Myasthenia Gravis Premkumar Christadoss,2012-12-06 Autoimmune myasthenia gravis (MG) is a classical autoimmune disease, for which the target antigen, nicotinic acetylcholine receptor, has been cloned, sequenced and biochemically characterized. Antibodies to acetylcholine receptors destroy acetylcholine receptor at the neuromuscular junction, thus leading to defective neuromuscular transmission, muscle fatigue, and weakness. In the last few years, rapid advances have been made in unraveling the cellular and molecular mechanisms involved in the pathogenesis of MG, both in the animal model, experimental autoimmune MG (EAMG), and in human MG. Significant advances are being made in characterizing the cells and molecules involved in the autoimmune response to the acetylcholine receptor (AChR). These advances are leading to the development of specific methods of immunointervention in EAMG. Further understanding of the intricate involvement of the major histocompatibility complex (MHC) and non-MHC genes, T cell receptors (TCR), costimulator molecules, and specific cytokines in the afferent and efferent autoimmune response of AChR should pave the way to future antigen/clone-specific therapy of MG. This book is the outcome of the MG workshop proceedings in Mysore, India, 1998. The majority of the chapters in this book are contributed by world-renowned authors and their students. The book not only contains a timely review of specific topics, but also up-to-date findings. Immunologists and neurologists will find, in this volume, the latest in MG/EAMG cutting-edge research. Clinicians will be interested in the applications of the various immunointervention strategies into clinical trials in MG patients. Finally, students will not only be interested in reading the latest in EAMG/MG research, but will also find information to help them develop a future strategy to unravel the precise mechanism of disease. To summarize, in this book, the readers should find up-to-date information related to immunological mechanisms involved in MG pathogenesis and various modalities for possible approaches to immunointervention to treat MG.

**Born Freeloaders** Phumlani Pikoli,2019-10-01 Born on the cusp of democracy, the crew of young friends in Born Freeloaders navigates a life of drinking, wild parties and other recklessness. The siblings at the centre of the novel, Nthabiseng and Xolani, have been raised in an upper middle-class family with connections to the political elite. Nthabiseng is lauded by her peers as she whimsically goes through life, unable to form her own identity in a world that expects her to pick a side in the fractured classifications of race. Xolani, not having known his late father, longs for acceptance from an uncle who sees him and his generation as the bitter fruit borne of a freedom he and countless others fought for. As the story moves across multiple spaces in the nation's capital over a weekend, Born Freeloaders captures a political and cultural moment in the city's and South Africa's history. Interwoven is an analogous tale of the country's colonisation and the consequences that follow. And alongside the friends' uneasy awareness of their privilege is a heightened sense of discomfort at their inability to change the world they were born into.

**Divine Fire** David Woo,2021-03-01 How to find wisdom and spiritual sustenance in a time of crisis and uncertainty? In *Divine Fire*, David Woo answers with poems that move from private life into a wider world of catastrophe and renewal. The collection opens in the most personal space, a bedroom, where the chaotic intrusions of adulthood revive the bafflements of childhood. The perspective soon widens from the intimacies of love to issues of national and global import, such as race and class inequality, and then to an unspoken cataclysm that is, by turns, a spiritual apocalypse and a crisis that could be in the news today, like climate change or the pandemic. In the last part of the book, the search for ever-vaster scales of meaning, both sacred and profane, finds the poet trying on different personas and sensibilities—comic, ironic, earnest, literary, self-mythologizing— before reaching a luminous détente with the fearful and the sublime. The divine fire of lovers fading in memory—“shades of the men in my blood”—becomes the divine fire of a larger spiritual reckoning. In his new book of poems, Woo provides an astonishing vision of the world right now through his exploration of timeless themes of love, solitude, art, the body, and death.
