HERmione Hilda Doolittle,1981-11-17 “H. D.'s wit, sense of rhythm, and control of language prove the inadequacy of the imagist label that is so often applied to this writer.” –Library Journal This autobiographical novel, an interior self-portrait of the poet H. D. (1886-1961) is what can best be described as a find,' a posthumous treasure. In writing HERmione, H.D. returned to a year in her life that was peculiarly blighted. She was in her early twenties—a disappointment to her father, an odd duckling to her mother, an importunate, overgrown, unincarnated entity that had no place... Waves to fight against, to fight against alone...'I am Hermione Gart, a failure'—she cried in her dementia, 'I am Her, Her, Her.' She had failed at Bryn Mawr, she felt hemmed in by her family, she did not yet know what she was going to do with her life. The return from Europe of the wild-haired George Lowndes (Ezra Pound) expanded her horizons but threatened her sense of self. An intense new friendship with Fayne Rabb (Frances Josepha Gregg), an odd girl who was, if not lesbian, then certainly of bisexual bent, brought an atmosphere that made her hold on everyday reality more tenuous. This stormy course led to mental breakdown, then to a turning point and a new beginning as her own true self, as Her”—the poet H.D. Perdita Schaffner, H.D.'s daughter, who can remember back to the time in 1927 when her mother was barricaded with her typewriter behind a locked door, working on this very novel, has provided a charming and telling introduction.

Pilgrim at Tinker Creek Annie Dillard,2009-10-13 Winner of the Pulitzer Prize “The book is a form of meditation, written with headlong urgency, about seeing. . . . There is an ambition about her book that I like. . . . It is the ambition to feel.” – Eudora Welty, New York Times Book Review Pilgrim at Tinker Creek is the story of a dramatic year in Virginia's Roanoke Valley, where Annie Dillard set out to chronicle incidents of beauty tangled in a rapture with violence. Dillard's personal narrative highlights one year's exploration on foot in the Virginia region through which Tinker Creek runs. In the summer, she stalks muskrats in the creek and contemplates wave mechanics; in the fall, she watches a monarch butterfly migration and dreams of Arctic caribou. She tries to con a coot; she collects pond water and examines it under a microscope. She unties a snake skin, witnesses a flood, and plays King of the Meadow with a field of grasshoppers. The result is an exhilarating tale of nature and its seasons.

Embodying Beauty Malin Pereira,2014-01-14 This study argues that twentieth-century American women writers' textual representations of female beauty generally recognize a link between beauty standards and aesthetic ideology, exploring female beauty as a symptom of prevailing ideas about art and

esthetics. Female beauty, in their texts, is not merely an issue of whether a female character is pretty or not; it is an expression of the controlling discourses negotiated by character, text, and author. In this study, therefore, the women writers' texts are read after interchapters outlining their key cultural and literary contexts. Revising Paul de Man's method of exploring scenes of reading, this study focuses on scenes of beauty in which a character, narrator, or speaker negotiates ideas about beauty. The author pairs Euro-American and African American women writers across the century in three generations: H.D. and Zora Neale Hurston; Gwendolyn Brooks and Sylvia Plath; and Toni Morrison and Louis Gluck. As such, this study offers a landmark black/white dialogue on female beauty in twentieth-century American culture and literature. Scenes of beauty in the texts of these writers suggest multiple feminine aesthetics in twentieth-century American writing, unified in their negotiation of the aesthetic ideologies embodied in female beauty.

Computer-Aided Analysis of Gastrointestinal Videos Jorge Bernal, Aymeric Histace, 2021-07-09 This book opens with an introduction to the main purpose and tasks of the GIANA challenge, as well as a summary and an analysis of the results and performance obtained by the 20 participating teams. The early and accurate diagnosis of gastrointestinal diseases is critical for increasing the chances of patient survival, and efficient screening is vital for locating precursor lesions. Video colonoscopy and wireless capsule endoscopy (WCE) are the gold-standard tools for colon and intestinal tract screening, respectively. Yet these tools still present some drawbacks, such as lesion miss rate, lack of in vivo diagnosis capabilities, and perforation risk. To mitigate these, computer-aided detection/diagnosis systems can play a key role in assisting clinicians in the different stages of the exploration. This book presents the latest, state-of-the-art approaches in this field, and also tackles the clinical considerations required to efficiently deploy these systems in the exploration room. The coverage draws upon results from the Gastrointestinal Image Analysis (GIANA) Challenge, part of the EndoVis satellite events of the conferences MICCAI 2017 and 2018. Each method proposed to address the different subtasks of the challenges is detailed in a separate chapter, offering a deep insight into this topic of interest for public health. This book appeals to researchers, practitioners, and lecturers spanning both the computer vision and gastroenterology communities.
