A Leap Forward: Capacity Building, Education and India-Afghanistan

Cooperation ,2013-10-15 Since 2001, Afghanistan has provided New Delhi an opportunity to underline its role as a regional power. In the rapidly evolving geo-strategic scenario, India was forced to reconstitute and reassess its policies towards Afghanistan. India-Afghanistan Cooperation took a leap forward after the defeat of the Taliban and the installation of an Interim Authority. India's main focus has been to support the Afghan government and the political process in the country mandated under the Bonn Agreement of 2001. In the past decade, India pursued a policy of high-level engagement with Afghanistan through wide-ranging humanitarian, financial and infrastructural project assistance, as well as participation in international efforts aimed at political and economic rebuilding of Afghanistan. India has growing stakes in peace and stability in Afghanistan and the 2011 India-Afghanistan Strategic Partnership Agreement underlines India's commitment to ensure that a positive momentum in the Indo-Afghanistan ties in maintained. One of the foremost aims of India's involvement in Afghanistan has been to assist in building indigenous Afghan capacity and institutions which encompasses all the sectors of development. This book, apart from examining the changing trajectory of India's policy towards Afghanistan, focuses on two particular areas of Indian intervention in Afghanistan namely Capacity Building and Education. It also evaluates its importance in strengthening the Delhi-Kabul ties. Identification of factors that are aiding or blockading the smooth functioning of these policies, have been the purpose of this academic pursuit. Attempts have been made to reach out to the Afghan beneficiaries in both India and Afghanistan, in order to understand their perspectives, requirements and disgruntlements. This research underscores that the purpose behind India's involvement in Afghanistan should not be defeated and thereby attempts to put forward certain steps and directions that can be adopted by Indian Government in order to achieve long-lasting dividends by smooth implementation of India's aid disbursement policy. As US led North Atlantic Treaty Organization forces prepare to leave Afghanistan in 2014, India stands at a crossroads as it remains keen to preserve its interest in Afghanistan. This book apart from underlying ever-evolving Indian policy in Afghanistan provides concrete recommendations that can enhance the effectiveness of ongoing Indo-Afghanistan cooperation.

Aid Paradoxes in Afghanistan Nematullah Bizhan, 2017-08-14 The relationship between aid and state building is highly complex and the effects of aid on weak states depend on donors' interests, aid modalities and the recipient's pre-existing institutional and socio-political conditions. This book argues that, in the case of Afghanistan, the country inherited conditions that were not favourable for effective state building. Although some of the problems that emerged in the post-2001 state building process were predictable, the types of interventions that occurred—including an aid architecture which largely bypassed the state, the subordination of state building to the war on terror, and the short horizon policy choices of donors and the Afghan government—reduced the effectiveness of the aid and undermined effective state building. By examining how foreign aid affected state building in Afghanistan since the US militarily intervened in Afghanistan in late 2001 until the end of President Hamid Karzai's first term in 2009, this book reveals the dynamic and complex relations between the Afghan government and foreign donors in their efforts to rebuild state institutions. The work explores three key areas: how donors supported government reforms to improve the taxation system, how government reorganized the state's fiscal management system, and how aid dependency and aid distribution outside the government budget affected interactions between state and society. Given that external revenue in the form of tribute, subsidies and aid has shaped the characteristics of the state in Afghanistan since the mid-eighteenth century, this book situates state building in a historical context. This book will be invaluable for practitioners and anyone studying political economy, state building, international development and the politics of foreign aid.

America in Afghanistan Sharifullah Dorani, 2019-01-24 Afghanistan has been a theatre of civil and international conflict for much of the twentieth century – stability is essential if there is to be peace in the Greater Middle East. Yet policy-makers in the West often seem to forget the lessons learned from previous administrations, whose interventions have contributed to the instability in the region. Here, Sharifullah Dorani focuses on the process of decision-making, looking at which factors influenced American policy-makers in the build-up to its longest war, the Afghanistan War, and how reactions on the ground in Afghanistan have influenced events since then. *America in Afghanistan* is a new, full history of US foreign policy toward Afghanistan from Bush's 'War on Terror', to Obama's war of 'Countering Violent Extremism' to Trump's war against 'Radical Islamic Terrorism'. Dorani is fluent in Pashto and Dari and uses unique and unseen Afghan source-work, published here for the first time, to understand the people in Afghanistan itself, and to answer their unanswered questions about 'real' US Afghan goals, the reasons for US failures in Afghanistan, especially its inability to improve governance and stop Pakistan, Iran and Russia from supporting the insurgency in Afghanistan, and the reasons for the bewildering changes in US Afghan policy over the course of 16 and a half years. To that end the author also assesses Presidents Karzai and Ghani's responses to Bush, Obama and Trump's policies in Afghanistan and the region. In addition, the book covers the role Afghanistan's neighbours – Russia, Iran, India, and especially Pakistan – played in America's Afghanistan War. This will be an essential book for those interested in the future of the region, and

those who seek to understand its recent past.

