Moral Tribes Joshua Greene, 2014-12-30 “Surprising and remarkable...Toggling between big ideas, technical details, and his personal intellectual journey, Greene writes a thesis suitable to both airplane reading and PhD seminars.”—The Boston Globe Our brains were designed for tribal life, for getting along with a select group of others (Us) and for fighting off everyone else (Them). But modern times have forced the world’s tribes into a shared space, resulting in epic clashes of values along with unprecedented opportunities. As the world shrinks, the moral lines that divide us become more salient and more puzzling. We fight over everything from tax codes to gay marriage to global warming, and we wonder where, if at all, we can find our common ground. A grand synthesis of neuroscience, psychology, and philosophy, *Moral Tribes* reveals the underlying causes of modern conflict and lights the way forward. Greene compares the human brain to a dual-mode camera, with point-and-shoot automatic settings (“portrait,” “landscape”) as well as a manual mode. Our point-and-shoot settings are our emotions—efficient, automated programs honed by evolution, culture, and personal experience. The brain’s manual mode is its capacity for deliberate reasoning, which makes our

thinking flexible. Point-and-shoot emotions make us social animals, turning Me into Us. But they also make us tribal animals, turning Us against Them. Our tribal emotions make us fight—sometimes with bombs, sometimes with words—often with life-and-death stakes. A major achievement from a rising star in a new scientific field, *Moral Tribes* will refashion your deepest beliefs about how moral thinking works and how it can work better.

A History of Irish Literature and the Environment Malcolm Sen, 2022-07-28 From Gaelic annals and medieval poetry to contemporary Irish literature, *A History of Irish Literature and the Environment* examines the connections between the Irish environment and Irish literary culture. Themes such as Ireland's island ecology, the ecological history of colonial-era plantation and deforestation, the Great Famine, cultural attitudes towards animals and towards the land, the postcolonial politics of food and energy generation, and the Covid-19 pandemic - this book shows how these factors determine not only a history of the Irish environment but also provide fresh perspectives from which to understand and analyze Irish literature. An international team of contributors

provides a comprehensive analysis of Irish literature to show how the literary has always been deeply engaged with environmental questions in Ireland, a crucial new perspective in an age of climate crisis. A History of Irish Literature and the Environment reveals the socio-cultural, racial, and gendered aspects embedded in questions of the Irish environment.

Down the Bright Stream: The Prehistory of Woodcock Corner and the Tregurra Valley, Cornwall Sean R. Taylor, 2022-06-23 This volume reports on a series of fieldwork projects carried out in the Tregurra Valley, to the east of Truro, Cornwall between 2009-2015. The fieldwork led to the identification of a large number of pits and hearths across the site, the majority of which that have proved dateable spanning the Early Neolithic to the end of the Early Bronze Age.

Moral Tribes Joshua David Greene, 2014-01 Our brains were designed for tribal life, for getting along with a select group of others (Us), and for fighting off everyone else (Them). As the world shrinks, the moral lines that divide us become more salient and more puzzling. We fight

over everything from tax codes to gay marriage to global warming, and we wonder where, if at all, we can find our common ground. A grand synthesis of neuroscience, psychology, and philosophy, *Moral Tribes* reveals the underlying causes of modern conflict and lights the way forward. Here the human brain is revealed to be like a dual-mode camera, with point-and-shoot automatic settings ('portrait', 'landscape') as well as a manual mode. Our point-and-shoot settings are our emotions-efficient, automated programs honed by evolution, culture, and personal experience. The human brain's manual mode is its capacity for deliberate reasoning, which makes our thinking flexible. Our point-and-shoot emotions make us social animals, turning Me into Us. The updated Second Edition of Herschel Knapp's friendly and practical introduction to statistics shows students how to properly select, process, and interpret statistics without heavy emphasis on theory, formula derivations, or abstract mathematical concepts. Each chapter is structured to answer questions that students most want answered: What statistical test should I use for this situation? How do I set up the data? How do I run the test? How do I interpret and document the results? Online tutorial videos, examples, screenshots, and intuitive illustrations help students get the story from their data as they learn by doing, completing practice exercises at the end of each chapter using prepared downloadable data sets.
