Understanding Institutional Shareholder Activism

Bo Gong, 2013-12-13 Institutional shareholder participation has long been considered as vital to good corporate governance yet its potential does not seem to have been realized. The recent banking crisis exposed the passivity of some institutional shareholders, many of whom appear to have chosen to sell their stakes in the banks rather than intervene or challenge the board when they realized the strategies followed by the banks were excessively risky. Institutional shareholders' role to scrutinize and monitor the decisions of boards and executive management in the banking sector in the UK is considered by many to be a failure, resulting in the phenomenon of 'ownerless corporations', as described by Lord Myners. In China, despite the fast rising of institutional investment in the securities market, institutional shareholders have not yet played a contributory role in monitoring corporate managers in listed companies. Drawing on empirical evidence this book seeks to systematically analyse institutional shareholders' incentives to activism to explain when and why shareholder activism will occur. The book puts forward a model which explains the factors that determine institutional shareholders' propensity for activism. The model both elaborates the collective benefits of activism as a means of achieving managerial accountability asks whether and when shareholder activism is rational for any individual shareholder. The book then goes on to apply these findings to both the UK and China in order to explain the varying levels of shareholder activism in each jurisdiction. The book is the first to take an in-depth look at institutional shareholder activism in China providing prescriptions to promote greater shareholder engagement and exploring the potential it holds for

improving corporate governance in the region.

Energy Efficiency and Renewable Energy

Handbook D. Yogi Goswami, Frank Kreith, 2015-09-09 For the Movers, Shakers, and Policy Makers in Energy Engineering and Related Industries The latest version of a bestselling reference, Energy Efficiency and Renewable Energy Handbook, Second Edition covers the foremost trends and technologies in energy engineering today. This new edition contains the latest material on energy planning and policy, with a focus on renewable and sustainable energy sources. It also examines nuclear energy and its place in future energy systems, includes a chapter on natural gas, and provides extensive coverage of energy storage for numerous forms of energy generation. The text also provides energy supply, demand, and pricing factor projections for the future. Explore the Future of Global Energy The authors address problems that industry now faces, including the limited availability of conventional energy resources such as oil, natural gas, and coal, and considers renewable energies such as wind power, solar energy, and biomass. They also illustrate the economics of energy efficiency, discuss the financial energy policies of various countries, consider the role of energy conservation in energy strategies, and examine the future of renewable energy technologies to build a sustainable energy system. This book is divided into five sections, providing a comprehensive look at renewable energy technologies and systems: Global Energy Systems, Policy, and Economics Energy Generation through 2025 Energy Infrastructure and Storage Renewable Technologies Biomass Energy Systems Energy Efficiency and Renewable Energy Handbook, Second Edition focuses on the successful promotion of a sustainable energy supply for the future, and offers new and relevant information providing a clear reference to sustainable-

development goals.

Governance Innovation and Policy Change Nele

Noesselt, 2018-10-15 This edited volume undertakes a critical, theory-guided evaluation of reform policies and institutional change under Xi Jinping. Based on the empirical observations and findings, it proposes a fine-tuning of research frames to assess the multidimensional dynamics of governance recalibrations and the interplay between ideas and policy innovation.

Understanding China's Behaviour in the South

China Sea Klaus Heinrich Radtke, 2018-08-25 This book analyses the origins of security dilemmas in the South China Sea (SCS) and the significance of China's actions in asserting its claim from the perspective of defensive realist theory. In its analysis, the book argues that security dilemmas in the SCS first arose between China and other SCS claimants, and then between China and the United States. Research in this book provides significant support to the defensive realist theory vis-à-vis offensive realism. It encourages adopting a reassurance policy to reach a peaceful resolution to the SCS disputes between China, the other claimants, and the United States. The book will be useful for policymakers, academics, researchers and students.

Proceedings of the 2022 2nd International Conference on Economic Development and Business Culture (ICEDBC 2022) Yushi Jiang, Yuriy Shvets, Hrushikesh

Mallick, 2023-05-11 This is an open access book. With the support of universities and the research of AEIC Academic Exchange Center, The 2nd International Conference on Economic Development and Business Culture (ICEDBC

2022) will be held in Dali from June 24th to 26th. Compared with previous conferences, it will discuss more in-depth economic independent innovation, open cooperation and innovative business culture under the background of the new development stage, new situation and new journey era. There will be a broad exchange environment. Well-known experts, scholars or entrepreneurs in the field will be invited to make keynote reports. Contributing authors are also very welcome to actively participate in the conference and build an academic exchange ceremony.

