The Heart of Love Joshua Miller,2009-02 Love is the very nature of God. It is the essence of his sanctity. It is the something of his divinity that permeates our very existence. It is through him and in him that creation was given life By looking upon Christ we see the love of God. By accepting Christs nature, we come into the truth of that love. God is love. If this book doesnt change your mind, it will still change your heart. Amidst the toils and spoils of the world and the shadow cast by our many grievances, we often forget the joy of dwelling in simple love. Joshua Millers debut book, Heart of Love, explores the wisdom and virtue of being a person of love. Read about love. Love is in this book; it waits for you. This book is a destroyer, a creator, and a healer; for love is all of these. Love will destroy falsehood. It will heal old wounds. And it will create new worlds of goodness and possibility. Come to the siren song of love. Dance in its flow. Let your eyes meet its words. Let your heart embrace the light. This book, this little lantern, will shine into your heart. It will add to that light that is already in you, that transcendent light that pushes the darkness into oblivion. Interweaving unique poetic tones within his wisdom-filled study, Miller takes readers beyond simple surface acceptance and into the cavernous riches found within love. These words are for you. The prime nature of this book is love. It wakes you. It is alive with the spirit of love; may it resound in your soul as you read it.

Meditations of the Heart Howard Thurman,2023-01-31 “As poet, prophet, and priest, Thurman builds upon a powerful legacy of ancestral hope: belief in a liberating God who can always be found ‘in and among the struggling.’” —Yolanda Pierce A universal beacon of hope and endurance for people of all faiths seeking to meet the challenges, uncertainties, and joys of life Howard Thurman’s Meditations of the Heart is a beautiful collection of over 150 prayers, poems, and meditations on prayer, community, and the joys and rituals of life by one of our greatest spiritual leaders. Thurman, a spiritualist and mystic, was renowned for the quiet beauty of his reflections on humanity and our relationship with God. In a new foreword, Yolanda Pierce, dean of Howard University’s School of Divinity, calls attention to the justice-centered theological framework of Thurman’s words. Pierce notes how Thurman brings to light an image of God who can always be found “in and among the struggling,” both in times of weariness and in strength. First written for and shared with his congregation of the Church for the Fellowship of All Peoples in San Francisco, California, these meditations sustain, elevate, and inspire. They are a universal beacon of hope and endurance for people of all faiths seeking to meet the challenges, uncertainties, and joys of everyday life with a renewed and liberating faith.

Heart Beats of Ministry V. Indrenath Stanley,2008

Heart in Pilgrimage Jane Falloon,2014-03 The poet George Herbert was born in1593 and died just before his fortieth birthday in1633.While an undergraduate at Cambridge, he wrote to tell his mother that he had resolved that the poetry he wrote would always be 'consecrated to God's glory'. He wrote poetry throughout his life, but we only know of it now because, from his death bed, he sent the manuscript of the collection of his poems known as 'The Temple' to his friend Nicholas Ferrar of Little Gidding. He asked him 'to bring that piece into the world if he thought good of it, else to burn it.' Ferrar thought so highly of it that he said 'he could not sufficiently admire it, as a rich Jewell, and most worthy to be in the hands and hearts of all true Christians.' Within a few months of Herbert's death Ferrar had had the poems published, and thirteen new editions were published during the next seventy years. Today fewer people know Herbert's poetry. Jane Falloon has written 'Heart in Pilgrimage' because of her desire that it should be more widely read and appreciated by non-academic lovers of literature. New readers will be astonished by its accessibility: his sentiments and humour are so modern and immediate: they will find that poem after poem gives them a feeling of wonder, delight, recognition of genius, sheer happiness, and shock. She has chosen twenty four of her favourite poems, and has added to each of them her own appreciation and critical analysis, combining her own commentary with that of such distinguished Herbert scholars as Helen Vendler, Elizabeth Clarke, T.S.Eliot, Seamus Heaney, and Dr. Rowan Williams the Archbishop of Canterbury, to whom the book is dedicated. She has introduced this selection with chapters on the life of George Herbert, and also of his friend Nicholas Ferrar, without whose efforts these wonderful poems would have been lost to the world.

Healing from the Heart Mehmet C. Oz M.D.,Ron Arias,1999-10-01 Dr. Mehmet Oz, celebrated heart surgeon and co-founder of the Complementary Care Center at New York's Columbia-Presbyterian Hospital, is spearheading the health-care revolution that is yielding powerful new healing tools that will forever change the way we think of medicine. In this ground-breaking book, he describes his pioneering work--combining cutting-edge Western medicine with such Eastern techniques as acupuncture and chi-gong, as well as such controversial therapies as hypnosis, music, massage, reflexology, aromatherapy, and energy healing. The inspiring and affecting stories of his patients are the heart of this book--from the extraordinary discipline of Frank Torre, who used his professional sports training to psych himself into healing after heart transplant surgery, to the impossible recovery of blues great Johnny Copeland, who was roused from a seemingly impenetrable coma through the force of his own music. In recounting his patients' experiences, Dr. Oz forges a blueprint for the radical new medicine of the next millennium--drawing on the best from Eastern and Western therapies and empowering patients to become partners with doctors in promoting their own recovery.

The Heart in Rheumatic, Autoimmune and Inflammatory Diseases Udi Nussinovitch,2017-02-10 The prevalence of autoimmune diseases and rheumatic conditions is constantly increasing. Autoimmune diseases affect approximately 7-10% of the population of the United States, while more than 50,000,000 American adults suffer from some type of arthritis. The Heart in Rheumatic, Autoimmune and Inflammatory Diseases examines the complex mechanisms relating to cardiac diseases from a pathophysiological and clinical point of view. Autoimmune rheumatic diseases can affect the coronary vessels, myocardium, pericardium, heart valves and the conduction system. The diagnosis of these unique cardiac complications necessitates medical awareness and a high index of suspicion. Increased risk of advanced atherosclerosis plays a pivotal role in the development of cardiac diseases in systemic, rheumatic and autoimmune illnesses. Yet, other complex immune mediated mechanisms may contribute to the pathogenesis. Patients' optimal care requires coordination between the primary caregiver, the rheumatologist, immunologist and cardiologist. Screening for cardiovascular risk factors, recognition of high-risk patients and identification of subclinical cardiac conditions are of great importance. Moreover, regulation of inflammation, as well as abnormal immune responses and the initiation of early treatments should be the focus of patient management. A continuous attempt to identify novel therapeutic targets and change the natural history of the underlying disease and its cardiac manifestations is in progress. The book aims at providing the readers with a state of the art collection of up to date information regarding clinically important topics based on experts' perspectives. This book was a result of an extended coordinated collaboration of one-hundred and fifty-four distinguished scientists from thirty-one countries around the globe. A review of common, as well as unusual (yet clinically significant) medical cardiac complications of prevalent rheumatic, autoimmune and inflammatory diseases. Focuses on aspects of pathophysiological processes, clinical presentations, screening tests, prognostic implications and novel therapeutic approaches. Presents an up-to-date "level of evidence and "strengths of recommendations for suggested therapies and reviews all randomized

clinical trials, meta-analyses and other supporting published clinical findings.
