Food Chains and Food Webs in Aquatic Ecosystems Young-Seuk Park,Ihn-Sil Kwak,2021-02-22 Food webs describe the structure of communities and their energy flows, and they represent interactions between species in ecosystems. Recently, we have witnessed rapid development of techniques for both experimental studies and theoretical/computational studies on food webs as well as species interactions. This reprint book is focused on food chains and food webs in aquatic ecosystems, with seven papers published in the corresponding Special Issue of Applied Sciences. The topics include empirical studies on food chains and food webs as well as effects of environmental factors on organisms in aquatic ecosystems.

Varieties and Alternatives of Catching-up Yukihito Sato,Hajime Sato,2016-07-15 This book sheds new light on the advancement of various industries in developing Asian countries through an application and re-examination of catch-up industrialization theory. With contributors presenting their own perspectives on the progression of a range of different industries in Asia, this volume provokes readers to reconsider their current understanding of industrialization in latecomer countries. More specifically, the chapters discuss Taiwan's semiconductor industry, Korea's steel industry, and Malaysia's palm oil industry, amongst others. The authors also explore the 'catch-down' innovation strategy in China and India. Varieties and Alternatives of Catching-up provides a thorough analysis of the strategies employed by numerous Asian countries to radically transform their low-income agricultural economies to middle-income industrialized ones. This book is essential reading for researchers and scholars interested in Asian economic development.

Towards a Better Port Industry Peter W. de Langen,2020-04-02 *Towards a Better Port Industry* provides professionals in freight transport and maritime logistics, and specifically the port industry, as well as students in these fields, with a better conceptual understanding of the port industry. It includes key insights and best practices for port management and development, and an overview of new trends and developments relevant for developing winning strategies. After an introduction, Chapter 2 offers a new perspective on port governance, in which public interests, corporatization, state-ownership, and shareholder policies take a central role. Chapter 3 explains how new trends and developments affect port development and argues that assuming 'business as usual' often leads to major port development mistakes. Chapter 4 deals with port development and discusses all major port development challenges, including granting concessions, developing a port vision, crafting stakeholder support, choosing port performance indicators and creating a port innovation system. The final chapter deals with port development strategies and includes themes such as strategies of port development companies, pricing and business development. This book will broaden professionals' conceptual understanding of the ports industry, and provide insights on the latest developments in this area. For students, this book provides an industry-focused and non-technical 'essential reading' for gaining a deep understanding of the ports industry.

Critical Factors for Berth Productivity in Container Terminal Bo Lu,Shouyang Wang,2016-09-27 This book is a comparative study of the critical factors in berth productivity in Chinese and South Korean container terminals. It first defines the concept of berth productivity, and then establishes a regression model to evaluate the productivity factor. With the results obtained for the leading Asian container terminals it identifies the relationship between critical factors for berth productivity and their order of importance. The findings provide guidelines for terminal operators to improve berth productivity.

Analysis of Oceanic Waters and Sediments Thomas Roy Crompton,2016-02-24 The presence of concentrations of organic substances and cations in seawater is a matter of increasing concern to the water industry, environmentalists and the general public alike. It poses a threat of possible health hazards for humans, fish and crustacea. Until fairly recently, the analysis of seawater was limited to a number of major constituents such as chloride and alkalinity. Insufficient attention was given to the analysis of sediments. Analysis of Oceanic Waters and Sediments draws attention to the methods available for analysing sediments in seawater. It covers classical methods as well as the most advanced and recently introduced physical techniques. It also discusses the sensitivities and limitations of the methods. The book is comprised of two major components. The first is a review of the occurrence of organic compounds and cations as well as examples of pollution by these substances in the ocean. The second is concerned with determination of the concentrations of organic compounds and metals, including an in-depth examination of the most sensitive analytical methods that are available and necessary for detecting them due to their low concentrations in the ocean. A detailed exploration of the largely overlooked area of oceanic sediment analysis, this book is of high interest for all professionals in the water industry, from river management to fish industries, sewage effluent treatment and disposal, land drainage and water supply. Its scope also applies to agriculturalists, chemists, biologists, toxicologists, public health workers and public analysts.

Port Privatisation James Reveley,Malcolm T. Tull,2008-01-01 'This book is an excellent reference on the state of port reform throughout the Asia-Pacific region. While there have been a number of articles in recent years on port reform in Australia, China, Hong Kong, Korea and Singapore, much of the Asia-Pacific region has been overlooked. This book not only rectifies this gap by providing much needed insight into the situation in India, Japan, Malaysia, and New Zealand, while also consolidating the work already completed elsewhere. With the rise of Asia as the world's most important shipping and port market, the editors are to be commended for bringing new voices to the discussion and developing a strong contribution to the port reform and port governance literature.' - Mary R. Brooks, Dalhousie University, Canada