Transforming Distressed Global Communities Fritz Wagner, Riad Mahayni, Andreas Piller, 2016-03-09 Many of our global cities are distressed and facing a host of issues: economic collapse in the face of rising expectations, social disintegration and civil unrest, and ecological degradation and the threats associated with climate change, including more frequent and more severe natural disasters. Our long-held assumptions about man and nature and how they interact are defunct. We realize now that we can no longer continue to build without addressing the long-term impacts of our actions and their spillovers. Energy and natural resources are finite. The way we configure economies has come into question. In the developed world, especially in the United States, infrastructure and the notions that underpin it are outdated. Meanwhile, the developing world is experiencing major, rapid transformations in lifestyles and economies that are affecting billions of people and requiring a whole new way of planning human settlements. Cities are the key to our future; they represent the most effective vehicle for positive advancements in the human condition and environmental change. This volume argues for the need to redesign and re-plan our cities in holistic ways that reflect our new understanding and relate to their diversity and multi-dimensionality. Presenting a range of

case studies from around the world, this volume examines how these distressed cities are dealing with these issues in planning for their future. Alongside these empirical chapters are philosophical essays that consider the future of distressed cities. Bringing together a team of leading scholars, United Nations agencies, non-governmental organizations, private consulting firms, international organizations and foundations, and policy officials, this volume provides a unique and comprehensive overview on how to transform distressed communities into more livable places.

Economic Lessons from China's Forty Years of Reform and Opening-up David Daokui Li, 2021-03-26 This book first shows that the past 40 years of China's economic reform and opening up represents the greatest magnitude of economic growth in history. Based on field trips, extensive and intensive interviews and literature surveys, this book argues that there are five general lessons for a rapid growing economy from China's economic reform and opening up, all in the area of the relationship between the government and the economy. First, the local governments need to be incentivized to help rapid entry and development of enterprises. Second, local governments need to be incentivized to help rapid land conversion from agricultural to non-agricultural. Third, financial deepening is vital; that is, inducing households to hold more and more financial assets in local currency. Financial deepening is essential to convert savings into investments. This requires financial stability, which is crucial. Fourth, the learning through opening up is the key to endogenous economic growth. The fundamental benefit of opening up is learning rather than enjoying comparative advantage. The fifth and final lesson from China is that the central government must proactively manage the macroeconomy. The rationale is

that enterprises compete with each other in games of industrial organization. In order to resolve this problem, proactive measures including market-oriented means, administrative orders and reform measures should be implemented. Overall, the main lesson from China's past 40 years of reform and opening up is that proper incentives and behavior of the government, local and central, are important for economic growth. China has been conducting reforms in this regard and as a result, the government more or less has been playing the role of a helping hand regarding economic growth, although China's economic system is far from perfect and many reforms are still needed.

Convergent Journalism Woody Bing Liu, 2021-06-28

Convergent Journalism is an online news system that uses a range of media and methods to collect and present information. With the advent and growth of the Internet, this form of news has been flourishing globally and has become the mainstream in China. In 2014, the Chinese Government established media convergence as a national strategy. This book offers a panoramic view of the theories and practice of Convergent Journalism in a Chinese media landscape. Drawing on a plethora of cases, the author introduces concepts, subjects, and processes, and elaborates on media components including text, visuals, audio, and video. In addition, he discusses the application of search engine optimization, hyperlinks in reporting, user interaction, and user creation of content. Aside from providing an in-depth theoretical analysis, the book provides much guidance for practitioners. Students, scholars, and professionals of communication studies, journalism, and media studies will benefit from this book.

The Dynamics of Risk Louise K. Comfort, 2019-06-25

Earthquakes are a huge global threat. In thirty-six countries,

severe seismic risks threaten populations and their increasingly interdependent systems of transportation, communication, energy, and finance. In this important book, Louise Comfort provides an unprecedented examination of how twelve communities in nine countries responded to destructive earthquakes between 1999 and 2015. And many of the book's lessons can also be applied to other large-scale risks. The Dynamics of Risk sets the global problem of seismic risk in the framework of complex adaptive systems to explore how the consequences of such events ripple across jurisdictions, communities, and organizations in complex societies, triggering unexpected alliances but also exposing social, economic, and legal gaps. The book assesses how the networks of organizations involved in response and recovery adapted and acted collectively after the twelve earthquakes it examines. It describes how advances in information technology enabled some communities to anticipate seismic risk better and to manage response and recovery operations more effectively, decreasing losses. Finally, the book shows why investing substantively in global information infrastructure would create shared awareness of seismic risk and make postdisaster relief more effective and less expensive. The result is a landmark study of how to improve the way we prepare for and respond to earthquakes and other disasters in our ever-more-complex world.

