Mobile TV: Customizing Content and Experience Aaron Marcus, Anxo Cereijo Roibás, Riccardo Sala, 2009-12-01 Developing usable, useful, and appealing solutions for the customer or user experience requires customization according to specific users' needs amidst frequently changing physical and social environments. Complex design problems like these require interdisciplinary perspectives that cover software functionality, human interaction and communication experiences, and perceived value. After defining and summarizing current research and development, this book focuses on Mobile TV experience in everyday life, innovative conceptual and participatory design methods, contextual analysis methods, social context for interactive multimedia systems, advanced interaction with mobile digital content, and future trends for the wide range of products and services that will be offered in the decade to come. The Editors have carefully balanced the theoretical and empirical approaches providing a valuable insight into principles and methods, as well as actionable guidelines and recommendations for all those interested in exploring how to achieve the core objectives of usability, usefulness, and social appeal of this new mobile-video technology. The book answers many questions, and raises some new ones that only future technology development and deployment in mobile human-computer interaction and communication can answer.

Take Control of FaceTime and Messages, 2nd Edition Glenn

Fleishman, 2023-12-13 Master Apple's video, audio, and text messaging tools! Version 2.0, updated December 13, 2023 Dig into FaceTime, Messages, and Phone from the basics through the most advanced and interesting features available, including screen sharing, group calls, and sending rich messages in Take Control of FaceTime and Messages. This comprehensive book will answer every question and reveal useful features you never knew existed.

FaceTime, Messages, and Phone form the core of Apple's video, texting, and calling tools for owners of iPhones, iPads, Macs, and Apple Watches. As FaceTime and Messages have expanded features, they've become more complicated to master and use exactly the way you want. How they interact with the phone network and the Phone app can be a blurry line, too. In this book, Glenn Fleishman lays out your options to best understand, use, and customize FaceTime and Messages for your needs and conversations. Start by mastering (or reviewing) the basics of each app, then move into group calls and texts, using rich media, maintaining your privacy, and adding whimsy to conversations. Covers iOS, iPadOS, macOS, tvOS, and watchOS. The book covers all three apps (and the many ways in which they interact) extensively, showing you:

- What's new in the FaceTime, Messages, and Phone apps (updated for macOS Sonoma 14.2, iOS 17.2, iPadOS 17.2, watchOS 10.2, and tvOS 10.2)
- How to master the basics of the FaceTime, Messages, and Phone apps
- Essential settings and preferences for these apps, including how to pick your primary address or phone number and manage location sharing, and maintain your privacy
- Ways to share your

screen (or let someone share theirs with you) in both FaceTime and Messages, and when to use which • How to insert the text of a sign or other printed material in a message, or even dial a phone number by pointing your iPhone at a printed number • How to have fun and get creative with Message Effects, Camera Effects, stickers, and hashtag images • How Apple secures live audio, video, and texting • Strategies and tools to identify and block unwanted phone calls and messages You'll learn about FaceTime capabilities such as: • How to use FaceTime for audio or video calls with one person or a group of up to 32 people • Why you might want to use a FaceTime Link, and how it can extend FaceTime to Windows and Android users • How to work with audio input and output devices in FaceTime • How to use enhanced audio (Mic Mode) and video (Portrait Mode) effects in FaceTime calls on supported devices • How to use the Eye Contact feature on iPhones and iPads, which simulates eye-to-eye contact even when you're not looking at the camera • How to place and receive FaceTime calls on an Apple TV using Continuity Camera • How to use SharePlay, which lets parties carry on a FaceTime conversation while enjoying synchronized video, audio, or screen sharing (and even how to transfer SharePlay to an Apple TV) • How to convert a FaceTime audio call to a video call • How to use gestures to create animated video effects Find out things you never knew about Messages, including: • Why some conversations in Messages use iMessage (blue bubbles for individuals, gray bubbles for businesses) while others use SMS/MMS (green bubbles), and the differences

between them • All about advanced Messages features, such as nested replies and person-to-person Apple Pay • Why Messages isn't just for text, but also for audio messages, Digital Touch effects, animations, and more • Ways to keep track of shared links and media across apps with Shared for You • The privacy tradeoffs of Messages in iCloud • Simple ways to create events and reminders from Messages conversations • What to do when group chats get out of control—managing notifications, using mentions, and understanding the differences between SMS and MMS chats • How to view transcriptions of audio messages Make better use of the Phone app: • How to make phone calls (including emergency calls) from your iPhone, iPad, Mac, or Apple Watch • What the “verified” label on incoming phone calls means

