**Development and employment of fixed-wing gunships 1962-1972** ,

Dirty Little Secrets of the Vietnam War James F. Dunnigan,Albert A. Nofi,2000-05-05 Details suppressed or long-forgotten facts about the conflict in Vietnam, including a look at the beginnings of the Navy's Top Gun combat school.

**Shadow and Stinger** William Pace Head,2007-02-26 Nicknamed “the truck killer,” the AC-119K gunship and its counterpart, the AC-119G, were developed in the late 1960s in response to the needs of the U.S. military in Vietnam. This important book examines the evolution of these aircraft and their role within Vietnam, military policy, and geopolitical realities. Drawing on unpublished studies and a host of primary materials, William Head discusses the events that led to the birth of the AC-119, the planning and modification processes that followed, and its operational history. The G model, or “Shadow,” focused on air support and anti-personnel missions. “Stinger,” the K model, which could carry more cargo for longer distances, was suited for destruction of enemy vehicles. Though the AC-119 was only an interim asset, its descendants—the AC-130E, H, and U—have played an active role in the recent conflict in Iraq. A narrative of the crews and pilots who executed the missions and the engineers, designers, and the politicians responsible for the aircraft, Shadow and Stinger will be of interest to Vietnam veterans, historians, and scholars, as well as aviation enthusiasts.

**Apollo's Warriors** Michael E. Haas,1998-05 Presenting a fascinating insider's view of U.S.A.F. special operations, this volume brings to life the critical contributions these forces have made to the exercise of air & space power. Focusing in particular on the period between the Korean War & the Indochina wars of 1950-1979, the accounts of numerous missions are profusely illustrated with photos & maps. Includes a discussion of AF operations in Europe during WWII, as well as profiles of Air Commandos who performed above & beyond the call of duty. Reflects on the need for financial & political support for restoration of the forces. Bibliography. Extensive photos & maps. Charts & tables.

**Ghostriders 1968-1975** William Walter,2022-03-08 If necessity is the mother of invention, the AC-130 gunship was definitely her offspring. Ghostriders: Mors De Caelis is a comprehensive history of AC-130 gunship combat operations in Vietnam, Laos, and Cambodia. The story begins with the first AC-130 in 1968, and ends in 1975 at the end of the war in Vietnam. It tells the life and death stories of Spectre crews, who faced extreme danger while hunting trucks on the Ho Chi Minh Trail and providing fire support for US and allied ground forces. Though the AC-130 was credited with 10,000 trucks destroyed, this phenomenal achievement came with a hefty price. Fifty-two Spectre crewmen and six AC-130s were lost during combat operations in Laos and Vietnam. Written in third-person omniscient point of view by an experienced combat veteran and Spectre Historian, all aspects of the story are derived from official declassified records and personal interviews. The level of detail and context figuratively puts the reader in the aircraft as an observer, flying alongside a Spectre crew in combat. Above all, this is the story of Spectre—accurate, detailed, compelling, and unique.

*Night Hunters* William Pace Head,2014-03-18 In Night Hunters, air power historian William P. Head provides the first detailed study of the development and deployment of the AC-130 gunship. While other airframes and other types of close air support (CAS) and interdiction weapon systems preceded or flew with the AC-130s, this four-engine cargo airframe proved to be not only the longest serving fixed-wing gunship but also the most effective by far. During the Vietnam War, the US military developed new tactics and weapons systems to counter a diversity of enemy tactics and geographic features, the difficult climate, and the shifting diplomatic context. One of the most important was the development of the AC-130. Its ability to transport heavier payloads at higher altitudes across longer distances made it the logical choice to be the final Vietnam-era fixed-wing gunship and the only one that continues to fly missions in the twenty-first century. In addition, it employed many of the most advanced weapons, sensors, targeting devices, and fire control systems of the 1970s or of any era. By recounting both the technical development and the combat operations of the plane, and by looking at the proposed alternatives for its use in the War on Terror, Night Hunters offers a clear view of the role of gunships and of close air support in US wars. In today’s never-ending brushfire wars, the AC-130s continue to uphold their reputation for excellence.

