The California Electricity Crisis Christopher Weare, 2003

Electricity Restructuring in the United States Steve Isser, 2015-04-16 The electric utility industry in the US is technologically complex, and its structure as a classic network industry makes it intricate in business terms as well, so deregulation of such a complicated industry was a particularly detailed process. Steve Isser provides a detailed and comprehensive analysis of the history of the transformation of this complex industry from the 1978 Energy Policy Act to the present, covering the economic, legal, regulatory, and political issues and controversies in the transition from regulated utilities to competitive electricity markets. The book is a multidisciplinary study that includes a comprehensive review of the economic literature on electricity markets, the political environment

of electricity policymaking, administrative and regulatory rulemaking, and the federal case law that restrained state and federal regulation of electricity. Dr Isser offers a valuable case study of the pitfalls and problems associated with the deregulation of a complex network industry.

Pacific Payback Stephen L. Moore, 2015-06-02 "Deeply researched and well written....By far the most detailed account of USS Enterprise's dive-bombers and their decisive role at the Battle of Midway."* Sunday, December 7, 1941, dawned clear and bright over the Pacific.... But for the Dauntless dive-bomber crews of the USS Enterprise returning to their home base on Oahu, it was a morning from hell. Flying directly into the Japanese ambush at Pearl Harbor, they lost a third of their squadron and witnessed the heart of America's Navy broken and smoldering on the oil-slicked waters below. The next six months, from Pearl Harbor to the Battle of Midway—a dark time during which the Japanese scored victory after victory—this small band of aviators saw almost constant deployment, intense carrier combat, and fearsome casualties. Many were killed by enemy Zero fighters, anti-aircraft fire, or deadly crash landings in the Pacific, while others were captured and spent years in POW camps. Yet the Enterprise's Dauntless crews would be the first to strike an offensive blow against Japanese installations in the Marshall Islands, would be the first to sink a Japanese warship, and would shepherd the Doolittle Raiders' bombing of Tokyo. Not until Midway, though, would Dauntless crews get the chance to settle the score...and change the course of World War II. Drawing on dozens of new interviews and oral histories, author Stephen L. Moore brings to life inspiring stories of individual sacrifice and bravery—and the sweeping saga of one of America's greatest triumphs. INCLUDES PHOTOS

A Scientist in the City James Trefil,1994-12-01 In his previous books, *A Scientist At The Seashore* and *Meditations At Sunset*, James Trefil used commonplace settings in the natural world as a point of departure for probing the mysteries of nature. In *A Scientist In The City*, Trefil takes the opposite tack, looking at the quintessential man-made environment of the city as a way of examining the forces that define our world. What does the heating system of a building or the construction of a bridge tell us about the development of a city? What does the amplified environmental stress of city life on plants and animals suggest about the wild? How have scientific advances in building materials and an understanding of the structure of the atom helped to shape the cities of today? From an explanation of the evolution and influence of plate glass to reinforced steel to an analysis of the future of the skyscraper, *A Scientist In The City* offers a fascinating study of the promise and the consequences of technology in our everyday urban lives. In addition, Trefil goes on to explore how the new technologies being developed today will help to determine the changing forms that cities will take in the future. *A Scientist In The City* is the kind of book that will open our eyes to the man-made world around us, and show us some of the scientific reasons for why we live the way we do.
