Image Politics in the Middle East Lina Khatib,2012-10-22 Politics in the Middle East is now 'seen' and the image is playing a central part in processes of political struggle. This is the first book in the literature to engage directly with these changing ways of communicating politics in the region – and particularly with the politics of the image, its power as a political tool. Lina Khatib presents a cross-country examination of emerging trends in the use of visuals in political struggles in the Middle East, from the Cedar Revolution in Lebanon to the Green Movement in Iran, to the Arab Spring in Egypt, Syria and Libya. She demonstrates how states, activists, artists and people 'on the street' are making use of television, the social media and mobile phones, as well as non-electronic forms, including posters, cartoons, billboards and graffiti to convey and mediate political messages. She also draws attention to politics as a visual performance by leaders and citizens alike. With a particular focus on the visual dynamics of the Arab Spring, and based on case studies on the visual dimension of political protest as well as of political campaigning and image management by political parties and political leaders, *Image Politics in the Middle East* shows how visual expression is at the heart of political struggle in the Middle East today. It is a hard-hitting, enjoyable, groundbreaking book, challenging the traditional ways in which politics in the Middle East is conceived of and analysed.

Spoken Egyptian Arabic Samia Mehrez,1985 by Samia Mehrez of Cornell University. This course is primarily concerned with developing oral skills. The entire text is in transliteration; Arabic script is not used, so your attention is focused exclusively on mastering a new and intricate phonetic system. This program is designed to bridge the gap that exists between highly technical Arabic grammars, meant for the specialized student of Arabic, and simple phrasebooks of basic sentences that are unsatisfactory for the purpose of real communication. The course has been tested with a group of foreign engineers and business people in Cairo, and the recordings have been used successfully in the language laboratory with foreign university students.250-p. text.

The Arabic Translation and Commentary of Yefet ben 'Eli the Karaite on the Book of Esther Michael Wechsler,2008-06-30 In this volume is presented an edition, with translation and introduction, of the commentary on Esther—the first completely extant representative of this medieval Jewish genre—by Yefet ben ‘Eli ha-Levi, one of the preeminent littérateurs of the Karaite “Golden Age” (late-9th-11th centuries).

Sport, Politics and Society in the Arab World M. Amara,2011-11-24 This book explores the significance of sport in the understanding of past and current societal dynamics in the Arab world. It examines sport in relation to cultural, political and economic changes in the Arab World, including nation-state building, the formation of national identity and international relations in post-colonial context.

Modern Written Arabic – Student Text Volume One Fsi Arabic Language and Area School,2016-03-18 Modern Written Arabic – Student Text Volume One is part of the Modern Written Arabic. FSI Courses are language courses developed by the Foreign Service Institute and were primarily intended for US government employees.This courses are very intense to let a learner achieve proficiency as fast and as efficient as possible. Keep in mind that most of the courses were developed during the cold war area between 1960 and 1990 and the type set in this book is therefore not as accurate as you might expect.

Bilingual Writers and Corpus Analysis David M. Palfreyman,Nizar Habash,2022-12-23 This innovative volume is one of the first to represent the usage of bilingual writers in both their languages, offering insight into language corpora as extremely valuable tools in contemporary applied linguistics research, and in turn, into how much of the world’s population operate daily. This book discusses one of the first examples of a bilingual writer corpus, the Zayed Arabic-English Bilingual Undergraduate Corpus (ZAEBUC), which includes writing by hundreds of students in two languages, with additional information about the writers and the texts. The result is a rich resource for research in multilingual use and learning of language. The book takes the reader through the design and use of such a corpus and illustrates the potential of this type of corpus with detailed studies that show how assessment, vocabulary, and discourse work across two very different languages. This volume will be of interest to scholars, policymakers, and educators in bilingualism, plurilingualism, language education, corpus design, and natural language processing.

