Examines the construction and leveraging of mobile sites Describes how to use mobile apps to gather key data about consumers' behavior and preferences Discusses mobile mobs, which can be differentiated as distinct marketplaces—including Apple®, Google®, Facebook®, Amazon®, and Twitter® Provides detailed coverage of mobile analytics via clustering, text, and classification AI software and techniques Mobile devices serve as detailed diaries of a person, continuously and intimately broadcasting where, how, when, and what products, services, and content your consumers desire. The future is mobile—data mining starts and stops in consumers' pockets. Describing how to analyze Wi-Fi and GPS data from websites and apps, the book explains how to model mined data through the use of artificial intelligence software. It also discusses the monetization of mobile devices' desires and preferences that can lead to the triangulated marketing of content, products, or services to billions of consumers—in a relevant, anonymous, and personal manner.

Back Home Paulo Sergio Santos Negrete | Teacher John Chapman, 2012-02-13 The present English textbook is in accordance with the theoretical development of Suggestopedia teaching and its newest development, Desuggestopedia. The book reflects the theory of Suggestopedia in its integrity: The global and artistic approaches. Suggestopedia is the only method approved and recommended by UNESCO as being a superior method to any other. It accelerates the learning process several times without stress or fatigue. The Suggestopedic teaching through this book can also produce a variety of positive by-products, such as psychoprophylactic and psychotherapeutic effects. During the Suggestopedic teaching, there is simultaneous activation of the left and right hemispheres of the brain, although in different degrees. Students feel and report pleasant learning while they develop creative memory through logical-emotional and conscious-paraconscious activities in class. The author of the textbook, Prof. Paulo Negrete, aka Teacher John Chapman, has

been trained and certified by Dr. Lozanov, the creator of Suggestopedia and the science of Suggestology, and has worked in the field of English teaching through Suggestopedia for many years. He was the pioneer to introduce Suggestopedia in Brazil, in 2000, is the author of books to train teachers in TEFL/TESOL in Suggestopedia, and is the Academic Director of Idiomas Aprendizagem Acelerada in Brazil.

Graffiti Alix Wood, 2014-12-15 The most well-known graffiti artist today is Banksy. No one knows who he really is, but his graffiti has appeared in many cities around the world. Sometimes, his work is protected. Other times, city officials mark him as a vandal. Readers are asked to make their own decision about Banksy and other graffiti artists. Both sides of the controversy are introduced for readers to contemplate. Full-color examples of graffiti—both intentionally artistic and simple tagging—give readers a chance to see that art to some people isn't art to everyone.
