Next Generation Search Engines: Advanced Models for Information Retrieval Jouis, Christophe,2012-03-31 Recent technological progress in computer science, Web technologies, and the constantly evolving information available on the Internet has drastically changed the landscape of search and access to information. Current search engines employ advanced techniques involving machine learning, social networks, and semantic analysis. Next Generation Search Engines: Advanced Models for Information Retrieval is intended for scientists and decision-makers who wish to gain working knowledge about search in order to evaluate available solutions and to dialogue with software and data providers. The book aims to provide readers with a better idea of the new trends in applied research.

Asylum Determination in Europe Nick Gill,Anthony Good,2018-01-01 Drawing on new research material from ten European countries, Asylum Determination in Europe: Ethnographic Perspectives brings together a range of detailed accounts of the legal and bureaucratic processes by which asylum claims are decided.The book includes a legal overview of European asylum determination procedures, followed by sections on the diverse actors involved, the means by which they communicate, and the ways in which they make life and death decisions on a daily basis. It offers a contextually rich account that moves beyond doctrinal law to uncover the gaps and variances between formal policy and legislation, and law as actually practiced. The contributors employ a variety of disciplinary perspectives - sociological, anthropological, geographical and linguistic - but are united in their use of an ethnographic methodological approach. Through this lens, the book captures the confusion, improvisation, inconsistency, complexity and emotional turmoil inherent to the process of claiming asylum in Europe.

'Subordination' versus 'Coordination' in Sentence and Text Cathrine Fabricius-Hansen,Wiebke Ramm,2008-05-21 The papers collected in this volume (including a comprehensive introduction) investigate semantic and discourse-related aspects of subordination and coordination, in particular the relationship between subordination/coordination at the sentence level and subordination/coordination – or hierarchical/non-hierarchical organization – at the discourse level. The contributions in part I are concerned with central theoretical questions; part II consists of corpus-based cross-linguistic studies of clause combining and discourse structure, involving at least two of the languages English, German, Dutch, French and Norwegian; part III contains papers addressing specific – predominantly semantic – topics relating to German, English or French; and the papers in part IV approach the topic of subordination, coordination and rhetorical relations from a diachronic (Old Indic and Early Germanic) perspective. The book aims to contribute to a better understanding of information packaging on the sentence and text level related, within a particular language as well as cross-linguistically.

Wars, Plots and Scandals in Post-War France Philip M. Williams,1970-04-02 Williams explores the plots and scandals of that have affected both France and Algeria from the Algerian war.

A Feast of Words Michel Jeanneret,1991-10-08 The banquet gives rise to a special moment when thought and the senses—words and food—enhance each other. Throughout history, the ideal of the symposium has reconciled the angel and the beast in the human, renewing the interdependence between the mouth that speaks and the mouth that eats. Michel Jeanneret's lively book explores the paradigm of the banquet as a guide to significant tendencies in Renaissance Humanist culture and shows how this culture in turn illuminates the tensions between physical and mental pleasures. Ranging widely over French, Italian, German, and Latin texts, Jeanneret not only investigates the meal as a narrative artefact but enquires as well into aspects of sixteenth-century anthropology and aesthetics.

English Psalms in the Middle Ages, 1300-1450 Annie Sutherland,2015-02-19 English Psalms in the Middle Ages, 1300-1450 explores vernacular translation, adaptation, and paraphrase of the biblical psalms. Focussing on a wide and varied body of texts, it examines translations of the complete psalter as well as renditions of individual psalms and groups of psalms. Exploring who translated the psalms, and how and why they were translated, it also considers who read these texts and how and why they were read. Annie Sutherland foregrounds the centrality of the voice of David in the devotional landscape of the period, suggesting that the psalmist offered the prayerful, penitent Christian a uniquely articulate and emotive model of utterance before God. Examining the evidence of contemporary wills and testaments as well as manuscripts containing the translations, she highlights the popularity of the psalms among lay and religious readers, considering how, when, and by whom the translated psalms were used as well as thinking about who translated them and how and why they were translated. In investigating these and other areas, English Psalms in the Middle Ages, 1300-1450 raises questions about interactions between Latinity and vernacularity in the late Middle Ages and situates the translated psalms in a literary and theoretical context.

