A Transformation Gap? Theo Farrell,Terriff Terry,Osinga Frans,2010-04-07

NATO member states are all undergoing some form of military transformation. Despite a shared vision, transformation has been primarily a US-led process centered on the exploitation of new information technologies in combination with new concepts for networked organizations and effects-based operations. Simply put, European states have been unable to match the level of US investment in new military technologies, leading to the identification of a growing transformation gap between the US and the European allies. This book assesses the extent and trajectory of military transformation across a range of European NATO member states, setting their transformation progress against that of the US, and examining the complex mix of factors driving military transformation in each country. It reveals not only the nature and extent of the transatlantic gap, but also identifies an enormous variation in the extent and pace of transformation among the European allies, suggesting both technological and operational gaps within Europe.

The Oxford Handbook of the Bible in Early Modern England, C. 1530-1700

Kevin Killeen,Helen Smith,Rachel Willie,Rachel Judith Willie,2015 The Bible was, by any measure, the most important book in early modern England. It preoccupied the scholarship of the era, and suffused the idioms of literature and speech. Political ideas rode on its interpretation and deployed its terms. It was intricately related to the project of natural philosophy. And it was central to daily life at all levels of society from parliamentarian to preacher, from the 'boy that driveth the plough', famously invoked by

Tyndale, to women across the social scale. It circulated in texts ranging from elaborate folios to cheap catechisms; it was mediated in numerous forms, as pictures, songs, and embroideries, and as proverbs, commonplaces, and quotations. Bringing together leading scholars from a range of fields, *The Oxford Handbook of the Bible in Early Modern England, 1530-1700* explores how the scriptures served as a generative motor for ideas, and a resource for creative and political thought, as well as for domestic and devotional life. Sections tackle the knotty issues of translation, the rich range of early modern biblical scholarship, Bible dissemination and circulation, the changing political uses of the Bible, literary appropriations and responses, and the reception of the text across a range of contexts and media. Where existing scholarship focuses, typically, on Tyndale and the King James Bible of 1611, *The Oxford Handbook of the Bible in England, 1530-1700* goes further, tracing the vibrant and shifting landscape of biblical culture in the two centuries following the Reformation.

Reformation Hermeneutics and Literary Language in Early Modern England

Jamie H. Ferguson, 2022-03-28 The expressive and literary capacities of post-Reformation English were largely shaped in response to the Bible. Faith in the Language examines the convergence of biblical interpretation and English literature, from William Tyndale to John Donne, and argues that the groundwork for a newly authoritative literary tradition in early modern England is laid in the discourse of biblical hermeneutics. The period 1525-1611 witnessed a proliferation of English biblical versions, provoking a century-long debate about how and whether the Bible should be rendered in English. These public, indeed institutional accounts of biblical English changed the language: questions about the relation between Scripture and

exegetical tradition that shaped post-Reformation hermeneutics bore strange fruit in secular literature that defined itself through varying forms of autonomy vis-a-vis prior tradition.

Military Implications of the Treaty on the Limitation of Strategic Offensive Arms and Protocol Thereto (SALT II Treaty) United States. Congress. Senate. Committee on Armed Services, 1979

We Refuse to Be Silent Angela P. Dodson, 2024 A powerful and needed collection of essays by accomplished women writers on violence and injustice toward Black men. The catalyst for a national conversation, this book shines a new light on the dangers Black men face daily, and the emotional toll anti-Black violence takes on the women who love them, casting a vision for future activism.

Congressional Record United States. Congress, 1971

Not by War Alone Paul Jabber, 2023-11-10 The Middle East remains the most politically volatile and militarily unstable region in the world. It is also in relative terms the most heavily armed; and the influx of American, Soviet, French and other weaponry continues unabated. Moreover, the Arab-Israeli conflict invites competition in nuclear armaments. Accordingly a concern of public policy must be the promotion of strategic stability between potential adversaries and the imposition of effective restraints on the several interrelated arms races in the region. In the absence of negotiated solutions

to existing disputes, or as a feature of future peace accords, arms-control measures could be of crucial importance in preventing the outbreak of war. Jabber explores the prospects for arms control in the specific contexts of the Arab-Israeli dispute and of military developments since the war of October 1973. Seeing lessons from history, and drawing on previously untapped materials, he includes a case-study of an actual Middle East arms-control system that was instituted by the United States, Great Britain, and France under the Tripartite Declaration of May 1950. Designed to prevent further warfare after the establishment of Israel by maintaining a stable balance of power through the rationing of arms supplies, this agreement was soon circumvented by its French sponsors, and it collapsed altogether following the emergence in 1955 of the Soviet Bloc as a major source of arms. After analyzing the Tripartite system---a unique experiment in coordinated, long-term, multilateral arms control on a regional level--Mr. Jabber defines the basic requirements for effective and curable international accords of this kind by exploring the relationships among the international arms trade, the purposes of arms control, and the political objectives and security interests of both suppliers and recipients of arms.