*American Military Transport Aircraft Since 1925* E.R. Johnson,Lloyd S. Jones,2013-04-06 Without the support of airlift, the modern American military machine would be brought to a standstill. Since World War II—beginning with the Cold War and continuing up to the present day—the U.S. armed forces have come increasingly to rely upon airlift for mobility. The power to rapidly move and thereafter support a military operation—anywhere in the world, at any time—has become a foundational element of American defense policy. This work provides the reader with a comprehensive historical survey—including technical specifications, drawings, and photographs—of each type of fixed-wing aircraft used by U.S. military forces over a nearly 90-year period to carry out the airlift mission.

**Gunship 3** Prima Publishing Staff,2000-04-01 Gunship III is the third game in the award-winning Gunship series of helicopter Flight and Combat Simulations from MicroProse. Gunship III is a realistic aerial combat game where the player has the ability to fly a selection of the world's most advanced and deadly military helicopters. It will feature Instant Action play in single battle mode and dynamic missions in campaign mode. In single battle, players can fight pre-configured battles and replay historical and hypothetical conflicts. In the campaign, every dynamic mission is dictated by the player's demonstration of strategic mastery from the previous mission. Mission type and size of the enemy forces depend on the player's performance.

**Close Air Support In Vietnam** Ralph A Rowley,2013-04-12 This study traces the development of close air support tactics and operations in South Vietnam from 1961 through 1973. The early years (1961-64) witnessed the buildup of Farm Gate operations and introduction of the Tactical Air Control System (Barn Door). Tactics evolved for the 0-1 Bird Dog FAC and for such strike aircraft as the T-28 Trojan, B-26 Invader, and A-1E Skyraider. Ordnance problems were tackled and headway made. During the buildup (1965-68) the 0-2A Skymaster and OV-10 Bronco bolstered forward air control. Strike operations were strengthened by the F-100 Super

Sabre, B-57 Canberra, F-4 Phantom, F-5 Freedom Fighter, and A-37 Dragonfly. Gunships (the AC-47 Spooky, AC-130 Spectre, AC-119G Shadow, and AC-119K Stinger) also gave excellent assistance to group troops. Support of Special Forces commenced. Inroads were made on problems of coordination, command, and control of tactical air power. Tactics were further refined to meet the changing needs of close air support. In the final period (1969-73) the OV-10 acted as an armed FAC. The A-7 Corsair II entered the war. In 1973 the pullout of American troops began. Lastly, the study discusses the A-10 close air support aircraft.

**Ho Chi Minh Trail 1964-73** Peter E. Davies,2020-09-17 The Trails War formed a major part of the so-called 'secret war' in South East Asia, yet for complex political reasons, including the involvement of the CIA, it received far less coverage than campaigns like Rolling Thunder and Linebacker. Nevertheless, the campaign had a profound effect on the outcome of the war and on its perception in the USA. In the north, the Barrel Roll campaign was often operated by daring pilots flying obsolete aircraft, as in the early years, US forces were still flying antiquated piston-engined T-28 and A-26A aircraft. The campaign gave rise to countless heroic deeds by pilots like the Raven forward air controllers, operating from primitive airstrips in close contact with fierce enemy forces. USAF rescue services carried out extremely hazardous missions to recover aircrew who would otherwise have been swiftly executed by Pathet Lao forces, and reconnaissance pilots routinely risked their lives in solo, low-level mission over hostile territory. Further south, the Steel Tiger campaign was less covert. Arc Light B-52 strikes were flown frequently, and the fearsome AC-130 was introduced to cut the trails. At the same time, many thousands of North Vietnamese troops and civilians repeatedly made the long, arduous journey along the trail in trucks or, more often, pushing French bicycles laden with ammunition and rice. Under constant threat of air attack and enduring heavy losses, they devised extremely ingenious means of survival. The campaign to cut the trails endured for the entire Vietnam War but nothing more than partial success could ever be achieved by the USA. This illustrated title explores the fascinating history of this campaign, analysing the forces involved and explaining why the USA could never truly conquer the Ho Chi Minh trail.
