Marathon David A. Smith, 1982

Runner's World Run Less Run Faster Bill Pierce, Scott Murr, 2021-01-19 Finally, runners at all levels can improve their race times while training less, with the revolutionary Furman Institute of Running and Scientific Training (FIRST) program. Hailed by the Wall Street Journal and featured twice in six months in cover stories in Runner's World magazine, FIRST's unique training philosophy makes running easier and more accessible, limits overtraining and burnout, and substantially cuts the risk of injury, while producing faster race times. The key feature is the 3 plus 2 program, which each week consists of: -3 quality runs, including track repeats, the tempo run, and the long run, which are designed to work together to improve endurance, lactate-threshold running pace, and leg speed -2 aerobic cross-training workouts, such as swimming, rowing, or pedaling a stationary bike, which are designed to improve endurance while helping to avoid burnout With detailed training plans for 5K, 10K, half marathon, and marathon, plus tips for goal-setting, rest, recovery,

injury rehab and prevention, strength training, and nutrition, this program will change the way runners think about and train for competitive races. Amby Burfoot, Runner's World executive editor and Boston Marathon winner, calls the FIRST training program the most detailed, well-organized, and scientific training program for runners that I have ever seen.

Smart Marathon Training Jeff Horowitz, 2011-10-01 Old-school marathon training plans ask runners to crank out 70 to 100 miles a week. It's no wonder those who make it to the start line are running ragged. Smart Marathon Training maps out a healthier, more economical approach to training that emphasizes quality over quantity. With more than 75 detailed exercises plus six easy-to-follow training plans for half and full marathons, Smart Marathon Training will get you to the starting line feeling refreshed and ready to run your best race yet. This innovative program eliminates junk miles, paring down training to three essential runs per week and adding a dynamic strength and cross-training program to build overall fitness. Runners will train for their best performance in less time and avoid the injuries, overtraining, and burnout that come from running too much. Smart Marathon Training builds up a runner's body to resist injury. Runners gain the strength they need to run long using functional exercises that target the hips, glutes, and quads. Running is a full-body sport, so

this training program also builds a strong core and upper body to avoid injuries that begin above the waist. No one fakes a marathon or half-marathon--everyone has to do the work. But Smart Marathon Training replaces long, grinding miles with low-impact cross-training. Horowitz outlines a cycling plan to complement run workouts, boosting base fitness while saving runners' bodies for their best runs.

The Non-Runner's Marathon Trainer David A.

Whitsett, Forrest A. Dolgener, Tanjala Jo Kole, 1998-02-01 Athlete. Runner. Marathoner. Are these words you wouldn't exactly use to describe yourself? Do you consider yourself too old or too out of shape to run a marathon? But somewhere deep inside have you always admired the people who could reach down and come up with the mental and physical strength to complete such a daunting and rewarding accomplishment? It doesn't have to be somebody else crossing the finish line. You can be a marathoner. The Non-Runner's Marathon Trainer is based on the highly successful marathon class offered by the University of Northern Iowa, which was featured in a Runner's World article titled Marathoning 101. The class has been offered five times over 10 years, and all but one student finished the marathon. That is approximately 200 students -- all first time marathoners and many with absolutely no running background. This book follows the same 16-week, four-day-a-week workout plan. What makes the success rate of this program so much higher than any other? The special emphasis on the psychological aspects of endurance activities. You don't have to love to run -- you don't even have to like it -- but you have to realize that you are capable of more than you have ever thought possible. One participant in the program explained it like this: I'm doing this for me -- not for others or the time clock. I just feel better when I run, plus it helps me to cope with things in general. The skills we've learned in this class don't apply just to marathoning -- they apply to life! Just like you never know what the next step in a marathon will bring, so too, you never know

what will happen next in life. But if you don't keep going, you're never going to find out. By staying relaxed, centered, and positive you handle just about anything that comes your way. This is marathon running for real people, people with jobs and families and obligations outside of running. The Non-Runner's Marathon Trainer has proven successful for men and women of all ages. Now let it work for you.

Hansons Marathon Method Humphrey Luke,2012-11-27 In *Hansons Marathon Method*, the coaches of the Hansons-Brooks Distance Project reveal the methods they've used to turn their runners into race winners, national champions, and Olympians. *Hansons Marathon Method* offers a radical overhaul of marathon training that promises to turn any runner into a true marathoner and help experienced marathoners set new personal bests. *Hansons Marathon Method* does away with mega-long runs and high-mileage weekends--two outdated traditions that make most runners miserable. Instead, runners using the Hansons method will gradually build up to the moderate-high mileage required for marathon success, spreading those miles more sensibly throughout the week. Running easy days mixed with precisely paced speed, strength, and tempo workouts, runners will steel their bodies and minds to run the hardest miles of the marathon. Both Beginner and Advanced training programs feature the unique Hansons 16-mile long run which, as part of the Hansons program, is ideal for preparing the body for the marathon. Humphrey explains how runners should set their goal race pace and shows how to customize the Hansons method to their own needs, like adding extra racing, running more miles, and handling training interruptions. Detailed nutrition and hydration chapters help runners pinpoint their personal energy and hydration needs so they know precisely how much to eat and drink during workouts, race week, race day, and for recovery. The Hansons approach to pacing and nutrition means marathoners will never hit the wall. *Hansons Marathon Method* lays out the smartest marathon training program available from one of the most accomplished

running groups in the nation. Using this innovative approach, runners will mold real marathon muscles, train their body to never hit the wall, and prepare to run their fastest marathon.

First Marathons Gail Waesche Kislevitz, 2014-04-28 "Inspiring reading." —The Wall Street Journal "One of the scariest things about running a marathon for the first time isn't the distance, the muscle pain, the chafing, or the blisters. It's not knowing what's going to happen. That's why this disarmingly honest collection of first-time accounts is so refreshing." —Runner's World UK *First Marathons* is the collected stories of 37 runners, told in their own words, describing the experience of running their first marathon. Everything is covered, from the early flickerings of desire, all the way to full-blown obsession—the training, the food, the emotions, every mile of this incredible journey. *First Marathons* is the best instruction book you will ever find, because you learn from the heartfelt life experience of others. Illumination and inspiration are on every page. These runners are old and young, fat and thin, men and women. Some are famous (like Grete Waitz, Ted Corbitt, and Bill Rodgers), and others are just ordinary people—all of whom have achieved something truly extraordinary. Their collective message: anyone can run a marathon; everyone should. It will change your life forever.