Clean Energy Systems in the Subsurface: Production, Storage and Conversion Michael Z. Hou, Heping Xie, Patrick Were, 2013-04-03 Anthropogenic greenhouse gas emissions, energy security and sustainability are three of the greatest contemporary global challenges today. This year the Sino-German Cooperation Group "Underground Storage of CO₂ and Energy", is meeting on the 21-23 May 2013 for the second time in

Goslar, Germany, to convene its 3rd Sino-German conference on the theme “Clean Energy Systems in the Subsurface: Production, Storage and Conversion”. This volume is a collection of diverse quality scientific works from different perspectives elucidating on the current developments in CO₂ geologic sequestration research to reduce greenhouse emissions including measures to monitor surface leakage, groundwater quality and the integrity of caprock, while ensuring a sufficient supply of clean energy. The contributions herein have been structured into 6 major thematic research themes: Integrated Energy and Environmental Utilization of Georeservoirs; Law, Risk Management & Monitoring CO₂ for Enhanced Gas and Oil Recovery, Coal Bedded Methane and Geothermal Systems Trapping Mechanisms and Multi-Barrier Sealing Systems for Long-Term CO₂ Storage Coupled THMC-Processes and Numerical Modelling Rock Mechanical Behaviour Considering Cyclic Loading, Dilatancy, Damage, Self-sealing and Healing Underground Storage and Supply of Energy “Clean energy systems in the subsurface” will be invaluable to researchers, scientists and experts in both academia and industry trying to find a long lasting solution to the problems of global climate change, energy security and sustainability.

China's Public Finance Shuanglin Lin, 2022-09-22 A comprehensive, up-to-date, insightful, and innovative masterpiece on the Chinese public finance has finally emerged to fill the gap in the field. Considering China's public finance in its entirety, from tax systems, government spending, infrastructure financing, fiscal policies, local government debt, and central-local fiscal relationships to urban and rural social security and healthcare, it analyses China's public finance reforms and examines the reasons and the consequences of these reforms. It explores the

challenges to China's public finance, examines its problems, and suggests potential solutions. While covering a broad range of themes, this book remains judicious with the evidence, providing its readers with innovative yet careful conclusions. Using enormous amount of the latest data and illustrative diagrams, the author explains China's public finance with expertise and clarity. This is an indispensable resource for students and scholars from a range of disciplines with an interest in the Chinese economy.

The Bishan Commune and the Practice of Socially Engaged Art in Rural China Mai Corlin, 2020-08-14 This book is concerned with socially engaged art projects in the Chinese countryside, with the artists and intellectuals who are involved, the villagers they meet and the local authorities with whom they negotiate. In recent years an increasing number of urban artists have turned towards the countryside in an attempt to revive rural areas perceived to be in a crisis. The vantage point of this book is the Bishan Commune. In 2010, Ou Ning drafted a notebook entitled Bishan Commune: How to Start Your Own Utopia. The notebook presents a utopian ideal of life based on anarchist Peter Kropotkin's idea of mutual aid. In 2011 the Commune was established in Bishan Village in Anhui Province. The main questions of this book thus revolve around how an anarchist, utopian community unfolds to the backdrop of the political, social and historical landscape of rural China, or more directly: How do you start your own utopia in the Chinese countryside?

The Institutional Evolution of China Fan Zhang, 2018-09-28 China's recent evolution is not only a story of extraordinary economic growth but also a story of great institutional change. Fan Zhang challenges traditional theory to explain the real origins of China's reform, the political and economic forces driving it, and the reasoning

behind its stagnation. The institutional re-arrangement of government and market has been crucial in this marketization process. Using a wealth of documents and cases, Zhang provides a detailed analysis of China's institutional changes over the past 40 years, focusing on the government-market relationship. A theoretical framework is presented to explain the targets and incentives of government and business firms in a bureaucratic-market system, which promoted economic growth, but also fostered corruption and resulted in a re-centralisation of the system. Using an index of marketization in China since 1978, Zhang shows that overall, market expansion has continued but with diminishing marginal gains. The government control of financial resources that had previously been relaxed in the early years of reform has been enhanced to some extent as a result of the changing institutional environment. Policy makers dealing with China-related policies, researchers and postgraduate students in political science, economics and Chinese studies will find this book a compelling exploration of the current and constant cooperation and conflict between government and market.

