wearers or suggested by others, whether agencies or individuals, including in the domains of criminal justice, terrorism, and health and social care. Contributions from leading academics from across social sciences, engineering, computer and data science, philosophy, and health and social care address the diverse uses of tracking technologies including with individuals with dementia, defendants and offenders, individuals with mental health conditions and drug users alongside legal, ethical and normative questions about the appropriate use of these technologies. Cross-disciplinary themes emerge focusing on both the benefits of the technologies – freedom, improved safety, security, well-being and autonomy, and increased capacity of and efficiencies for public services – and the challenges – implementation and operational costs, mission creep, privacy concerns, stigmatisation, whether the technologies work as expected, and useability and wearability for all wearers. This book is essential reading for academics and students engaged in criminology, criminal justice, socio-legal studies, science and technology studies, medicine, health and social care, psychology, engineering, computer and data science, philosophy, social policy and social work and security studies. It will also be of great interest to policy-makers, regulators, practitioners already deploying or considering using tracking technologies, and to current and potential wearers.

Neuropsychology Sandra Koffler,E. Mark Mahone,Bernice A. Marcopulos,Douglas E Johnson-Greene,Glenn Smith,2018-12-17 Compiled reviews of the recent literature are a long established tradition in the laboratory and clinical sciences, and bring to their professions a useful and timely summary of the advances that have been made in the field. Neuropsychology has matured as a science and profession to support a like effort to summarize, across domains, the direction and momentum in the field. The authors are authorities in the subjects they review and provide for the investigator, practitioner and student an overview of the important developments in neuropsychology that cannot be realized from perusal of the journals alone. Interest in the reviews are likely to go beyond the discipline of neuropsychology, and will extend to all with an interest in science of brain-behavior relationships, in the study of disease and injury as they affect brain function, and in the rehabilitation of the individual who has suffered insult to brain. Chapters cover the pragmatic application of tests and test findings to improve our understanding of the behavior of individuals who present with neurocognitive disorders. Where there is interest in efficiently acquiring a sound perspective of the important advances and the future direction of neuropsychology, Neuropsychology: A Review of Science and Practice will provide the means for so doing as no other publication can offer.