The Spirit of Democracy Larry Diamond,2008-01-08 One of America's preeminent experts on democracy charts the future prospects for freedom around the world in the aftermath of Iraq and deepening authoritarianism Over three decades, the world was transformed. In 1974, nearly three-quarters of all countries were dictatorships; today, more than half are democracies. Yet recent efforts to promote democracy have stumbled, and many democratic governments are faltering. In this bold and sweeping vision for advancing freedom around the world, social scientist Larry Diamond examines how and why democracy progresses. He demonstrates that the desire for democracy runs deep, even in very poor countries, and that seemingly entrenched regimes like Iran and China could become democracies within a generation. He also dissects the causes of the democratic recession in critical states, including the crime-infested oligarchy in Russia and the strong-armed populism of Venezuela. Diamond cautions that arrogance and inconsistency have undermined America's aspirations to promote democracy. To spur a renewed democratic boom, he urges vigorous support of good governance—the rule of law, security, protection of individual rights, and shared economic prosperity—and free civic organizations. Only then will the spirit of democracy be secured.

SMS Communication Louise-Amélie Cougnon,Cédrick Fairon,2014-07-15 The media often point an accusatory finger at new technologies; they suggest that there is always a loss of information or quality, or even that computer-mediated communication is destroying language. Most linguists, on the contrary, are firmly convinced that it is

better to consider language as an evolving and changing entity. From this point of view, language is a social tool that has to be studied in-depth through the prism of objectivity, as a process in motion which is influenced by new social and technological stakes, rather than as a fading organism. In this volume we study and describe the societal phenomenon of SMS writing in its full complexity. The aim of this volume is threefold: to present recent linguistic research in the field of SMS communication; to inform the reader about existing large SMS corpora and processing tools and, finally, to display the many linguistic aspects that can be studied via a corpus of text messages. These articles were previously published in *Lingvisticae Investigationes* Vol. 35:2 (2012).

Artificial Intelligence Technologies and Applications C. Chen,2024-02-15 Artificial Intelligence (AI) is rapidly becoming an inescapable part of modern life, and the fact that AI technologies and applications will inevitably bring about significant changes in many industries and economies worldwide means that this field of research is currently attracting great interest. This book presents the proceedings of ICAITA 2023, the 5th International Conference on Artificial Intelligence Technologies and Applications, held as a hybrid event from 30 June to 2 July 2023 in Changchun, China. The conference provided an international forum for academic communication between experts and scholars in the field of AI, promoting the interchange of scientific information between participants and establishing connections which may lead to collaboration, research, and development activities in related fields. The 126 papers included here were selected following a thorough review process and are divided into 4 sections, covering AI simulation and mechatronics; intelligent network architecture and system monitoring; intelligent algorithm modeling and numerical analysis; and intelligent graph recognition and information processing. Topics addressed include artificial neural networks, computational theories of learning, intelligent system architectures, pervasive computing and ambient intelligence, and fuzzy logic and methods. Covering a wide range of topics and applications current in AI research, the book will be of interest to all those working in the field.

Violence, Politics and Conflict Management in Africa Munyaradzi Mawere,Ngonidzashe Marongwe,2016-09-01 This volume critically interrogates, from different angles and dimensions, the resilience of conflict and violence into 21st century Africa. The demise of European colonial administration in Africa in the 1960s wielded fervent hope for enduring peace for the people of Africa. Regrettably, conflict alongside violence in all its dimensions physical, religious, political, psychological and structural remain unabated and occupy central stage in contemporary Africa. The resilience of conflict and violence on the continental scene invokes unsettling memories of the past while negatively influencing the present and future of crafting inclusive citizenship and statehood. The book provides fresh insightful ethnographic and intellectual material for rethinking violence and conflict, and for fostering long-lasting peace and political justice on the continent and beyond. With its penetrating focus on conflict and associated trajectories of violence in Africa, the book is an inestimable asset for conflict management practitioners, political scientists, historians, civil society activists and leaders in economics and politics as well as all those interested in the affairs of Africa.

Information Politics, Protests, and Human Rights in the Digital Age Mahmood Monshipouri,2016-06-09 We live in a highly complex and evolving world that requires a fuller and deeper understanding of how modern technological tools, ideas, practices, and institutions interact, and how different societies adjust themselves to emerging realities of the digital age. This book conveys such issues with a fresh perspective and in a systematic and coherent way. While many studies have explained in depth the change in the aftermath of the unrests and uprisings throughout the world, they rarely mentioned the need for constructing new human rights norms and standards. This edited collection provides a balanced conceptual framework to demonstrate not only the power of autonomous communication networks but also their limits and the increasing setbacks they encounter in different contexts.
