The Planet Thieves Dan Krokos,2013-05-21 The Planet Thieves is the first thrilling installment of a new middle-grade series by Dan Krokos. Two weeks ago, thirteen-year-old Mason Stark and seventeen of his fellow cadets from the Academy for Earth Space Command boarded the SS Egypt. The trip was supposed to be a short routine voyage to log their required spacetime for summer quarter. But routine goes out the airlock when they're attacked by the Tremist, an alien race who have been at war with humanity for the last sixty years. With the captain and crew dead, injured, or taken prisoner, Mason and the cadets are all that's left to warn the ESC. And soon they find out exactly why the Tremist chose this ship to attack: the Egypt is carrying a weapon that could change the war forever. Now Mason will have to lead the cadets in a daring assault to take back the ship, rescue the survivors, and recover the weapon. Before there isn't a war left to fight. Re.evolution Guido Baechler,2015-07-08 In Toronto, 2032, the human race is all but extinct. Only a few humans have survived the Outbreak. Ewan, a former high school biology teacher, and his son Tim have made the Royal Ontario Museum their home, a last outpost of humanity. They are both haunted by the loss of their family who were savagely killed by the Creatures who now rule the Earth. Ewan has given up on having any kind of future for his son, but when they encounter another group of survivors he realizes they may have a chance against the Creatures. The survivors set out on an epic journey to find an antidote. But what they don't count on is a new, powerful force that has evolved from the ashes and is intent on exterminating humans all together.

Pilgrim at Tinker Creek Annie Dillard,2009-10-13 Winner of the Pulitzer Prize "The book is a form of meditation, written with headlong urgency, about seeing. . . . There is an ambition about her book that I like. . . . It is the ambition to feel." — Eudora Welty, New York Times Book Review Pilgrim at Tinker Creek is the story of a dramatic year in Virginia's Roanoke Valley, where Annie Dillard set out to chronicle incidents of beauty tangled in a rapture with violence. Dillard's personal narrative highlights one year's exploration on foot in the Virginia region through which Tinker Creek runs. In the summer, she stalks muskrats in the creek and contemplates wave mechanics; in the fall, she watches a monarch butterfly migration and dreams of Arctic caribou. She tries to con a coot; she collects pond water and examines it under a microscope. She unties a snake skin, witnesses a flood, and plays King of the Meadow with a field of grasshoppers. The result is an exhilarating tale of nature and its seasons.

A Tale Dark & Grimm Adam Gidwitz,2010-10-28 In this mischievous and utterly original debut, Hansel and Gretel walk out of their own story and into eight other classic Grimm-inspired tales. As readers follow the siblings through a forest brimming with menacing foes, they learn the true story behind (and beyond) the bread crumbs, edible houses, and outwitted witches. Fairy tales have never been more irreverent or subversive as Hansel and Gretel learn to take charge of their destinies and become the clever architects of their own happily ever after.

Viewpoints Marc Frantz,Annalisa Crannell,2011-07-05 An undergraduate textbook devoted exclusively to relationships between mathematics and art, Viewpoints is ideally suited for math-for-liberal-arts courses and mathematics courses for fine arts majors. The textbook contains a wide

variety of classroom-tested activities and problems, a series of essays by contemporary artists written especially for the book, and a plethora of pedagogical and learning opportunities for instructors and students. Viewpoints focuses on two mathematical areas: perspective related to drawing man-made forms and fractal geometry related to drawing natural forms. Investigating facets of the three-dimensional world in order to understand mathematical concepts behind the art, the textbook explores art topics including comic, anamorphic, and classical art, as well as photography, while presenting such mathematical ideas as proportion, ratio, self-similarity, exponents, and logarithms. Straightforward problems and rewarding solutions empower students to make accurate, sophisticated drawings. Personal essays and short biographies by contemporary artists are interspersed between chapters and are accompanied by images of their work. These fine artists--who include mathematicians and scientists--examine how mathematics influences their art. Accessible to students of all levels, Viewpoints encourages experimentation and collaboration, and captures the essence of artistic and mathematical creation and discovery. Classroom-tested activities and problem solving. Accessible problems that move beyond regular art school curriculum. Multiple solutions of varying difficulty and applicability. Appropriate for students of all mathematics and art levels. Original and exclusive essays by contemporary artists. Forthcoming: Instructor's manual (available only to teachers)

Little Stories of Your Life Laura Pashby,2021-10-14 Embrace the power of storytelling with *Little Stories of Your Life*. Start telling your own story, find your creative self and be more mindful. Combining the wellbeing benefits of mindfulness, creativity and daily photography, this book shows you how to use words and photographs to capture precious little moments and how to share these in order to connect with others. Each chapter explores the different ways you can tell your own stories, considers why you might choose to tell them and helps you to create a patchwork of tiny tales about your life, however small they might be. Throughout the book, Laura shares her own personal stories and research that shows you how to tune out of the bigger picture and focus on the everyday. There are exercises to gently guide you through how to journal and harness your inner creativity, as well as tips on improving your photography, photo challenges and writing prompts to get you started. It's easy to feel that our own lives are not enough, but real lives are not defined by bright, exciting events: we don't need a grand narrative arc. It's the stretches of time in between that matter, the tiny moments and the daily choices that make us who we are.

White Wolf Moon Mike G. Grant,2012-08-15 Jennifer MacAvoy was about to rip the lid off a secret, a secret that Evan Morris had buried forty years earlier. The journalism student needed one last assignment to complete her studies and this interview with the sixties poet/songwriter would prove to be the ultimate challenge. Evan had departed the music scene almost as quickly as he had arrived and she wanted to know why. At first terrified by his demeanor a determined Jennifer gradually peels away the façade. By sifting through his philosophical banter she unravels his story only to discover that indirectly she is a part of his secret. With her research now overshadowed by a more personal journey Jenn copes with the unnerving realization that she herself has been drawn into his world and heart. *White Wolf Moon* is a character-driven story set in Kamloops, British Columbia. Seen through the eyes of both the sixty-something poet/songwriter and the twenty-year-old student it takes a lighthearted approach to the philosophies and realities of days past and present. Containing serious interviews and wonderfully off-the-wall dialogue *White Wolf Moon* proves that sixty, like the Sixties, is just a state of mind.

SHEAVES Ludger Hovestadt,Vera Bühlmann,2013-10-09 “SHEAVES” will not describe anything. It will not judge. It will inspire. There are no continuous texts, but a wide range of topics. How to read this book? Take the notions seriously. Search the Internet and they will lose their generalness. They will begin to speak to you vividly. Bundle these riches with the riches of other notions and they will activate each other. Also take the pictures seriously. Photograph or scan them. Use them as an index, while searching the Internet. Again, you will find rich stories. Bundle those riches, concentrate them into new identities that are interesting to you. Let yourself be inspired by the intellectual wealth of our world. You can expand it. It is an exciting adventure, demanding and optimistic.