Pro Visual Studio LightSwitch 2011 Development Tim Leung, Yann Duran, 2012-06-13 Microsoft Visual Studio LightSwitch 2011 is a rapid application deployment tool that lets power users and administrators build data-centric business applications for the desktop, cloud, and Web in just a few clicks, with no code required. But more advanced developers and business users will hunger for more: how do you design complex screens? How do you query data using LINQ and other syntax structures? How do you secure your application? Pro Visual Studio LightSwitch 2011 Development answers these questions and more as authors Tim Leung and Yann Duran—both awarded Microsoft 2011 Community Contributor Awards for their LightSwitch expertise—cover this breakthrough product and its operations and structure under the covers. For

serious developers building, enhancing and deploying advanced business applications using LightSwitch, Pro Visual Studio LightSwitch 2011 Development is the guide for going beyond the click-and-you're-done interface, while still maintaining the elegance and convenience of rapid application development.

Jutland 1916 Innes McCartney, 2018-04-26 The Battle of Jutland was the

largest naval battle and the only full-scale clash of battleships in the First World War. For years the myriad factors contributing to the loss of many of the ships remained a mystery, subject only to speculation and theory. In this book, marine archaeologist and historian Dr Innes McCartney reveals for the first time what became of the warships that vanished on the night of 31st May 1916, examining the circumstances behind the loss of each ship and reconciling what was known in 1916 to what the archaeology is revealing today. The knowledge of what was present was transformed in 2015 by a ground-breaking survey using the modern technology of multi-beam. This greatly assisted in unravelling the details behind several Jutland enigmas, not least the devastating explosions which claimed five major British warships, the details of the wrecks of the 13 destroyers lost in the battle and the German warships scuttled during the night phase. This is the first book to identify the locations of many of the wrecks, and – scandalously – how more than half of these sites have been illegally plundered for salvage, despite their status as war graves. An essential and revelatory read for anyone interested in naval history and marine archaeology.

Data Visualization Toolkit Barrett Clark, 2016-08-04 Create Beautiful Visualizations that Free Your Data to Tell Powerful Truths “The depth of Barrett Clark’s knowledge shines through in his writing: clear, concise, and confident. Barrett has been practicing all of this stuff in his day job for many years—Postgres, D3, GIS, all of it. The knowledge in this book is real-

world and hard-earned!” —From the Foreword by Obie Fernandez

Data Visualization Toolkit is your hands-on, practical, and holistic guide to the art of visualizing data. You’ll learn how to use Rails, jQuery, D3, Leaflet, PostgreSQL, and PostGIS together, creating beautiful visualizations and maps that give your data a voice and to make it “dance.” Barrett Clark teaches through real-world problems and examples developed specifically to illuminate every technique you need to generate stunningly effective visualizations. You’ll move from the absolute basics toward deep dives, mastering diverse visualizations and discovering when to use each. Along the way, you’ll build three start-to-finish visualization applications, using actual real estate, weather, and travel datasets. Clark addresses every component of data visualization: your data, database, application server, visualization libraries, and more. He explains data transformations; presents expert techniques in JavaScript, Ruby, and SQL; and illuminates key concepts associated with both descriptive statistics and geospatial data. Throughout, everything is aimed at one goal: to help you cut through the clutter and let your data tell all it can. This guide will help you Explore and understand the data visualization technology stack Master the thought process and steps involved in importing data Extract, transform, and load data in usable, reliable form Handle spotty data, or data that doesn’t line up with what your chart expects Use D3 to build pie and bar charts, scatter and box plots, and more Work effectively with time-series data Tweak Ruby and SQL to optimize

performance with large datasets Use raw SQL in Rails: window functions, subqueries, and common table expressions Build chord diagrams and time-series aggregates Use separate databases or schema for reporting databases Integrate geographical data via geospatial SQL queries Construct maps with Leaflet and Rails Query geospatial data the “Rails way” and the “raw SQL way”

Changing Television Environments Manfred Tscheligi, Marianna Obrist, Arthur Lugmayr, 2008-06-25 This book constitutes the refereed proceedings of the 6th European Conference on Interactive Television, EuroITV 2008, held in Salzburg, Austria, in July 2008. The 42 revised full papers were carefully reviewed and selected from 156 submissions. The contributions cover significant aspects of the interactive television domain including submissions on user studies, technical challenges related to new developments as well as new kind of formats. The papers are organized in topical sections on interactive TV, interactive authoring, personalisation and recommender systems, mobile TV, social TV, new TV environments, iTV architectures and systems, user interfaces and interaction design, user studies, and accessibility.

z/OS V1.11 DFSMS Release Guide Mary Lovelace, Andre Luiz Coelho Da Silva, Anthony Fletcher, Juergen Hoerner, Norbert Schlumberger, Hien Troung, Craig

Vernon, IBM Redbooks, 2010-11-19 Each release of data facility storage management subsystem (DFSMS) builds upon the previous version to provide enhanced storage management, data access, device support, program management, and distributed data access for the z/OS® platform in a system-managed storage environment. This IBM® Redbooks® publication provides a summary of the functions and enhancements in z/OS V1R11 DFSMS. It provides you with the information that you need to understand and evaluate the content of this DFSMS release, along with practical implementation hints and tips. Also included are enhancements that were made available through an enabling PTF that has been integrated into z/OS DFSMS V1R11. This book was written for storage professionals and system programmers who have experience with the components of DFSMS. It provides sufficient information so that you can start prioritizing the implementation of new functions and evaluating their applicability in your DFSMS environment.

