The Measurement of Hate Crimes in America Frank S. Pezzella,Matthew D. Fetzer,2020-10-23 Using data from the Uniform Crime Reporting Hate Crime Statistics Program and the National Crime Victimization Survey, this brief highlights the uniqueness of hate or bias crime victimization. It compares these to non-bias crimes and delineates the situational circumstances that distinguish bias from non-bias offending. The nuances of under-reporting shed light on bias-group and victim reasons for not reporting. By examining measurement issues associated with data collection systems, this brief helps explain why eighty-nine percent of participating law enforcement agencies report zero hate crimes each year. It describes patterns and trends in reporting the volume of general bias motivations and specific bias types, as the most prevalent hate crime offense types and most likely victims and offenders. With recommendations to address issues in measurement and under-reporting, including an action plan by the Enhance the Response to Hate Crimes Advisory Committee and the International Association of Chiefs of Police, a best practice model by the Oak Creek Police Department, and other promising law enforcement reporting models, this brief provides an increasingly critical resource for law enforcement practitioners and researchers dealing with hate crimes.

Hate Crime Data Collection Guidelines and Training Manual Law Enforcement Law Enforcement Support Section,Crime Statistics Crime Statistics Management Unit,2016-08-18 This manual is intended to assist law enforcement agencies in reporting incidents of hate crime to the FBI Uniform Crime Reporting (UCR) Program. It addresses policy, the types of bias crime to be reported, how to identify a hate crime and guidelines for reporting hate crime. Since 1991, thousands of city, college and university, county, state, tribal, and federal law enforcement agencies have voluntarily participated in the hate crime data collection. It is the law enforcement officers within these agencies who investigate offenses, determine those motivated by bias, and report them as known hate crimes that have made crucial contributions to the success of the hate crime data collection. Without their continued support and participation

in identifying bias-motivated crimes, the FBI would be unable to annually publish Hate Crime Statistics. This partnership and, ultimately, this publication serve as the cornerstone in raising the nation's awareness about the occurrence of bias-motivated offenses.

Understanding Hate Crimes Carolyn Turpin-Petrosino,2015-03-27 Hate crimes and lesser acts of bigotry and intolerance are seen to be constants in today's world. Since 1990, the federal government has published annual reports on hate crime incidents in the United States. While the reported numbers are disturbing, even more devastating is the impact of these crimes on individuals, communities, and society. This comprehensive textbook can serve as a stand-alone source for instructors and students who study hate crimes and/or other related acts. It invites the reader to consider relevant social mores and practices as well as criminal justice policies as they relate to hate crimes by presenting this subject within a broad context.

Hate Crime Statutes Frank S. Pezzella,2016-07-28 □□□□□ This Brief provides a clearly outlined and accessible overview of the challenges in creating and enforcing hate crime legislation in the United States. As the author explains, while it is generally not controversial that hate crime behavior should be stopped, the question of how to do so effectively is complex. This volume begins with an introduction about defining hate crimes, and the history of hate crimes and hate crime legislation in the United States. The author shows arguments in favor of hate crime statutes, for example: hate crimes reach beyond their victims to members of the victims' protected group and cohesion of society at large, and should therefore carry higher penalties. The author also shows arguments against hate crime statutes, for example that they sometimes contain enhanced penalties for certain specially protected groups and not others, and have a high potential for ambiguity and uneven enforcement. From a law enforcement perspective, the author explores the practical challenges in enforcing these statutes, and solutions to address them. Investigative techniques and resources vary significantly across police departments, as does training to identify and distinguish hate crimes from ordinary crimes. There is high potential for law enforcement and prosecutors' personal biases to effect the classification of crimes as hate crimes. Law enforcement organizations are constantly faced with the dilemma of what and how to enforce legislation. This brief will be relevant for researchers in criminology and criminal justice, policy makers involved in hate crime legislation, social justice, and police-community relations, as well as related fields such as sociology, public policy and demography. □

Making Hate A Crime Valerie Jenness,Ryken Grattet,2001-08-15 Violence motivated by racism, anti-Semitism, misogyny, and homophobia weaves a tragic pattern throughout American history. Fueled by recent high-profile cases, hate crimes have achieved an unprecedented visibility. Only in the past twenty years, however, has this kind of violence—itsself as old as humankind—been specifically categorized and labeled as hate crime. Making

Hate a Crime is the first book to trace the emergence and development of hate crime as a concept, illustrating how it has become institutionalized as a social fact and analyzing its policy implications. In *Making Hate a Crime* Valerie Jenness and Ryken Grattet show how the concept of hate crime emerged and evolved over time, as it traversed the arenas of American politics, legislatures, courts, and law enforcement. In the process, violence against people of color, immigrants, Jews, gays and lesbians, women, and persons with disabilities has come to be understood as hate crime, while violence against other vulnerable victims—octogenarians, union members, the elderly, and police officers, for example—has not. The authors reveal the crucial role social movements played in the early formulation of hate crime policy, as well as the way state and federal politicians defined the content of hate crime statutes, how judges determined the constitutional validity of those statutes, and how law enforcement has begun to distinguish between hate crime and other crime. Hate crime took on different meanings as it moved from social movement concept to law enforcement practice. As a result, it not only acquired a deeper jurisprudential foundation but its scope of application has been restricted in some ways and broadened in others. *Making Hate a Crime* reveals how our current understanding of hate crime is a mix of political and legal interpretations at work in the American policymaking process. Jenness and Grattet provide an insightful examination of the birth of a new category in criminal justice: hate crime. Their findings have implications for emerging social problems such as school violence, television-induced violence, elder-abuse, as well as older ones like drunk driving, stalking, and sexual harassment. *Making Hate a Crime* presents a fresh perspective on how social problems and the policies devised in response develop over time.
