**Don't Let Her See Me Cry** Helen Barnacle, 2012-09-01 This is the gutsy true story of a woman's remarkable journey from a hopeless young heroin addict facing a prison sentence with a newborn baby to a successful psychologist and mother and best friend to Ali - the daughter who gave her the courage and determination to survive. Sentenced to the longest drug-related prison term ever meted out to a woman in Victoria, the discovery that she was to become a mother was far from welcome news to Helen Barnacle. The irony was that this tiny helpless being gave her a new lease on life - and a reason to hope. Helen's love and devotion for baby Ali led to her winning an historic battle. In a landmark decision she became the first woman allowed to keep her baby in prison beyond her first birthday. But three years later Helen had to face every mother's worst nightmare and give up her daughter. While she knew the time had come for Ali to leave the prison for her own good, this did not make the decision any easier. Ali had become her reason for living. Handing her daughter over at the gates of the prison almost destroyed her. In utter despair she resumed her love affair with heroin and was on a hopeless path of destruction until she was caught using in prison. Her brother Ron, the only person who had stood by her, gave her an ultimatum-if she really loved Ali she had to stop thinking of herself and find the courage to live. Helen had first to overcome her lifelong addiction with heroin, a crutch she had relied in since her youth to overcome her feelings of worthlessness. Thanks to the support of staff at Fairlea's Education Centre the former musician began to rediscover her love of music and study classical music, as well as writing and performing her own work for the Fairlea Drama Group, which evolved into the highly acclaimed Somebody's Daughter Theatre group. Helen also began a Bachelor of Arts degree, majoring in psychology. After leaving prison 12 years ago, she completed her post-graduate studies in psychology and after two years supervision was employed as a psychologist specialising in drug and alcohol problems at TaskForce Community Agency in Prahran. Over the next six years she ran workshops for judges and magistrates, counselled both drug workers and addicts, presented papers for national and international seminars, wrote the drug education booklet 'Tentative Steps', and rose to position of Drug Program Director. She also established a pilot project in the Juvenile Justice System using drama and the arts as therapy with young offenders.

**K-art** Korean Culture and Information Service South Korea, Park Young Taek, 2014-01-31 This book seeks to help readers overseas gain a comprehensive understanding of Korean contemporary art by examining its various features and movements. Featured are the artists who have come to represent Korea since the modern concept of art was accepted, especially those active since the major expansion of Korean art overseas in the 2000s. **Chasing The Ghost: Nobelist Fred Reines And The Neutrino** Leonard A Cole, 2021-03-17 A mixture of memoir and biography, *Chasing the Ghost: Nobelist Fred Reines and the Neutrino* tells a deeply human story that appeals both to scientists and non-scientists. Although the book relates to the important discovery of neutrinos, it is more intimately about Fred Reines than the technical details of neutrino physics. Narrated in a fashion to interest and excite the reader, the science presented here is accessible to a broad audience. Coursing through Reines' life, his various challenges and encounters, the book reveals constants of his persona. Reines displayed a sustained consistency as a respected leader, admired by students and colleagues as a fount of big ideas and ambition. A continuing source of inspiration and motivation to others, his most basic consistency was his passion for science. The quest for knowledge about the wondrous universe is a profoundly human endeavor. Fred Reines' life and his unremitting scientific curiosity are emblematic of that truth. 'This book is a most welcome account about Frederick Reines and his great contributions to neutrino physics and astrophysics. The methods he designed in the 1950s to discover neutrinos in nuclear reactor experiments are still being used. His later work included the detection of atmospheric neutrinos which was a forerunner to the discovery of neutrino oscillations, the ability of neutrinos to change from one type to another. This finding was a significant step to other experiments that aim to answer profound questions about the nature of the universe including why it is composed of matter.' Takaaki Kajita Nobel Laureate in Physics Neutrino Researcher, University of Tokyo 'Cole has provided a compelling personal and scientific account of a remarkable pioneer in Neutrino Physics.' Arthur B McDonald Nobel Laureate in Physics Director of the Sudbury Neutrino Observatory Professor, Queen's University, Ontario, Canada
