100 Words To Make You Sound Smart American Heritage Dictionaries,2006-10-04 Find the right words to make a point, seal the deal, or just keep folks listening! Chosen by the editors of the American Heritage Dictionaries, these words can help anyone who wants to be a more compelling communicator—as a worker, consumer, advocate, friend, dinner companion, or even romantic prospect. The book includes a colorful variety of words, including handy words of just one syllable (such as glib) and words derived from the names of famous people (such as Freudian slip and Machiavellian). There are expressions from popular culture (Catch-22) and words that date back to classical civilization (spartan and stoic). Each word is clearly defined and shown in context with quotations from magazines, newspapers, broadcast media, movies, and television. For many words, quotations from distinguished authors and speakers are also given and word histories are explained. 100 Words to Make You Sound Smart provides an enjoyable way to communicate more effectively, distinctively, and articulately.

The Obvious Flap Gary Barwin,Gregory Betts,2011 Poetry. Sometimes language, thoughts, and emotions are a fixed structure like a warehouse. Sometimes they are fog, waves, light, or music. This is LSE: Language as a second English. English as a grammar of ghosts. Words as the snowfall of ideas. THE OBVIOUS FLAP is a musical, poetic flux of recurring and recursive images that explore the luminous fringes of language. The text weaves a variety of thematic threads of humor, literary allusions, and narrative into a fabric that spreads into an open, proprioceptive linguistic environment. Gary Barwin and Gregory Betts have concocted a collaborative jam session for multiple larynxes and have made an obvious flap as they have fallen through the mirror into Plunderland.

Doctors, Ambassadors, Secretaries Douglas Biow,2002-07 In this book, Douglas Biow traces the role that humanists played in the development of professions and professionalism in Renaissance Italy, and vice versa. For instance, humanists were initially quite hostile to medicine, viewing it as poorly adapted to their program of study. They much preferred the secretarial profession, which they made their own throughout the Renaissance and eventually defined in treatises in the late sixteenth and early seventeenth centuries. Examining a wide range of treatises, poems, and other works that humanists wrote both as and about doctors, ambassadors, and secretaries, Biow shows how interactions with these professions forced humanists to make their studies relevant to their own times, uniting theory and practice in a way that strengthened humanism. His detailed analyses of

writings by familiar and lesser-known figures, from Petrarch, Machiavelli, and Tasso to Maggi, Fracastoro, and Barbaro, will especially interest students of Renaissance Italy, but also anyone concerned with the rise of professionalism during the early modern period.

The Medieval Hospital and Medical Practice Barbara S. Bowers, 2017-05-15 Using an innovative approach to evidence for the medieval hospital and medical practice, this collection of essays presents new research by leading international scholars in creating a holistic look at the hospital as an environment within a social and intellectual context. The research presented creates insights into practice, medicines, administration, foundation, regulation, patronage, theory, and spirituality. Looking at differing models of hospital administration between 13th century France and Spain, social context is explored. Seen from the perspective of the history of Knights of the Order of Saint Lazarus, and Order of the Temple, hospital and practice have a different emphasis. Extant medieval hospitals at Tonnerre and Winchester become the basis for exploring form and function in relation to health theory (spiritual and non-spiritual) as well as the influence of patronage and social context. In the case of the Ospedale Maggiore in Milan, this line of argument is taken further to demonstrate aspects of the building based on a concept of epidemiology. Evidence for the practice of medicine presented in these essays comes from a variety of sources and approaches such as remedy books, medical texts, recorded practice, and by making parallels with folk medicine. Archaeological evidence indicates both religious and non religious medical intervention while skeletal remains reveal both pathology and evidence of treatment.

The projects within demonstrate the increasingly significant role of user interfaces in both design and our everyday lives in the modern world.

The purpose of this book is to collect and compare different experiences of software visualisation both from fundamental and applied viewpoints. The book is divided into four parts, covering important aspects of software visualisation. Part 1 covers a survey on existing software visualisation tools and environments, the strategies for making a software visualisation system language independent, and program animation for C language. Part 2 presents topics and techniques on graph drawing, which supports efficient and aesthetically pleasing visualisation. Some recently developed graph drawing systems and techniques used are described. Part 3 discusses visual programming concepts and techniques for supporting parallel and heterogeneous distributed programming. Part 4 includes several case studies of software visualisation, concentrating on the broader field of software engineering ranging from software metrics to reverse engineering.
