Letting Go, Living Free! Dr. Paul Hardy, 2021-03-19 The story is told of a family that adopted a little boy from a far-away country. He had been raised in an atheist home. One night, his father, in rage and desperation, had killed his mother and siblings right before his eyes. He then turned the gun on himself and committed suicide. The adopting family were Christians and wanted to be very careful about taking the little boy to church. They took him to a children's class and, as they dropped him off with the teacher, they explained that he had no previous education about God. They asked the teacher to be careful not to embarrass him. In kindness, the teacher decided to talk about Jesus using pictures to help the children understand. As she held up the drawing of Jesus, she asked the class the question, "Who knows who this is?" The little boy, in broken English raised his hand and blurted out, "I know Him. He's the man that was holding me when my father killed my family!"

Inertia Is Gravity Guy Cavet Myhre, 2004-12 Physicists and laypersons alike, rejoice! The crumbling, 75-year-old flawed foundation of quantum-physics methodology is facing its imminent coup de grâce, to be replaced by a new, wholly-rational foundation. Myhre's essay fires the first shot, which renders current physics textbooks instantly obsolete Really! He begins with many insightful discoveries, the oldest, of which, dates from a half century ago, when he was a USAF pilot. It is about the great importance of inertia in our lives, of how it determines the size of our atoms and the rate of our aging, and of how Myhre eventually discovered that the number 137 is closely associated with inertia he speculates that the magnitude of inertial force varies throughout the Universe and that it is 137 times greater in the vicinity of the Solar System than at a location in the Universe where it is at a minimum pretty heady stuff yet, his arguments, backed by mathematical equations, are quite convincing. Later, he made the all-important discovery of the quantum attributes of elementary particles, which, when used as units of measure, make the universal physical constants literally vanish from quantum-based equations. This simplification of a main aspect of quantum physics lead Myhre to discover other, heretofore, unknown aspects of our physical environment for example: the simple, but elegant, linkage between electromagnetic and gravitational force; the realization of the

beginning of a quantum-gravity model; the fine-structure constant's correct definition; the rôle of updated Planck values in determining the possible existence of an elementary particle of matter that is mediated by the graviton; new, more-rational equations about gravitational phenomena, using the quantum attributes of the hypothetical elementary particle of matter as units of measure; and many more. When Myhre retired, he decided to expose to the world the great truths about our quantum world that he has discovered over the decades. During that time, he kept most of his discoveries to himself because his family, friends, and associates, not being part of the physical community and, therefore, not in the know, would neither appreciate his discoveries nor recognize their importance. With the publication of this essay, Myhre hopes to prompt academic physicists to finalize the coup de grâce that he has begun by continuing to develop this more-coherent foundation for the methodology of quantum physics, which was impossible to achieve in the late 1920s because of the lack of sufficient knowledge at that time.

**The Last Lecture** Randy Pausch, 2008-04-08 After being diagnosed with terminal cancer, a professor shares the lessons he's learned—about living in the present, building a legacy, and taking full advantage of the time you have—in this life-changing classic. We cannot change the cards we are dealt, just how we play the hand. —Randy Pausch A lot of professors give talks titled The Last Lecture. Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull over the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture,

he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave—Really Achieving Your Childhood Dreams—wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because time is all you have . . . and you may find one day that you have less than you think). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

**Gravity's Revolt: Part Three** William Guy, 2001-02-06 1975.

Christopher Reed, a young minister in his first job, receives much-needed seasoning, is necessarily dis-illusioned. How? On one level by having an affair with Becky, one of his teen-aged parishioners. But the affair begun on a theological dare so to speak, in order to test an intriguing vision of the freedom of the Gospel which Dr. Buttrick, the senior pastor under whom Reed works, a truly Christ-like man (though it depends, of course, on what your image of Jesus is) has presented. Scrupulous, or guilt-stricken, Reed tells his wife Vinnie, an artist and a free thinker, what he has done with Becky. Vinnie erupts, then curiously adjusts, gradually accommodates herself, allows the affair to continue. Reed also tells Dr. Buttrick what he has done.

Great- spirited, a wise old man, a genius, Dr. Buttrick listens and counsels. He counsels both Reed and Vinnie. The three of them discuss the limits of marriage, the relevance of Christianity to same. Vinnie and Dr. Buttrick have their own intense relationship. Meanwhile the meteoric Becky moves through her senior year in high school, fights free of her youth and prepares to leave for college. Obsessed almost, Reed suffers at the prospect of losing her. And grows in some ways as a person or at least as a pastor, learning to expect less of the flock which he supposedly leads, since it often acts less than nobly. Some members even turn on Dr. Buttrick, the genuinely good man, in the year of the novel's action.

**The Pull of Gravity** Gae Polisner,2011-05-10 While Nick Gardner's family is falling apart, his best friend, Scooter, is dying from a freak disease. The Scoot's final wish is that Nick and their quirky classmate, Jaycee Amato, deliver a prized first-edition copy of *Of Mice and Men* to the Scoot's father. There's just one problem: the Scoot's father walked out years ago and hasn't been heard from since. So, guided by Steinbeck's life lessons, and with only the vaguest of plans, Nick and Jaycee set off to find him. Characters you'll want to become friends with and a narrative voice that sparkles with wit make this a truly original coming-of-age story.

Bergmann's Equestrian Venture is the 4th book in the nine-book series. Earth was spared the brunt of a comet-induced planet-wide winter by the Striver-led, Banderat-implemented, redirection of three comets. Bergmann's Team played an important part in that cometary redirection. Now the Team has been invited to move a small herd of horses to the planet Baldon: Banderat would like to ride! This venture is the first feat Guy hopes to execute in his long-term plans to forge an extraterrestrial Human presence. The interstellar trip aboard Climber, a first for Humans, is a prelude to their successful arrival at the city of Bandalu, where they help finish an equestrian resort. Nita's 'surprise' is a shock to all the team: the first Human child to be born off Earth. A family of Sayen reveals their presence to Guy, Nita, Greg and Raquel, on the mountain slope above Highlands Resort. The presence of a hidden seventh sapient race sends Shockwaves through the Concordat.
