**Smart Home Hacks** Gordon Meyer, 2004-10-25 So much of what is commonplace today was once considered impossible, or at least wishful thinking. Laser beams in the operating room, cars with built-in guidance systems, cell phones with email access. There's just no getting around the fact that technology always has, and always will be, very cool. But technology isn't only cool; it's also very smart. That's why one of the hottest technological trends nowadays is the creation of smart homes. At an increasing rate, people are turning their homes into state-of-the-art machines, complete with more switches, sensors, and actuators than you can shake a stick at. Whether you want to equip your home with motion detectors for added security, install computer-controlled lights for optimum convenience, or even mount an in-home web cam or two purely for entertainment, the world is now your oyster. Ah, but like anything highly technical, creating a smart home is typically easier said than done. Thankfully, Smart Home Hacks takes the guesswork out of the process. Through a seemingly unending array of valuable tips, tools, and techniques, Smart Home Hacks explains in clear detail how to use Mac, Windows, or Linux to achieve the automated home of your dreams. In no time, you'll learn how to turn a loose collection of sensors and switches into a well-automated and well-functioning home no matter what your technical level may be. Smart Home Hacks covers a litany of stand-alone and integrated smart home solutions designed to enhance safety, comfort, and convenience in new and existing homes. Kitchens, bedrooms, home offices, living rooms, and even bathrooms are all candidates for smart automation and therefore are all addressed in Smart Home Hacks. Intelligently written by engineering guru and George Jetson wannabe, Gordon Meyer, Smart Home Hacks leaves no stone unturned. From what to purchase to how to use your remote control, it's the ultimate guide to understanding and implementing complete or partial home automation.

*The Children of Abraham* Tate Wilson III,2012-06-04 Did God set into motion the delicate balance of the solar system? Did He with a spoken word explode the universe into life? And is it possible that in this great designs that He made with great care, others in His image? And more importantly would they have to look like mankind to be so? One could go to any freak show and see people that were born much different than us. Some have two bodies' that are connected at the head or the hip or chest. Are they in Gods image? Some are born with no arms or legs are they in Gods image? God is a spirit and they that worship Him must do so in spirit. Or so it's been said. Imagine if you will an innumerable amount of solar systems in this galaxy and an innumerable amount of galaxies in the universe. Einstein said himself that there was too much order in the universe, that it is not random enough not to be designed by a higher being. What if there are other beings with more legs or arms, or whole races that look like beast that walk upright what if they called themselves men and women? Are they more men or women than us? This is a work of fiction. We are here to ponder the idea.

**Raising A Happier Mother** Anna Mathur,2023-08-31 This isn't a parenting book. This isn't a guide to being a perfect parent (spoiler: they don't exist). This is a book about you. We can only anchor, nurture, nourish and instill confidence in our children when we extend the same support to ourselves. After all, how can we effectively tend to our children's needs when our energy reserves are depleted? How can we lead by example and teach our

children the importance of healthy self-esteem if we're struggling with these things yourself? There are a thousand and one ways to parent, and only one way that's authentic for you. Drawing on her work as a psychotherapist, alongside her own experiences as a mother, Anna shows that caring with our children begins with caring for ourselves, and it's time to replace exhaustion with empowerment. Far from being selfish, self-care is an essential quality of a good parent. The greatest gift you can give to your children, and yourself, is to give yourself permission to thrive.
