Origami Tessellations Eric Gjerde,2008-12-18 Eric Gjerde demonstrates 25 of his favorite tessellations and turns them into projects for newcomers as well as experienced origamists. With step-by-step instructions, illustrated crease patterns, and how-to photos, you'll learn to create these wonderful designs yourself. Eric's first book covers the fundamentals of origami tessellations, provides history, and describes simple beginning techniques with detailed illustrations and photographs. An extensive gallery showcases tessellations folded by the world's leading origami fine artists---inspiring you to experiment, innovate, and eventually create your own unique designs.

Paper Cup Karen Campbell,2022-06-02 WATERSTONES SCOTTISH BOOK OF THE MONTH 'A truly original, brilliant novel' Daily Mail 'Very special indeed . . . your world will be a better place for reading this story' Joanna Cannon Everyone deserves a second chance. You just have to take the first step. Rocked by a terrible accident, homeless Kelly needs to escape the streets of Glasgow. Maybe she doesn't believe in serendipity, but a rare moment of kindness and a lost ring conspire to call her home, returning to the small town she fled so many years ago.

One Score in the Hexagon Peter G Emery,2019-04-10 The Hexagon (L'Hexagone), a name commonly used by the French to refer to their country, derives from its six-sided cartographic outline. In June 2000, my wife Jo and I bought a secondary residence in a little known Languedoc port called Marseillan. This book describes the evolution of our on-off visits to this region, as well as some of the town's local inhabitants and traditions, up to the time of our return to Australia in 2017. Trips to France, made by the author as a student of French in the 1950s/1960s, add up to the 'score' (of years) mentioned in the title. A chapter is included giving the author's selective 'take' on France and the French.

The Weeping Tide Amanda Foody,2023-01-31 Lore Keeper apprentice Barclay helps his teacher investigate a carnivorous algae bloom and its possible connection to recurring attacks by the Legendary Beast of the Sea.

The Asperkid's Game Plan Jennifer Cook,2014-04-21 The Asperkid's Game Plan looks from the inside at the learning style of children with Asperger syndrome and explains how to introduce structured play that engages Asperkids and explicitly addresses ASD weaknesses while reinforcing ASD strengths. Showing how just about anything can be turned into an opportunity for learning and growth, the book is full of go-to ideas for making simple play equipment in the home or classroom and using it to develop core skills that Asperkids struggle with, from fine motor and social skills, to planning and organization. Whether it's origami math, fried marbles, or a bug's eye view scavenger hunt, every game, project, and idea in the book is explained with clear directions and learning objectives and illustrated with color photographs. Jennifer O'Toole's enthusiastic approach and fun lessons, based on Montessori principles, will inspire and motivate parents, educators, and therapists to make purposeful play a part of every Asperkid's day.

Bubble Volcano Rosie Banks,2013-02-07 When mean Queen Malice puts a spell on King Merry, Ellie, Summer and Jasmine must find six magical ingredients to make a cure. They're soon off to Bubble Volcano to find the first ingredient. Can they find the hidden bubblebee hive and get the magic honeycomb they need to save King Merry?

Netherworld Robert K. G. Temple,2002 The extraordinary discovery of the Underworld of the ancient Greeks. We tend to think of ancient stories of visits to the Underworld by Odysseus, Orpheus and Aeneas as being poetic fictions, but Robert Temple shows here that in fact, the Ancients believed the Underworld to be a place that actually existed. It was maintained by a college of priests who would prepare, through ritual fasting, prayer, animal sacrifice, bathing and solitude, whoever wished to meet the shades of the dead. The candidate would then be led through the entrance to the Underworld, a dark, terrifying place, far underground, where after a series of ordeals and apparitions, they would finally meet with the ghosts of the dead. All these features recur in the ancient stories. Recently Robert Temple heard that a 1962 archaeological expedition had actually discovered the entrance in Italy. This is the amazing story of what he found when he was finally allowed to make his own descent into the Underworld - the River Styx, false doors, a snake pit and carved invocations to the Goddess of the Underworld, all revealed for the first time since ancient times.

Advances in Physical Agents II Luis M. Bergasa,Manuel Ocaña,Rafael Barea,Elena López-Guillén,Pedro Revenga,2020-11-02 The book reports on cutting-edge Artificial Intelligence (AI) theories and methods aimed at the control and coordination of agents acting and moving in a dynamic environment. It covers a wide range of topics relating to: autonomous navigation, localization and mapping; mobile and social robots; multiagent systems; human-robot interaction; perception systems; and deep-learning techniques applied to the robotics. Based on the 21st edition of the International Workshop of Physical Agents (WAF 2020), held virtually on November 19-20, 2020, from Alcalá de Henares, Madrid, Spain, this book offers a snapshot of the state-of-the-art in the field of physical agents, with a special emphasis on novel AI techniques in perception, navigation and human robot interaction for autonomous systems.

