Urban Displacements Susanne Soederberg, 2020-12-31 With an eye to further our understanding of everyday life in global capitalism, *Urban Displacements* provides the first systemic critical political economy analysis of low-income rental housing and social dislocations, combining both theoretical advancements and detailed empirical studies, centering on Berlin, Dublin and Vienna. Soederberg pushes beyond dominant debates by treating low-rent housing as a unique commodity that provides a necessary place for the societal reproduction of labour power whilst being integrated into the global dynamics of capitalism. She argues that historical and geographical configurations of monetized governance, including landlords, employers and inter-scalar state practices, have served to reproduce urban displacements and obfuscate their gendered, class and racialized underpinnings. The outcome is the everyday facilitation and normalization of urban poverty and social marginalization on one side, and capital accumulation on the other. Building on Soederberg's previous book *Debtfare States and the Poverty Industry*, this accessible and interdisciplinary text will be useful to academics and students in political science, sociology, geography, urban studies, labour studies, European studies and gender studies.

FinTech in Germany Gregor Dorfleitner, Lars Hornuf, Matthias Schmitt, Martina Weber, 2017-03-17 This book focuses on market developments of crowdfunding, crowdinvesting, crowdlending, social trading, robo-advice, personal financial management, online payment and mobile payment in Germany. FinTech companies are an important driver of innovation in the financial industry. By making financial transactions more user-friendly and transparent, these firms potentially contribute to financial stability and economic growth. The authors define and categorize the different market segments that have emerged. They further provide an assessment of current market volumes and make forecasts for the next 5, 10 and 20 years. Particular attention is given to the empirical findings resulting from scholarly research. Furthermore, the authors evaluate how the German FinTech market ranks relative to international standards. This book will appeal to finance and entrepreneurship researchers as well as practitioners from banking and tech industries. "This book offers a fresh and fascinating look at the FinTech market. The authors provide a rigorous economic analysis of the FinTech market in Germany and offer many insights that are of interest to practitioners, academics, and policymakers alike." –Professor Douglas Cumming, Schulich School of Business "Germany is one of the fastest growing FinTech markets in Europe. This book not only provides a comprehensive and systematic overview on the developments and actors, but undertakes a visionary outlook on the forthcoming decades based on scientific methods." –Dr. Thomas Puschmann, Head of Swiss FinTech Innovation Lab

The Four Pillars of Investing: Lessons for Building a Winning Portfolio William J. Bernstein, 2010-07-08 The classic guide to constructing a solid portfolio—without a financial advisor! "With relatively little effort, you

can design and assemble an investment portfolio that, because of its wide diversification and minimal expenses, will prove superior to the most professionally managed accounts. Great intelligence and good luck are not required." William Bernstein's commonsense approach to portfolio construction has served investors well during the past turbulent decade—and it's what made *The Four Pillars of Investing* an instant classic when it was first published nearly a decade ago. This down-to-earth book lays out in easy-to-understand prose the four essential topics that every investor must master: the relationship of risk and reward, the history of the market, the psychology of the investor and the market, and the folly of taking financial advice from investment salespeople. Bernstein pulls back the curtain to reveal what really goes on in today's financial industry as he outlines a simple program for building wealth while controlling risk. Straightforward in its presentation and generous in its real-life examples, *The Four Pillars of Investing* presents a no-nonsense discussion of: The art and science of mixing different asset classes into an effective blend The dangers of actively picking stocks, as opposed to investing in the whole market Behavioral finance and how state of mind can adversely affect decision making Reasons the mutual fund and brokerage industries, rather than your partners, are often your most direct competitors Strategies for managing all of your assets—savings, 401(k)s, home equity—as one portfolio Investing is not a destination. It is a journey, and along the way are stockbrokers, journalists, and mutual fund companies whose interests are diametrically opposed to yours. More relevant today than ever, *The Four Pillars of Investing* shows you how to determine your own financial direction and assemble an investment program with the sole goal of building long-term wealth for you and your family.

Lehren, Lernen und Bilden in der deutschen Literatur des Mittelalters

Henrike Lähnemann, Nicola McLelland, Nine Miedema, 2017-09-11 Die Weitergabe von Wissen und Fertigkeiten ist ein Kernbereich mittelalterlicher Lebenswirklichkeit. Die deutsche Literatur kann dabei entscheidende Einblicke geben, wie sich das Feld des Lehrens, Lernens und Bildens vom 8. bis 16. Jahrhundert entwickelt. Theoriegeleitetes Wissen und praxisbezogene Handlungsanweisungen werden nicht nur in im engeren Sinne didaktischen Texten vermittelt. Lehrhaftes Sprechen und der Anspruch, lere und bilde zu bieten, ist ein Grundprinzip auch der erzählenden Texte, der Lyrik und der Spiele. Die hier versammelten Beiträge des XIII. Anglo-German Colloquium in Nottingham (2013) geben somit einen faszinierenden Einblick in das ganze Spektrum mittelalterlicher Wissensvermittlung im Spannungsfeld schriftlicher und mündlicher Traditionen.

Free Trade Agreements and Global Labour Governance Adrian Smith, James Harrison, Liam Campling, Ben Richardson, Mirela Barbu, 2020-09-07 Exploring the contentious relationship between trade and labour, this book looks at the impact of the EU's 'new generation' free trade agreements on workers. Drawing upon extensive original research, including over 200 interviews with key actors across the EU and its trading partners, it considers the effectiveness of the trade-labour linkage in an era of global value chains. The EU believes trade can work for all, claiming that labour provisions in its free trade agreements ensure that economic growth and high labour standards go hand-in-hand. Yet whether these actually make a difference to workers is strongly contested. This book explains why labour provisions have been profoundly limited in the EU's agreements with the CARIFORUM group, South Korea and Moldova. It also shows how the provisions were mismatched with the most pressing workplace concerns in the key export industries of sugar, automobiles and clothing, and how these concerns were exacerbated by the agreements' commercial provisions. This pioneering approach to studying the trade-labour linkage provides insights into key debates on the role of civil society in trade governance, the relationship between public and private labour regulation, and the progressive possibilities for trade policy in the twenty-first century. This book will appeal to research scholars, post-graduate students, trade policy practitioners, policy researchers allied to labour movements, and informed activists.
