La progettazione di itinerari e tracciati gps Riccardo Novello,2020-10-31 La progettazione di itinerari e tracciati gps unisce una grande passione per la mountain bike e la natura a tutta la tecnologia che abbiamo a disposizione oggi: non solo dritte e informazioni dettagliate su tutti gli strumenti utili a creare il proprio percorso – dal GPS ai social network, dalle mappe cartacee ai forum – ma anche consigli e approfondimenti sulle migliori zone d’Italia per gli amanti della mountain bike, per trasformare un hobby in un vero e proprio viaggio e vivere un’esperienza unica. Riccardo Novello, nato a Venezia nel 1975, passa il tempo con la compagna, e con Tigre (il gatto), in una baita nella Valle del Vanoi, tra passeggiate ed escursioni in bicicletta. Appassionato di montagna ed istruttore di mountain bike, visto dagli amici come un esploratore dalle tante (a volte troppe) idee, pubblica e scrive su gruppi e forum, e desidera trasmettere questa passione ad altri sportivi e mountain biker.

Das Web-Adressbuch für Deutschland 2017 - E-Book-Ausgabe Mathias Weber,2016-10-06 Schluss mit der nervigen Suche nach guten Web-Seiten im Internet: Das Web-Adressbuch für Deutschland präsentiert die 5.000 besten und wichtigsten Internet-Adressen auf einen Blick! Anfänger und Experten können hier so manchen Geheimtipp entdecken, der bei den Suchmaschinen im Netz kaum zu finden ist.

Das Web-Adressbuch für Deutschland 2018 - E-Book-Ausgabe Mathias Weber (Hrsg.),2017-09-28 Für die vorliegende aktualisierte 21. Auflage unseres Internet-Bestsellers hat die Redaktion die besten Perlen aus den Tiefen des Internets herausgefischt, darunter auch viele neue Surftipps, die bei den Suchmaschinen im Netz nur sehr schwer zu finden sind. Im Gegensatz zu den Suchdiensten im Internet werden unsere Web-Tipps von der Redaktion aufwendig recherchiert und getestet. Sie sind nicht das Ergebnis von automatisiert zusammengestellten Listen, wie z. B. bei Google. Im diesjährigen Special zum Bereich „Haus & Garten“ präsentiert die Redaktion „Die besten Web-Seiten rund ums Wohnen“ Darunter befinden sich viele inspirierende Seiten zum Einrichten und Umgestalten der „eigenen vier Wände“. Im Interview verrät die amtierende „Miss Do-it-yourself“, sozusagen die Miss Germany fürs Heimwerken, worauf es beim Renovieren ankommt, und gibt hilfreiche Tipps für die Praxis.

Technical topics discussed in the book include: Data Center NetworksMobile Ad Hoc NetworksMultimedia NetworksInternet of ThingsWireless SpectrumNetwork Optimization.This book is ideal for personnel in computer communication and networking industries as well as academic staff and collegial, master, Ph.D. students in computer science, computer engineering, electrical engineering and telecommunication systems.

Learning and Teaching with Geomedia Inga Gryl,Thomas Jekel,Eric Sanchez,2014-10-16 Learning and Teaching with Geomedia provides a theoretical and practical introduction to a field explicitly aimed at secondary education. The first section consists of three scientific papers introducing the dimensions of the emerging geoinformation society. The second section of the book is specifically dedicated to teacher trainers and

teachers. The introductory section provides an overview of the development of geomedial and envisions a roadmap of technological development ahead; a discussion of everyday geomedial applications and geomedial use; and, finally, pedagogical approaches using geomedial in secondary education. This section provides a broad foundation that does not argue in favor of a technological paradigm, but suggests that geomedial use in secondary education should be oriented at everyday life applications. The main section is devoted to exemplary learning environments that are ready to use, and easily transferable to local schools. While geoinformation technology is the basis of these learning environments, care has been taken to clearly identify conceptual approaches to these learning environments, and, therefore, make them less reliant on technology locally available. Many of these are easily applied without any further software or hardware other than a web browser and a mobile phone. The pedagogical background of these learning environments leads from science education and spatial thinking to learning environments that support an education for spatial citizenship, reflected geomedial use and communication with maps to successfully participate in society. The book is aimed at academics in the fields of pedagogy, geography and citizenship education, as well as those working in science education. The professional audiences addressed are teacher trainers at university departments, teachers in secondary schools and students in teacher training.

Mapping Migration, Identity, and Space Tabea Linhard,Timothy H. Parsons,2018-07-14 This interdisciplinary collection of essays focuses on the ways in which movements of people across natural, political, and cultural boundaries shape identities that are inexorably linked to the geographical space that individuals on the move cross, inhabit, and leave behind. As conflicts over identities and space continue to erupt on a regular basis, this book reads the relationship between migration, identity, and space from a fresh and innovative perspective.

Tracking Tourists Anne Hardy,2020-10-30 The first text to address tourist movement in from a methodological angle in the post-digital era. It assesses how movement and migration has been recorded in the past, how it may be recorded and assessed now and the possibilities for exploring movement in the future.

Advanced Microsystems for Automotive Applications 2010 Gereon Meyer,Jürgen Valldorf,2011-02-11 The automobile of the future has to meet two primary requirements: the super-efficient use of energy and power and the ultra-safe transportation of people and goods. Both features are increasingly enabled by smart, adaptive and context aware information and communication technologies (ICT), electrical or electronic components and systems rather than solely by the mechanical means of classic automotive engineering. The most advanced example of this trend is the electrified vehicle combining a full electric powertrain with completely electronic controls like smart power and energy managers, step-by-wire technologies and intelligent networking capabilities allowing all providers and consumers of energy to work in efficient synergy. In the course of this year the first series production electric vehicles will finally come into the market. Automakers – unsure if electric vehicles would really sell – have long time been hesitant to make the necessary changes of their product portfolios. In the coincidence of economic crisis and growing concerns about global warming and energy security companies and public authorities jointly succeeded to overcome many obstacles on the path towards electrification.

Volunteered Geographic Information Dirk Burghardt,Elena Demidova,Daniel A. Keim,2023-12-08 This open access book includes methods for retrieval, semantic representation, and analysis of Volunteered Geographic Information (VGI), geovisualization and user interactions related to VGI, and discusses selected topics in active participation, social context, and privacy awareness. It presents the results of the DFG-funded priority program VGI: Interpretation, Visualization, and Social Computing (2016-2023). The book includes three parts representing the principal research pillars within the program. Part I Representation and Analysis of VGI discusses recent approaches to enhance the representation and analysis of VGI. It includes semantic representation of VGI data in knowledge graphs; machine-learning approaches to VGI mining, completion, and enrichment as well as to the improvement of data quality and fitness for purpose. Part II Geovisualization and User Interactions related to VGI book explores geovisualizations and user interactions supporting the analysis and presentation of VGI data. When designing these visualizations and user interactions, the specific properties of VGI data, the knowledge and abilities of different target users, and technical viability of solutions need to be considered. Part III Active Participation, Social Context and Privacy Awareness of the book addresses the human impact associated with VGI. It includes chapters on the use of wearable sensors worn by volunteers to record their exposure to environmental stressors on their daily journeys, on the collective behavior of people using location-based social media and movement data from football matches, and on the motivation of volunteers who provide important support in information gathering, filtering and analysis of social media in disaster situations. The book is of interest to researchers and advanced professionals in geoinformation, cartography, visual analytics, data science and machine learning.
