*Essential Java 3D fast* Ian Palmer,2012-12-06 This is an introductory textbook for those who want to learn Java 3D fast. It is packed with numerous examples and illustrations, including an 8-page colour section. The author takes readers through the different stages of writing a simple program in Java 3D and then shows how to modify and add features to the program. Indeed, one of the best way to learn any programming language is by writing programs. The examples in this book assume a working knowledge of Java and some background in 3D graphics. It is one of the first books to introduce Java 3D at an introductory level.

**Achtung-Panzer!** Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Taming Gaming Andy Robertson,2021-01-21 Video games can instil amazing qualities in children - curiosity, resilience, patience and problem-solving to name a few - but with the World Health Organisation naming gaming disorder as a clinically diagnosable condition, parents and carers can worry about what video games are doing to their children. Andy Robertson has dealt with all of the above, not just over years of covering this topic fo newspapers, radio and television but as a father of three. In this guide, he offers parents and carers practical advice and insights - combining his own experiences with the latest research and guidance from psychologists, industry experts, schools and children's charities - alongside a treasure trove of 'gaming recipes' to test out in your family. Worrying about video game screen time, violence, expense and addiction is an understandable response to scary newspaper headlines. But with first-hand understanding of the video games your children love to play, you can anchor them as a healthy part of family life. Supported by the [www.taminggaming.com](http://www.taminggaming.com) Family Video Game Database, Taming Gaming leads you into doing this so that video games can stop being a point of argument, worry and stress and start providing fulfilling, connecting and ambitious experiences together as a family.

*The Star Fraction* Ken MacLeod,2002-07-05 Moh Kohn is a security mercenary, his smart gun and killer reflexes for hire. Janis Taine is a scientist working on memory-enhancing drugs, fleeing the US/UN's technology cops. Jordan Brown is a teenager in the Christian enclave of Beulah City, dealing in theologically-correct software for the world's fundamentalists-and wants out. In a balkanized twenty-first century, where the peace process is deadlier than war, the US/UN's spy satellites have everyone in their sights. But the Watchmaker has other plans, and the lives of Moh, Janis, and Jordan are part of the program. A specter is haunting the fight for space and freedom, the specter of the betrayed revolution that happened before. . . . With *The Star Fraction*, Ken MacLeod burst onto the SF scene and began the Fall Revolution sequence that continued with *The Stone Canal*, *The Cassini Division*, and *The Sky Road*.

*The Just City* Jo Walton, 2015-01-13 Here in the Just City you will become your best selves. You will learn and grow and strive to be excellent. Created as an experiment by the time-traveling goddess Pallas Athene, the Just City is a planned community, populated by over ten thousand children and a few hundred adult teachers from all eras of history, along with some handy robots from the far human future—all set down together on a Mediterranean island in the distant past. The student Simmea, born an Egyptian farmer's daughter sometime between 500 and 1000 A.D, is a brilliant child, eager for knowledge, ready to strive to be her best self. The teacher Maia was once Ethel, a young Victorian lady of much learning and few prospects, who prayed to Pallas Athene in an unguarded moment during a trip to Rome—and, in an instant, found herself in the Just City with grey-eyed Athene standing unmistakably before her. Meanwhile, Apollo—stunned by the realization that there are things mortals understand better than he does—has arranged to live a human life, and has come to the City as one of the children. He knows his true identity, and conceals it from his peers. For this lifetime, he is prone to all the troubles of being human. Then, a few years in, Sokrates arrives—the same Sokrates recorded by Plato himself—to ask all the troublesome questions you would expect. What happens next is a tale only the brilliant Jo Walton could tell. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

*The Medieval Art of Swordsmanship* Jeffrey L. Forgeng, 2018 Jointly Published with the British Royal Armouries Medieval fighting has long been thought to be rough and untutored. Visions of men madly slashing to and fro and hoping for the best still dominate not only popular culture but modern histories of fencing as well. In recent years, the survival of more than 175 fighting treatises from the Middle Ages and Renaissance has provided a whole generation of enthusiasts, scholars, reenactors and stage choreographers with a wealth of new information. This text represents the earliest known text on swordsmanship anywhere in the world. Royal Armouries MS I.33 presents a system of combat that is sophisticated and demonstrates the diffusion of fighting arts beyond the military classes. Within the manuscripts richly illustrated full-color illustrations lie still-potent demonstrates of sword techniques, surprisingly shown by a Priest and Scholar. Most surprisingly, however, is the presence of a woman practicing in the text, the only one illustrated in any European fighting treatise. This full color facsimile & translation has been long-awaited and promises to become an important resource for years to come

**Economic Science Fictions** William Davies, 2018-05-04 An innovative new anthology exploring how science fiction can motivate new approaches to economics. From the libertarian economics of Ayn Rand to Aldous Huxley's consumerist dystopias, economics and science fiction have often orbited each other. In *Economic Science Fictions*, editor William Davies has deliberately merged the two worlds, asking how we might harness the power of the utopian imagination to revitalize economic thinking. Rooted in the sense that our current economic reality is no longer credible or viable, this collection treats our economy as a series of fictions and science fiction as a means of anticipating different economic futures. It asks how science fiction can motivate new approaches to economics and provides surprising new syntheses, merging social science with fiction, design with politics, scholarship with experimental forms. With an opening chapter from Ha-Joon Chang as well as theory, short stories, and reflections on design, this book from Goldsmiths

Press challenges and changes the notion that economics and science fiction are worlds apart. The result is a wealth of fresh and unusual perspectives for anyone who believes the economy is too important to be left solely to economists. Contributors AUDINT, Khairani Barokka, Carina Brand, Ha-Joon Chang, Miriam Cherry, William Davies, Mark Fisher, Dan Gavshon-Brady and James Pockson, Owen Hatherley, Laura Horn, Tim Jackson, Mark Johnson, Bastien Kerspern, Nora O Murchú, Tobias Revell et al., Judy Thorne, Sherryl Vint, Joseph Walton, Brian Willems

**Evidence** Jon R. Waltz, Roger Park, Richard D. Friedman, 2009 The 11th edition of this intellectually challenging casebook provides a complete overview of evidence, including key U.S. Supreme Court and other court opinions, updated information on scientific evidence, new questions and hypotheticals, and common courtroom objections A distinguished new author has joined the book. Richard D. Friedman is the Ralph W. Aigler Professor of Law at the University of Michigan. Professor Friedman is a prolific scholar on evidence law and evidence theory. His work includes articles advocating the Confrontation Clause approach that was eventually adopted by the Supreme Court in the Crawford case. In 2006, he successfully argued the Hammon case (the companion case to Davis v. Washington) before the Supreme Court. He is also the General Editor of The New Wigmore: A Treatise on Evidence. The 11th Edition adds three important new Supreme Court cases on the right to confrontation and on the right to present evidence. In the 11th Edition, the chapters on Presumptions, Judicial Notice, and Governmental Privileges have been extensively updated. Recent cases have been added to other chapters in order to provide contemporaneous examples of long-standing principles. Oversized cases have been edited to reduce length. The authors have continued the practice of choosing cases on the basis of teachability. Teaching favorites that have stood the test of time have been retained, and new cases that promise to be fun to teach have been added. An updated version of the much-admired Teacher's Manual will be published at the same time as the 11th Edition.
