**Mathematics and Multi-Ethnic Students** Yvelyne Germain-McCarthy, 2017-05-25 *Mathematics and Multi-Ethnic Students* provides detailed profiles of teachers across the nation who have implemented effective mathematics instruction for diverse student populations. In this revised edition, Yvelyne Germain-McCarthy expands upon the popular case studies and adds two new chapters to highlight the latest educational research and practices that are reflected in the case studies. A third new chapter introduces the concept of the Life-Long Learning Laboratory where courageous questions on issues such as the impact of race on student learning are discussed. Featuring useful framing tools including the Discussion with Colleagues and Commentary sections, *Mathematics and Multi-Ethnic Students* translates concrete instances of access and equity into generalized problem-solving methods for promoting ethnic diversity across grade levels. An important resource for pre-service and in-service educators, researchers, administrators, and policy makers, this volume highlights the work of teachers who have gone beyond mere awareness of reform recommendations in mathematics instruction. By uniting the goals of multicultural education with those of the mathematics curriculum, educators will learn to conceptualize and implement best practices for effective, equitable teaching and learning of mathematics for their students.

**Aplicaciones TIC para Matemáticas de 3º de la ESO SANTIAGO ESTEBAN BOLÓS,2021-09-25** El presente proyecto pretende fomentar el uso de aplicaciones de móvil (apps) en la enseñanza de las matemáticas en educación secundaria. La finalidad de introducir apps es para mejorar la motivación, el rendimiento del aprendizaje del alumnado y favorecer la transición de un modelo didáctico tradicional hacia uno más motivador y participativo. Además, contribuye al logro de la competencia digital en las aulas. En este proyecto se ha diseñado una metodología propia para seleccionar las apps idóneas para uso docente en el ámbito propuesto. La metodología se ha basado en una selección de páginas webs especializadas en el ámbito de la docencia o en el de las tecnologías de la información y la comunicación (TIC), en las áreas geográficas de España y USA. Las apps seleccionadas se han integrado en una programación anual y dentro de la misma se ha indicado cuándo, cómo y dónde utilizarlas, con una breve descripción y unas recomendaciones de uso para el docente. Por último, para poder verificar el grado de éxito de la introducción de estas herramientas en el aula se han propuesto unos instrumentos de evaluación basados en cuestionarios y rúbricas.