Bubbles 40 Gert G. Harigel,David Colley,Derek C. Colley,D. C. Cundy,Donald C. Cundy,1994

Universal Terrors, 1951-1955 Tom Weaver,David Schechter,Robert J. Kiss,2017-09-11 Universal Studios created the first cinematic universe of monsters--Dracula, Frankenstein, the Mummy and others became household names during the 1930s and 1940s. During the 1950s, more modern monsters were created for the Atomic Age, including one-eyed globes from outer space, mutants from the planet Metaluna, the Creature from the Black Lagoon, and the 100-foot high horror known as Tarantula. This over-the-top history is the definitive retrospective on Universal's horror and science fiction movies of 1951-1955. Standing as a sequel to Tom Weaver, Michael Brunas and John Brunas's Universal Horrors (Second Edition, 2007), it covers eight films: The Strange Door, The Black Castle, It Came from Outer Space, Creature from the Black Lagoon, This Island Earth, Revenge of the Creature, Cult of the Cobra and Tarantula. Each receives a richly detailed critical analysis, day-by-day production history, interviews with filmmakers, release information, an essay on the score, and many photographs, including rare behind-the-scenes shots.

Indomitable J. B. Garner,2014-09-01 Irene Roman never wanted to be a hero. She was a scientist living an otherwise normal life and that was enough. One fateful evening, though, Irene discovers a betrayal that undermines everything. One event that, in a literal blink of an eye, changes not only her life, but the future of the entire planet. Now the world is inhabited by people with powers and abilities far above those of mortal men and women. The repercussions of superhuman battles on the Earth are great and terrible as lives are shattered, communities destroyed, and mankind's destiny is plucked from its grasp. At the center of it all is Irene, who not only is one of two people on the planet who knows the cause of this unbelievable change, but is one of the few people who may be able to stop it. The only problem is the only other person who does know will do anything in his vast power to keep the world in its terrible altered state. Who dares to claim the right to choose humanity's fate? What price will Irene pay to be the hero she never wanted to be? In the end, will Earth return to the safety of the mundane or will it remain in the chaos of the superhuman and supernatural? Indomitable is the first book in The Push Chronicles and the debut novel of J.B. Garner. The tale of this altered Earth will continue late in 2014 with Indefatigable.

No Nails, No Lumber Jeffrey Head,2012-08-10 Imagine a house constructed in less than forty-eight hours, without using lumber or nails, that is more resistant to fire, earthquakes, and hurricanes than any traditionally built structure. This may sound like the latest development in prefab housing or green architecture, but the design dates back to 1941 when architect Wallace Neff (1895-1982) developed Airform construction as a solution to the global housing crisis. Best known for his elegant Spanish Colonial-revival estates in Southern California, Neff had a private passion for his dome-shaped bubble houses made of reinforced concrete cast in position

over an inflatable balloon. No Nails, No Lumber shows the beauty and versatility of Neff's design in new and vintage photography, previously unpublished illustrations, and archival material and ephemera.

Models Emily Abruzzo,2007 Models are an essential component of the architect's design process. As tools of translation, models assist the exploration of the possible and illustrate the actual. While models have traditionally served as representational and structural studies, they are increasingly being used to suggest and solve new spatial and structural configurations. Models, the eleventh volume of the highly regarded journal 306090, explores the role of the architectural model today in relation to the idea, the diagram, the technique, and the material. Models includes contributions from engineers, scientists, poets, painters, photographers, historians, urbanists, and architects both young and experienced.

On Growth and Form D'Arcy Wentworth Thompson,2018-01-01 It is not the biologist with an inkling of mathematics, but the skilled and learned mathematician who must ultimately deal with such problems as are merely sketched and adumbrated here. I pretend to no mathematical skill, but I have made what use I could of what tools I had; I have dealt with simple cases, and the mathematical methods which I have introduced are of the easiest and simplest kind. Elementary as they are, my book has not been written without the help—the indispensable help—of many friends. Like Mr Pope translating Homer, when I felt myself deficient I sought assistance! And the experience which Johnson attributed to Pope has been mine also, that men of learning did not refuse to help me.

POP! Kimberly Brubaker Bradley,2001-09-04 Bubbles What are bubbles made of? Why are they always round? Read and find out about the science behind soap bubbles, and learn why bubbles always go POP!
