Breaking the Availability Barrier III Paul J. Holenstein, Bruce Holenstein, Bill Highleyman, 2007-05

The Bhagavad Gita is a world-scripture with a world message, It is not meant for India alone: it is a Bible of Humanity. The Gita has an answer to the problems and perplexities of the modern world. The problems of social, national and international reconstruction will not be solved without an appreciation of those deeper values of life which, the Gita shows, are the very structure of Reality. A new Indian nation, a new social order, a new civilisation must be built on the essential teachings of the Gita. The wisdom of the Gita is the hope of a new humanity Sadhu Vaswani, who was regarded by many as an embodiment of the Gita, a living Gita, and who was equally at home in the Eastern and Western traditions of thought, gives us in this book the teaching of the Gita in simple words. In the Bhagavad Gita, simplicity is combined with wisdom. The essential teaching of the Bhagavad Gita has been overlaid by controversies which scholars and theologians may understand but not lovers of the simple life. In the present volume, the author has simplified the message of the Bhagavad Gita and related it to the experience and aspirations of the common man. To the vast majority of men, he says, life seems to be a meaningless muddle. Not many seem to realise that life, at its noblest, is a yatra, a pilgrimage to God: the Infinite is our true Home.

Emerging Standards for Enhanced Publications and Repository Technology Marjan Vernooij-

Gerritsen, 2009 Emerging Standards for Enhanced Publications and Repository Technology serves as a technology watch on the rapidly evolving world of digital publication. It provides an up-to-date overview of technical issues, underlying the development of universally accessible publications, their elemental components and linked information. More specifically it deals with questions as how to bring together the communities of the Current Research Information Systems (CRIS) and the Common European Research Information Format (CERIF). Case studies like EGEE, DILIGENT and DRIVER are analyzed, as well as implementations in projects in Ireland, Denmark and The Netherlands. Interoperability is the keyword in this context and this book introduces to new standards and concepts used in the design of envelopes and packages, overlays and feeds, embedding, publishing formats

and Web services and service-oriented architecture. It is a must-read for quick and comprehensive orientation.

*Cooperative Robots and Sensor Networks* Anis Koubâa, Abdelmajid Khelil, 2013-10-01 Mobile robots and Wireless Sensor Networks (WSNs) have enabled great potentials and a large space for ubiquitous and pervasive applications. Robotics and WSNs have mostly been considered as separate research fields and little work has investigated the marriage between these two technologies. However, these two technologies share several features, enable common cyber-physical applications and provide complementary support to each other. The primary objective of book is to provide a reference for cutting-edge studies and research trends pertaining to robotics and sensor networks, and in particular for the coupling between them. The book consists of five chapters. The first chapter presents a cooperation strategy for teams of multiple autonomous vehicles to solve the rendezvous problem. The second chapter is motivated by the need to improve existing solutions that deal with connectivity prediction, and proposed a genetic machine learning approach for link-quality prediction. The third chapter presents an architecture for indoor navigation using an Android smartphone for guiding a variety of users, from sighted to the visually impaired, to their intended destination. In chapter four, the authors deal with accurate prediction modeling of ocean currents for underwater glider navigation. In chapter five, the authors discuss the challenges and limitations of RSS-based localization mechanisms and propose, EasyLoc, an autonomous and practical RSS-based localization technique that satisfies ease of deployment and implementation.

*Correlative Light and Electron Microscopy II*, 2014-09-30 This new volume of Methods in Cell Biology looks at methods for analyzing correlative light and electron microscopy (CLEM). With CLEM, people try to combine the advantages of both worlds, i.e. the dynamics information obtained by light microscopy and the ultrastructure as provided by electron microscopy. This volume contains the latest techniques on correlative microscopy showing that combining two imaging modalities provides more than each technique alone. Most importantly it includes the essential protocols, including tips, tricks and images for you to repeat these exciting techniques in your own lab. With cutting-edge material, this comprehensive collection is intended to guide researchers for years to come. Covers sections on model systems and functional studies, imaging-based approaches and emerging studies Chapters are written by experts in the field Cutting-edge material Second of two volumes dedicated to Correlative Light and Electron microscopy (CLEM)
