🔍 **Mission of Gravity** Hal Clement,1978 For a profit -- and adventure -- Barlennan would sail thousands of miles across uncharted waters, into regions where gravity itself played strange tricks. He would dare the perils of strange tribes and stranger creatures -- even dicker with those strange aliens from beyond the skies, though the concept of another world was unknown to the inhabitants of the disk-shaped planet of Mesklin. But in spite of the incredible technology of the strangers and without regard for their enormous size, Barlennan had the notion of turning the deal to an unsuspected advantage for himself . . . all in all a considerable enterprise for a being very much resembling a fifteen-inch caterpillar! This book also contains Hal Clement's classic article Whiligig World.

🔍 **GRAIL: Mapping the Moon's Interior** Maria Zuber,Christopher Russell,2013-11-19 In September 2011, the GRAIL mission launched two unmanned spacecraft to the Moon, which entered into lunar orbit on December 31, 2011 and January 1, 2012. They orbited the Moon until December 17, 2012, when they impacted the surface near the Moon's north pole. This book contains three review articles co-authored by the GRAIL Science Team and guest scientists that describe the reasons for the GRAIL mission, the development of the necessary technology, and the design of the mission to acquire the most precise measurements of the lunar gravity field possible today. The book provides a detailed description of the GRAIL mission's scientific objectives, the instrumentation and its required performance, the complex simulation of the measurement system for determining the gravity field, and the innovative education and public outreach of the mission directed toward middle-school students who could select areas of the Moon for imaging with the onboard MoonKam camera system. This volume is aimed at researchers and graduate students active in solar system science and planetology. Originally published in Space Science Reviews Journal, Vol. 178/1, 2013.

🔍 **Gravity Wells** James Alan Gardner,2014-04-01 James Alan Gardner has been called "one of the most engaging reads in SF." His debut novel, Expendable, was acclaimed by some of science fiction's most esteemed authors. This collection consists of stories making their debut, previously published stories that have won the Aurora Award, the Grand Prize in the prestigious Writers of the Future contest, and tales that have been nominated for Hugo and Nebula Awards.

🔍 **Against Gravity** Gary Gibson,2012-02-09 Against Gravity is a stunning sci-fi thriller from Gary Gibson, author of the Shoal Sequence. In the late twenty-first century, you will find a very different world. Little is as it used to be, and many are not what they seem. Kendrick Gallmon, survivor of an infamous research facility called the Maze, is trying to pick up the pieces of his life, even though he knows the Labrat augments are slowly killing him. Then one day his heart stops beating, forever, and a ghost urges him to return to the source of all his nightmares, a long-abandoned military complex filled with entirely real voices of the dead.

🔍 **Gravity** Chris Woodford,2004 Despite gravity's importance, people have started to understand it only in the last three hundred years or so. Before the seventeenth century, astronomers had little idea what kept the planets in orbit and no idea that it was the same force that made objects fall to Earth. This book traces the history of discoveries about gravity from ancient beliefs about the universe to modern-day research into black holes.

🔍 **Gravity Versus Gravity** Rahul Shrivastava,2018-02-04 A sci fi thriller with space for adventure, mystery and romance. Two comets return to Earth after three centuries as binary comets. Earth was lucky then as they passed by at a distance. Not this time. The comets rage their fury in a desert on their journey towards the sun when they cause a zero-gravity event. On their return journey to their dark abyss, they'll cause another zero-gravity event. And, the second event is not in an isolated place. Only one man can avert the catastrophe. But someone has to believe him first.

🔍 **Gravity** Suzanne Lyons,2005

🔍 **A Journey into Gravity and Spacetime** John Archibald Wheeler,1999-06-07 Gravity is not a force acting at a distance. It is mass gripping spacetime, telling it how to curve, and spacetime gripping mass, telling it how to move. According to preeminent physicist John Archibald Wheeler, gravity makes the closest connection between the world we see around us and the inner-most workings of the universe. In this imaginative volume, Wheeler explores gravity and spacetime by applying Einstein's battle-tested theory to both familiar and exotic phomomena--everything from flying tennis balls, to hurling gravity waves from crashing stars, the motion of the planets, and the collapse of a star into a black hole. It's a provocative, revealing, fully engaging scientific journey led by a frontline participant in the most important work in physics in the last 50 years.