Advances in Automatic Text Summarization Inderjeet Mani,Mark T. Maybury,1999 ntil now there has been no state-of-the-art collection of themost important writings in automatic text summarization. This bookpresents the key developments in the field in an integrated frameworkand suggests future research areas. With the rapid growth of the World Wide Web and electronic information services, information is becoming available on-line at an incredible rate. One result is the oft-decried information overload. No one has time to read everything, yet we often have to make critical decisions based on what we are able to assimilate. The technology of automatic text summarization is

becoming indispensable for dealing with this problem. Text summarization is the process of distilling the most important information from a source to produce an abridged version for a particular user or task. Until now there has been no state-of-the-art collection of the most important writings in automatic text summarization. This book presents the key developments in the field in an integrated framework and suggests future research areas. The book is organized into six sections: Classical Approaches, Corpus-Based Approaches, Exploiting Discourse Structure, Knowledge-Rich Approaches, Evaluation Methods, and New Summarization Problem Areas. Henry V Kevin Ewert,2006-08-03 Focusing on stage directions, implied stage action in the dialogue, and on production choices available at key moments, this Handbook treats the script like a rehearsal in progress and encourages the imagining of a physical narrative where the play's meanings and our responses are shaped by staged actions.

Shakespeare's Plutarch Walter W. Skeat,2024-01-30 Reprint of the original, first published in 1875.

Repetition, Difference, and Knowledge in the Work of Samuel Beckett, Jacques Derrida, and Gilles Deleuze Sarah Gendron,2008 Repetition, Difference, and Knowledge dialogues with novels, theatre, philosophy, and literary theory in order to explore how three thinkers - Samuel Beckett, Jacques Derrida, and Gilles Deleuze - employ repetition as a means with which to radically unsettle some of the most fundamental notions of the human experience (among them, time, presence, originality, and being). Due to its interdisciplinary scope and its focus on repetition as an epistemological concept, this book will attract a broad audience of academic specialists across the humanities from the fields of literary criticism, philosophy, French studies, and poststructural studies. Its simplicity of style, deliberate avoidance of complex jargon, and clarity of argument - particularly when dealing with complicated theoretical ideas and texts - also makes it an invaluable tool for use in both graduate- and undergraduate-level literature and philosophy courses. Repetition, Difference, and Knowledge provides experienced and beginning scholars alike with greater insight into the works of Beckett, Derrida, and Deleuze and into the role that repetition has played and continues to play in determining how we read our world and come to meaning.

Winning the Next War Stephen Peter Rosen,1991 Rosen argues that armies and navies are not forever doomed to fight the last war. Rather, they are able to respond to shifts in the international strategic situation.

The Phraseology of Administrative French Wendy J. Anderson,2006 The French administrative language of the European Union is an emerging discourse: it is only fifty years old, and has its origins in the French administrative register of the middle of the twentieth century, but it is also a unique contact situation in which translation has always played a pivotal role. Using the methodology of corpus linguistics, and a specially compiled corpus of texts, covering a range of genres, this book describes the current discourse of EU French from the perspective of phraseology and collocational patterning, and in particular in comparison with its French national counterpart. Corpus methodology and an inclusive notion of phraseology, embracing typical formulae, locutions, and patterning around keywords, reveal subtleties and patterns which otherwise remain hidden, and point to a discourse of EU French whose novel context of production has led it to be phraseologically conservative, compared with the administrative French of France

The Furies Arno J. Mayer,2013-05-16 The great romance and fear of bloody revolution--strange blend of idealism and terror--have been superseded by blind faith in the bloodless expansion of human rights and global capitalism. Flying in the face of history, violence is dismissed as rare, immoral, and counterproductive. Arguing against this pervasive wishful thinking, the distinguished historian Arno J. Mayer revisits the two most tumultuous and influential revolutions of modern times: the French Revolution of 1789 and the Russian Revolution of 1917. Although these two upheavals arose in different environments, they followed similar courses. The thought and language of Enlightenment France were the glories of western civilization; those of tsarist Russia's intelligentsia were on its margins. Both revolutions began as revolts vowed to fight unreason, injustice, and inequality; both swept away old regimes and defied established religions in societies that were 85% peasant and illiterate; both entailed the terrifying return of repressed vengeance. Contrary to prevalent belief, Mayer argues, ideologies and personalities did not control events. Rather, the tide of violence overwhelmed the political actors who assumed power and were rudderless. Even the best plans could not stem the chaos that at once benefited and swallowed them. Mayer argues that we have ignored an essential part of all revolutions: the resistances to revolution, both domestic and foreign, which help fuel the spiral of terror. In his sweeping yet close comparison of the world's two transnational revolutions, Mayer follows their unfolding--from the French Declaration of the Rights of Man and the Bolshevik Declaration of the Rights of the Toiling and Exploited Masses; the escalation of the initial violence into the reign of terror of 1793-95 and of 1918-21; the dismemberment of the hegemonic churches and religion of both societies; the externalization of the terror through the Napoleonic wars; and its internalization in Soviet Russia in the form of Stalin's Terror in One Country. Making critical use of theory, old and new, Mayer breaks through unexamined assumptions and prevailing debates about the attributes of these particular revolutions to raise broader and more disturbing questions about the nature of revolutionary violence attending new foundations.

