Greatest Hits Laura Barnett,2019-05-14 The creation of a greatest hits album gives a musician the chance to reflect on her storied life as a daughter, mother, singer, and lover. The beloved singer-songwriter Cass Wheeler has abandoned retirement for one last chapter in her musical career. She assembles an album of greatest hits—the songs that mean the most to her, songs that she wrote during the brightest and darkest times in her life. Each chapter springs from one of these songs. Told in tandem with the lyrics, this irresistible novel moves skillfully across episodes of a fascinating and sometimes tragic life—from Cass’s lonely childhood, through her freewheeling rise to fame, to first love and loss. Laura Barnett’s clear-eyed writing vividly depicts the British and US music scene of the ‘70s, with its mistakes and magic, and the lives that pass through it. By the time Cass has selected the final song, she is confronted with one last choice: whether she can find the strength within herself to open her heart once more. *Greatest Hits* is an enchanting novel that will capture and delight anyone who has discovered the rewards of music, or who has found strength and meaning in art. Perfect for fans of *Daisy Jones & the Six* *Praise for Greatest Hits* “This engaging, emotionally charged novel about music, motherhood and mental illness deserves to be a hit.” –The Observer (UK) “There is nothing here that hasn’t been covered in the more candid memoirs and autobiographies of stars from the 1960s and 1970s. But Barnett’s portrait is unusually perceptive, a mixture of evocative detail and sharp reportage that feels fresh to read. To her credit, too, she scrapes away the gloss to draw out a nuanced and honest account of the loneliness that plagues her singer. . . . Barnett pulls off the novel and its collaboration with pizzazz, turning it into a feat, not a gimmick.” –The Times (UK) “Unusually perceptive, a mixture of evocative detail and sharp reportage that feels fresh to read.” –The Sunday Times (UK)

Sustainable Forest Management Hubert Hasenauer,2006-03-29 There is a strong movement towards uneven-aged forest management based on the idea that such stands increase or at least maintain soil fertility, increase biodiversity, and improve stand resilience. This shift in forest management practice renders existing yield tables increasingly unreliable. Among potential alternatives are tree growth models, because they predict the growth of each tree within a forest stand. This book summarizes three years of work related to the topic, carried out as a joint effort of leading tree growth modellers across Europe together with forest companies. By means of nine specific examples it demonstrates the problem-solving potential of tree growth modeling theory as required by various end-user groups.

Renaissance Man Marc Shapiro,2018-05-10 Lin-Manuel Miranda created the Broadway hit-musical of the decade in Hamilton. His earlier production In The Heights set theater audiences dancing to a hip hop/ Latin beat. And if you have children or are a child at heart, you know all about the music of Moana. But there's a lot you don't know about this pop culture genius. Miranda's story is the classic American Dream on full display. The son of Puerto Rican immigrants, Miranda's life-long obsession with music, theater and the possibilities of creating for The Great White Way drove him through the ups and downs of the highly competitive world of Broadway and, through sheer drive, determination and an abundance of creative talent has made his way to the top of the entertainment world. Through extensive research in a number of widely divergent sources, Shapiro has pieced together the life and times of Lin-Manuel Miranda, replete with all the large and small moments that comprise the character of a literal creative renaissance man, composer, actor, culturally and socially savvy and multi-Tony-Award and Pulitzer Prize-winning giant of the Broadway stage whose future is only limited by his imagination which is always on the go and creating worlds to come Renaissance Man: The Lin Manuel Miranda Story is a blueprint for success, an inspirational guide to following one's dreams and, perhaps most important, the answer to the question of what following your dreams can bring.

Balancing Ecosystem Values ,2005 Balancing Ecosystem Values: Innovative Experiments for Sustainable Forestry is a compendium of more than 40 contributions from Asia, Europe, and North America. The theme encompasses experiments implemented at an operational scale to test ecological, social, or economic responses to silvicultural treatments designed to balance the complex set of objectives currently targeted in sustainable forest management. Several invited and plenary papers emphasize the variety of outcomes demanded by the public, as well as the essential role that these long-term studies will play in allowing natural resource managers to make better-informed, science-based decisions. A broad spectrum of silvicultural treatments and systems are covered, as are simulation runs with different types of models and discussion about design challenges for scaling up from stands to landscapes. Diverse forest ecosystems, stand structures and plant, animal, and fungal species are also considered. The conference included 2 days in the field where participants saw several types of the comprehensive field experiments firsthand. The conference concluded with a critique from state, private, and public land managers.
