Smartphone Smart Marketing Robb Wallace, 2021-01-01 It is time to become the content creator and marketer you always dreamed of being? If you have a smartphone, then you are ready to create and build an audience for your brand or business. You have the technology and this book will give you the knowledge and practical skills to use it. Smartphone Smart Marketing is the follow-up book to the successful title Smartphone Media Production. It is written by award-winning filmmaker, professional digital marketer and content creator Robb Wallace. Robb has over sixteen years of experience in the field as well as an award-winning degree in Broadcast Production. In 2016 Smartphone Media Production showed its readers how to plan, capture, edit and distribute content (branded photography, audio, video and live streams) with only their phones. In this updated and fully revised version, Robb is back with even more great content including chapters on content marketing, social media channels and social media strategies. Who is this book for? It is for people who; Don't know how to create content to market their brand. Don't have the funds for a marketing manager but are willing to put in the hard work and learn the skills. Don't have a big budget for expensive things like promo videos, marketing images, social media campaigns. Don't know where to start when launching a new business or product. Have tried and failed to create engaging content for social media and are looking for a guide. Aspire to be a social media influencer. Wish to enter employment as a marketing professional. Interested in digital marketing. Need real-world digital skills to grow their business. Are interested in entrepreneurial skills. Are looking to create better images, videos or live streams. The book includes cheat guides, best apps, worked examples and more. Let's get to work, buy your copy, grab your phone, it's time to leave the competition behind. Acclaim for Smartphone Media Production from 2016 "Received! Dove in - Liked what I saw! Really useful stuff". Peter Shankman "This book is fantastic and would highly recommend it for anyone starting to get into making videos on their phone." Stewart Richardson professional photographer. "This book has helped me increase my understanding and develop some really good strategies on maximising the use of smartphones and social media in a variety of ways, from personal use through to improving business reach. Excellent stuff!" Amazon. "So impressed I hired him" Peter Syme adventure specialist and business owner. "As a self-employed business owner, keeping up with changes in technology can be overwhelming, I found this book full of great information, presented in a clear and practical way – full of advice and resources to keep you on your toes." Chris Wain Unique Adventure Tours Scotland. "I am a gent of a certain age and have had to embrace technology and the Internet as an adult and not something that I have grown up with or was taught at school. I run a Facebook page and a small stall making and selling custom props and toys and wanted to take things to the next level and having no experience in media production this sounded perfect. From my perspective the book is full of all the basic information I needed to get started making the most of my Facebook page and filming video, taking photographs and getting them out there on social media to get the most impact. Then the book is also full of everything else needed to take things even further, how to follow up on the social media interest and even loads of information coming from a business point of view which I'm sure I will use down the line as I take things further. Overall this book had everything I needed to get me up and running on social media, producing what I feel is way better quality content than I could have ever imagined I was capable of and all with a single piece of hardware, my Smartphone, it's amazing." Big Al Monkeytron Collective.

Surviving and Thriving in Postgraduate Research Ray Cooksey, Gael McDonald, 2019-06-27 This handbook provides an in-depth exploration of the entire journey of postgraduate research in the social and behavioural sciences, from enrolment to its culmination in the form of a thesis, dissertation or portfolio, and beyond. It is written in an accessible and example-rich style, offering practical and concrete advice in virtually all areas. It also includes references to additional resources and websites, and each chapter features key recommendations for improving the postgraduate research experience. The book addresses not only research-related aspects (e.g. supervisors; selecting your guiding assumptions; contextualising, framing and configuring research; reviewing literature; sampling; writing proposals; ethics and academic integrity; selecting a data gathering strategy; surviving your thesis/dissertation/portfolio examination; and publishing), but also questions concerning how to integrate, manage, and balance the research journey in the context of the postgraduate student's broader life-world (e.g. skill development and supervisor relations; effective time and project management; a healthy work-life balance; maintaining motivation; and dealing with criticism). The book adopts an explicitly pluralist perspective on postgraduate research, moving beyond mixed methods thinking, and offers concrete examples from postgraduate students' real-world experiences.

The Handbook of Technology and Second Language Teaching and Learning presents a comprehensive exploration of the impact of technology on the field of second language learning. The rapidly evolving language-technology interface has propelled dramatic changes in, and increased opportunities for, second language teaching and learning. Its influence has been felt no less keenly in the approaches and methods of assessing learners' language and researching language teaching and learning. Contributions from a team of international scholars make up the Handbook consisting of four parts: language teaching and learning through technology; the technology-pedagogy interface; technology for L2 assessment; and research and development of technology for language learning. It considers how technology assists in all areas of language development, the emergence of pedagogy at the intersection of language and technology, technology in language assessment, and major research issues in research and development of technologies for language learning. It covers all aspects of language including grammar, vocabulary, reading, writing, listening, speaking, pragmatics, and intercultural learning, as well as new pedagogical and assessment approaches, and new ways of conceiving and conducting research and development. The Power Of Positive Thinking Norman Vincent Peale, 2021-01-01 THIS BOOK IS WRITTEN to suggest techniques and to give examples which demonstrate that you do not need to be defeated by anything, that you can have peace of mind, improved health, and a never ceasing flow of energy. In short, that your life can be full of joy and satisfaction. Of this I have no doubt at all for I have watched countless persons learn and apply a system of simple procedures that has brought about the foregoing benefits in their lives. These assertions, which may appear extravagant, are based on bona fide demonstrations in actual human experience.