War and State-Building in Afghanistan Scott Gates, Kaushik Roy, 2014-11-20 The Mughals, British and Soviets all failed to subjugate Afghanistan, failures which offer valuable lessons for today. Taking a long historical perspective from 1520 to 2012, this volume examines the Mughal, British, Soviet and NATO efforts in Afghanistan, drawing on new archives and a synthesis of previous counter-insurgency experiences. Special emphasis is given to ecology, terrain and logistics to explain sub-conventional operations and state-building in Afghanistan. *War and State-Building in Modern Afghanistan* provides an overall synthesis of British, Russian, American and NATO military activities in Afghanistan, which directly links past experiences to the current challenges. These timely essays are particularly relevant to contemporary debates about NATO's role in Afghanistan; do the war and state-building policies currently employed by NATO forces undercut or enhance a political solution? The essays in this volume introduce new historical perspectives on this debate, and will prove illuminating reading for students and scholars interested in military history, the history of warfare, international relations and comparative politics.

The State-Building Dilemma in Afghanistan Haqmal Daudzai, 2021-09-27 Nach fast zwei Jahrzehnten Krieg unterzeichnete die Trump-Regierung im Februar 2020 ein Abkommen mit den Taliban, wonach die Truppen der USA und ihrer NATO-Verbündeten Afghanistan innerhalb der nächsten Monate verlassen müssen. Dieses Abkommen ebnet auch den Weg für innerafghanische Gespräche zwischen der von den USA unterstützten Islamischen Republik Afghanistan und der militanten Gruppe der Taliban. Dieses Buch bietet einen kritischen Überblick über die militärische, friedens- und staatsbildende Interventionen der USA und der NATO seit 2001 in Afghanistan. Darüber hinaus stellt es auf der Grundlage gesammelter Feldinterviews die afghanische Wahrnehmung und den afghanischen Diskurs zu Themen wie Demokratie, Islam, Frauenrechte, formelle und informelle Regierungsführung, ethnische Teilung und die staatliche demokratische Regierungsgestaltung auf nationaler und subnationaler Ebene dar.

Building a New Afghanistan Robert I. Rotberg, 2007-08-29 In the wake of the Taliban nightmare, Afghanistan must tackle serious problems before it can emerge as a confident, independent nation. Security in this battered state continues to deteriorate; suicide bombings, convoy ambushes, and insurgent attacks are all too common. Effective state building will depend upon eliminating the national security crisis and enhancing the rule of law. This book offers a blueprint for moving the embattled nation toward greater democracy and prosperity. Robert Rotberg and his colleagues argue that the future success of state building in Afghanistan depends on lessening its dependence on opium and enhancing its economic status. Many of Afghanistan's security problems are related to poppy growing, opium and heroin production, and drug trafficking. *Building a New Afghanistan* suggests controversial new alternatives to immediate eradication, which is foolish and counter-productive. These options include monetary incentives for growing

wheat, a viable local crop. Greater wheat production would feed hungry Afghans while reducing narco-trafficking and the terror that comes with it. Integrating this land-locked country into the Central Asia or greater Eurasia economy would open up trading partnerships with its northern and western neighbors as well as with Pakistan, India, and possibly China. Developing a sense of common purpose among citizens would benefit the economy and could help to unite the nation. Perhaps most important, bolstering better governance in Afghanistan is necessary in order to eliminate chaos and corruption and enact nationwide reforms. Fresh and insightful, *Building a New Afghanistan* shows what the country's leadership and the international community should do to resolve dangerous issues and bolster a still fragile state. Contributors include Cindy Fazey (University of Liverpool), Ali Jalali (former minister of the interior, Afghanistan, and National Defense University), Hekmat Karzai (Centre for Conflict and Peace Studies, Afghanistan, and Institute of Defense and Strategic Studies, Singapore), Alistair J. McKechnie (World Bank Country Director for Afghanistan), Paula Newburg (Skidmore College), and S. Frederick Starr (Central Asia-Caucasus Institute and School of Advanced International Studies, Johns Hopkins University).

American Interests in South Asia Nicholas Burns and Jonathon Price, 2011-03-14 Aspen Policy Books is a series devoted to identifying and circulating critical new thinking on national security challenges. This book is a collection of papers commissioned for the 2010 Aspen Strategy Group workshop. This bipartisan, high-level examination of American interests in the region outlines geopolitical realities that challenge stability in the region and identifies policy strategies to confront them. The papers enclosed address such topics as the balance of power in South Asia, the US mission in Afghanistan, an evaluation of American foreign aid, relations between India and Pakistan, and an analysis of the future in this incredibly important region.

US Nation-Building in Afghanistan Conor Keane, 2016-03-31 Why has the US so dramatically failed in Afghanistan since 2001? Dominant explanations have ignored the bureaucratic divisions and personality conflicts inside the US state. This book rectifies this weakness in commentary on Afghanistan by exploring the significant role of these divisions in the US's difficulties in the country that meant the battle was virtually lost before it even began. The main objective of the book is to deepen readers understanding of the impact of bureaucratic politics on nation-building in Afghanistan, focusing primarily on the Bush Administration. It rejects the 'rational actor' model, according to which the US functions as a coherent, monolithic agent. Instead, internal divisions within the foreign policy bureaucracy are explored, to build up a picture of the internal tensions and contradictions that bedevilled US nation-building efforts. The book also contributes to the vexed issue of whether or not the US should engage in nation-building at all, and if so under what conditions.

We Are Afghan Women George W. Bush Institute, Laura Bush, 2017-03-07 *We Are Afghan Women* chronicles the lives of young and old, daughters and mothers, educated and those who are still learning. Their stories are a stark reminder that women's progress in society, business, and politics cannot be taken for granted. Many of these women face serious risks for speaking so openly, but they want the world to listen. Their words will change not only how we as Americans see Afghanistan but also how we understand the complex challenges still facing women and girls around the globe.