The Inside Text R. Harper, L. Palen, A. Taylor, 2005-06-27 SMS or Text is one of the most popular forms of messaging. Yet, despite its immense popularity, SMS has remained unexamined by science. Not only that, but the commercial organisations, who have been forced to offer SMS by a demanding public, have had very little idea why it has been successful. Indeed, they have, until very recently, planned to replace SMS with other messaging services such as MMS. This book is the first to bring together scientific studies into the values that 'texting' provides, examining both cultural variation in

countries as different as the Philippines and Germany, as well as the differences between SMS and other communications channels like Instant Messaging and the traditional letter. It presents usability and design research which explores how SMS will evolve and what is likely to be the pattern of person-to-person messaging in the future. In short, *The Inside Text* is a fundamental resource for anyone interested in mobile communications at the start of the 21st Century.

Field Arithmetic Michael D. Fried, Moshe Jarden, 2013-04-17 *Field Arithmetic* explores Diophantine fields through their absolute Galois groups. This largely self-contained treatment starts with techniques from algebraic geometry, number theory, and profinite groups. Graduate students can effectively learn generalizations of finite field ideas. We use Haar measure on the absolute Galois group to replace counting arguments. New Chebotarev density variants interpret diophantine properties. Here we have the only complete treatment of Galois stratifications, used by Denef and Loeser, et al, to study Chow motives of Diophantine statements. Progress from the first edition starts by characterizing the finite-field like $P(\text{pseudo})A(lgebraically)C(losed)$ fields. We once believed PAC fields were rare. Now we know they include valuable Galois extensions of the rationals that present its absolute Galois group through known groups. PAC fields have projective absolute Galois group. Those that are Hilbertian are characterized by this group being pro-free. These last decade results are tools for

studying fields by their relation to those with projective absolute group. There are still mysterious problems to guide a new generation: Is the solvable closure of the rationals PAC; and do projective Hilbertian fields have pro-free absolute Galois group (includes Shafarevich's conjecture)?

Proceedings of the Third International Network Conference (INC2002) Paul Dowland, Steven Furnell, 2012-06-26 This book contains the proceedings of the Third International Network Conference (INC 2002), which was held in Plymouth, UK, in July 2002. A total of 72 papers were accepted for inclusion in the conference, and they are presented here in 8 themed chapters. The main topics of the book include: Web Technologies and Applications; Network Technologies; Multimedia over IP; Quality of Service; Security and Privacy; Distributed Technologies; Mobility; and Applications and Impacts. The papers address state-of-the-art research and applications of network technology, arising from both the academic and industrial domains. The book should consequently be of interest to network practitioners, researchers, academics, and technical managers involved in the design, development and use of network systems.

Information Technologies and Economic Development in Latin America Alberto Chong,Mónica Yáñez-Pagans,2020-02-29 Information Technologies and Economic Development in Latin America provides a collection of rigorous empirical studies that contributes to a better understanding of the role and impact of old and new information technologies on Latin American economic development. It provides evidence using randomized and quasi-experimental designed studies for different information and communication technologies interventions. In evaluating their development impact a critical concern has been to contribute to the little existing evidence. In fact, whereas many ICT projects in the developing world have been promoted by multilateral organizations, bilateral aid agencies and nongovernmental organizations in recent years, the extent to which these interventions and policies actually contribute to the development of the region is unclear. The book provides evidence on what works and what does not.

Handbook of Musculoskeletal Pain and Disability Disorders in the Workplace Robert J. Gatchel,Izabela Z. Schultz,2014-05-08 This book addresses the

complexity of preventing, diagnosing, and treating musculoskeletal pain and disability disorders in the workplace. Divided evenly between common occupational pain disorders, conceptual and methodological issues, and evidence-based intervention methods, this comprehensive reference presents current findings on prevalence, causation, and physical and psychological aspects common to these disorders. Attention is given to working-world concerns, including insurance and compensation issues and AMA guidelines for disability evaluations. Also, specialized chapters offer lenses for understanding and administering the best approaches for treating specific pain disorders, and explore what workplaces can do to accommodate affected employees and prevent injuries from occurring in the first place.