Preparing for the Next Financial Crisis Olivier de Bandt,Francoise Drumetz,Christian Pfister,2020-12-29 The ramifications of the Global Financial Crisis, which erupted in 2007, continue to surprise not only the general public but also finance professionals, economists, and journalists. Faced with this challenge, Preparing for the Next Financial Crisis goes back to basics. The authors ask: what do theory and empirical observations tell us about the causes and the consequences of financial crisis and instability? In what has become an increasingly complex financial world, what lessons can we learn from economic policies, which have been implemented, and research, which has developed extremely rapidly in recent years, so as not to repeat past mistakes? In this comprehensive review of the literature, which is both complete and balanced, the authors highlight the points of consensus among economists and policymakers. They assess the capacity of economic policies and institutions in limiting the cost of financial instability. In conclusion, they ask if the financial system has become safer, in the light especially of the Covid-19 Global Crisis. Ten years after the GFC crisis, this is a timely review of the reform agenda, the progress made, and the areas where further changes need to be made to address new risks and challenges.

The sentence printed at the top of p.14 is Duplicated in the middle of p.168 and bottom of p.544 within the Context of a 234,348 word text (see p.6 through 609 excluding the Three pages mentioned above). On p.544 the sentence Bleeds onto p.545. Todd Van Buskirk,2015-08-02 The Indiscernibility of Identicals is the principle that if two objects are absolutely identical then they must be indistinguishable from one another with respect to all of their properties. But does that include the context of the identical objects? The notion of identical gives rise to many philosophical problems, including: 1. What does it mean for an object to be the same as itself? 2. If x and y are identical (are the same thing), must they always be identical? Are they necessarily identical? 3. What does it mean for an object to be the same, if it changes over time? (Is apple the same as apple+1?) 4. If an object's parts are entirely replaced over time, in

what way is it the same?

Classical Learning in Britain, France, and the Dutch Republic, 1690-1750 Floris Verhaart,2020-06-11 For much of western history, the achievements of classical antiquity were seen as unsurpassable, and works by Latin and Greek authors were viewed as treasure troves of information still useful for contemporary society. By the late seventeenth century, however, the progress of scientific discoveries and the new paradigms of rationalism and empiricism meant the authority of the ancients was called into question. Those working on the classical past and its literature debated new ways of defending their relevance for society. The different approaches to classical literature defended in these debates explain how the writings of ancient Greece and Rome could become a vital part of eighteenth-century culture and political thinking. Floris Verhaart analyses these eighteenth-century debates about the value of classics, arguing that the Enlightenment, though often seen as an age of reason and modernity, in fact continuously sought inspiration from preceding traditions and ages such as Renaissance humanism and classical antiquity. The volume offers an interesting parallel with the modern day, in which the relationship between 'experts' and the general public has become the topic of debate and many academics, especially in the humanities, face pressure to explain how their work benefits society at large.

Memory and Community in Sixteenth-Century France Professor David P. LaGuardia,Professor Cathy Yandell,2015-03-28 Memory and Community in Sixteenth-Century France demonstrates that memory and community interacted constantly in sixteenth-century France, producing conceptual frames that defined the conflicting groups to which individuals belonged, and from which they derived their identities. Focusing on the period’s continuous reformulations of the present as it was related to the past, these essays examine memory as one of the intellectual foundations of the late French Renaissance and its distinct communities.