Conservation and Recreation in Protected Areas

Yun Ma, 2016-05-12 This book provides a comprehensive and up to date comparative study of the management and resolution of conflicts between conservation and recreation in protected areas in the US and China. Competing claims on the use of nature, increasing regulation of land use and recreational activities, and the conflicting goals between conservation and development have led to a rise in conflicts in the designation and management of protected areas. How to effectively manage and resolve these conflicts has become a challenge for both legislators and managers. By adopting an institutional dimension in legal interpretation,

this book critically examines how such conflicts are dealt with in the legal regimes of the US and China while exploring interactions between legislatures, agencies and courts. The book searches for a plausible solution to improve the legal framework of protected areas in China by emulating pertinent mechanisms developed in the US, whilst also presenting legal and policy recommendations to the US. This informative book will be useful for legal scholars in Chinese law, nature conservation law, administrative law and comparative law.

Regional Mutual Benefit and Win-win Under the Double Circulation of Global Value Wei Liu,Hui Zhang,2019-06-29 The book offers an in-depth research of the economic situations along the Belt and Road and the initiative's cooperation prospects, opportunities and challenges. It draws on economic data, including those on trade, investment, infrastructure, urban distribution, industrial cooperation, financial integration and revision of historical and political background. The Belt and Road initiative (BRI) comes from not only the ancient Silk Road, but also a long-term international cooperation between China and relevant countries. As a China-led initiative, the BRI is built upon China's international vision according to its development process. Therefore, the book also discusses how China balances its own development process among different domestic regions, and how the Initiative fits into the changes of global economic system and brings positive change for developing and developed economies involved, on the long haul. Furthermore, this book aims to find out precise direction of the initiative in order to assess appropriate implication on development under current globalization and provide valuable experience for future economic synergetic development by reviewing the past cooperative experience as references for policy-making and

prospective engagement. In terms of methodology, analyses were conducted applying multi-methods with best available evidence to enrich the understanding of the potential of the BRI in terms of socio-economic impact on cooperation and difference and similarities of economic, cultural characteristics and political system among countries.

Government Intervention in the Reorganisation of Listed Companies in China 曹建, 2020-01-02 Discusses the nature, extent and appropriateness of government intervention in the bankruptcy of listed companies in China.

2014 Li Yuming, Li Wei, 2019-09-23 China, with the world's largest population, numerous ethnic groups and vast geographical space, is also rich in languages. Since 2006, China's State Language Commission has been publishing annual reports on what is called language life in China. These reports cover language policy and planning initiatives at the national, provincial and local levels, new trends in language use in a variety of social domains, and major events concerning languages in mainland China, Hong Kong, Macau and Taiwan. Now for the first time, these reports are available in English for anyone interested in Chinese language and linguistics, China's language, education and social policies, as well as everyday language use among the ordinary people in China. The invaluable data contained in these reports provide an essential reference to researchers, professionals, policy makers, and China watchers.

Handbook on Human Rights in China Sarah Biddulph, Joshua Rosenzweig, 2019 This Handbook gives a wide-ranging account of the theory and practice of human rights in China, viewed against international standards, and China's international engagements around human rights. The Handbook is organised into the following sections: contested meanings; international dimensions; economic

and social rights; civil and political rights; rights in/action and access to justice; political dimensions of human rights in Greater China; and new frontiers.

Dragons in Diamond Village David

Bandurski, 2016-10-25 "David Bandurski is a modern-day Marco Polo taking us into the heart of new China." —Kevin Sites, author of *In the Hot Zone* China's explosive modernization has led to a unique phenomenon: voraciously-growing cities absorbing formerly distant villages that become tenement communities. *Dragons in Diamond Village* is about the plight—and the courage—of the village-dwellers caught in this tide of urbanization: Huang Minpeng, a semi-literate farmer turned self-taught rights defender; He Jiuling, a suburban housewife who just wanted to open a hair salon; and villagers like Lu Zhaohui who refuse to give up the land their families have cultivated for generations. It is, in short, a stirring tale -- a community of unlikely activists, they are fighting for identity, justice, and their rightful place in China's new cities. Behind them stand millions of others who exist in the strange limbo of the urban village. Because their villages stand on invaluable tracts of land—vulnerable to the machinations of corrupt local officials—their homes have become a battleground in the war over China's urban future.
