The World, the Text, and the Critic Edward W. Said,1983 Said demonstrates that critical discourse has been strengthened by the writings of Derrida and Foucault and by influences like Marxism, structuralism, linguistics, and psychoanalysis. But, he argues, these forces have compelled literature to meet the requirements of a theory or system, ignoring complex affiliations binding the texts to the world.

The Stanzas on Vibration ,1992-09-30 In his Doctrine of Vibration, the author presents a synthesis of Kashmir Shaivism—an overview with Spanda as the central theme. Spanda is the vibratory dynamism of the absolute consciousness. In this book the author focuses on the school of Kashmir Shaivism that presents this doctrine as its cardinal principle and whose literature consists essentially of the works translated here. In his Introduction and in his exposition of the four commentaries, the author shows both how the Spanda tradition contributes to the other schools of Kashmir Shaivism and how it is different from them. He presents for the first time a detailed treatment of this tradition and an analysis of its development. The aim is to offer a method that affords access by the general reader to the wonderful world of the Spanda Yogi through which she travels to the liberating realization of her authentic identity vibrant with the vitality of the universal pulse of Shiva.

Transforming the Workforce for Children Birth Through Age 8 National Research Council,Institute of Medicine,Board on Children, Youth, and Families,Committee on the Science of Children Birth to Age 8: Deepening and Broadening the Foundation for Success,2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

How to Read a Folktale Lee Haring,2013-10-24 How to Read a Folktale offers the first English translation of Ibonia, a spellbinding tale of old Madagascar. Ibonia is a folktale on epic scale. Much of its plot sounds familiar: a powerful royal hero attempts to rescue his betrothed from an evil adversary and, after a series of tests and duels, he and his lover are joyfully united with a marriage that affirms the royal lineage. These fairytale elements link Ibonia with European folktales, but the tale is still very much a product of Madagascar. It contains African-style praise poetry for the hero; it presents Indonesian-style riddles and poems; and it inflates the form of folktale into epic proportions. Recorded when the Malagasy people were experiencing European contact for the first time, Ibonia proclaims the power of the ancestors against the foreigner. Through Ibonia, Lee Haring expertly helps readers to understand the very nature of folktales. His definitive translation, originally published in 1994, has now been fully revised to emphasize its poetic qualities, while his new introduction and detailed notes give insight into the fascinating imagination and symbols of the Malagasy. Haring's research connects this exotic narrative with fundamental questions not only of anthropology but also of literary criticism.

Global Trends 2030 National Intelligence Council,2018-02-07 This important report, Global Trends 2030-Alternative Worlds, released in 2012 by the U.S. National Intelligence Council, describes megatrends and potential game changers for the next decades. Among the megatrends, it analyzes: - increased individual empowerment - the diffusion of power among states and the ascent of a networked multi-polar world - a world's population growing to 8.3 billion people, of which sixty percent will live in urbanized areas, and surging cross-border migration - expanding demand for food, water, and energy It furthermore describes potential game changers, including: - a global economy that could thrive or collapse - increased global insecurity due to regional instability in the Middle East and South Asia - new technologies that could solve the problems caused by the megatrends - the possibility, but by no means the certainty, that the U.S. with new partners will reinvent the international system Students of trends, forward-looking entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades will find this essential reading.

Islamic and Christian Cultures Plamen Makariev,2001 All of the 14 essays gathered here were originally presented as lectures at the 1998 eponymous conference in Sofia, Bulgaria. The contributors are scholars in cultural studies, Islamic studies, theology, cultural anthropology, and philosophy, among others. Their affiliations are not given. The essays are heartfelt on the subject of religious conflict, but uneven in quality. The topics are grouped into three parts: Islamic and Christian traditions, dialogue between cultures, and social identity and political ideals. Published by the Council for Research in Values and Philosophy, in Washington D.C. c. Book News Inc.

The Theological Profile of the Peshitta of Isaiah Attila Bodor,2021-08-30 In The Theological Profile of the Peshitta of Isaiah, Attila Bodor explores theological elements in the Peshitta version of Isaiah through a close study of its interpretative renderings.

Global Trends 2030 National Intelligence Council (U.S.),2012 This report is intended to stimulate thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories over the next 15 years. As with the NIC's previous Global Trends reports, we do not seek to predict the future, which would be an impossible feat, but instead provide a framework for thinking about possible futures and their implications. In-depth research, detailed modeling and a variety of analytical tools drawn from public, private and academic sources were employed in the production of Global Trends 2030. NIC leadership engaged with experts in nearly 20 countries, from think tanks, banks, government offices and business groups, to solicit reviews of the report.

Gregory of Nyssa (CWS) Saint Gregory (of Nyssa),1978 Here is an award-winning, new translation that brings to light Gregory's complex identity as an early mystic. Gregory (c. 332-395) was one of the Greek Cappadocian Fathers, along with St. Basil the Great and St. Gregory Nazianzen. +

Popol Vuh Dennis Tedlock,2013-02 Popol Vuh, the Quiché Mayan book of creation is not only the most important text in the native language of the Americas, it is also an extraordinary document of the human

imagination. It begins with the deeds of Mayan Gods in the darkness of a primeval sea and ends with the radiant splendor of the Mayan Lords who founded the QuichÃ© Kingdom in the Guatemalan highlands. Originally written in Mayan hieroglyphs, it was translated into the Roman alphabet in the 16th century. The new edition of Dennis Tedlock's unabridged, widely praised translation includes new notes and commentary, newly translated passages, newly deciphered hieroglyphs, and over 40 new illustrations.

An Introduction to Language and Linguistics Ralph Fasold,Jeffrey Connor-Linton,2006-03-06 This accessible textbook is the only introduction to linguistics in which each chapter is written by an expert who teaches courses on that topic, ensuring balanced and uniformly excellent coverage of the full range of modern linguistics. Assuming no prior knowledge the text offers a clear introduction to the traditional topics of structural linguistics (theories of sound, form, meaning, and language change), and in addition provides full coverage of contextual linguistics, including separate chapters on discourse, dialect variation, language and culture, and the politics of language. There are also up-to-date separate chapters on language and the brain, computational linguistics, writing, child language acquisition, and second-language learning. The breadth of the textbook makes it ideal for introductory courses on language and linguistics offered by departments of English, sociology, anthropology, and communications, as well as by linguistics departments.

Divergent Paths Richard A. Posner,2016-01-04 Judges and legal scholars talk past one another, if they have any conversation at all. Academics criticize judicial decisions in theoretical terms, which leads many judges to dismiss academic discourse as divorced from reality. Richard Posner reflects on the causes and consequences of this widening gap and what can be done to close it.

The Apostles' Creed 'He Descended Into Hell' ,2018-08-07 Starting with a biblical view, The Apostles' Creed 'He Descended into Hell' covers the history of theology by discussing the ideas of Augustine, the liturgy of the Early Church, the role of Christ's decent in Franciscan spirituality and in the theology of Thomas Aquinas. It also asks whether similar theological ideas are present in Judaism. In addition, it gauges the meaning of Christ's descent for today by reflecting on pastoral activities and on computer games. To conclude, a fundamental theological reflection systematises and summarises all the material present within the volume.

The 12th Planet Zecharia Sitchin,1991-05-01 Over the years, startling evidence has been unearthed, challenging established notions of the origins of Earth and life on it, and suggesting the existence of a superior race of beings who once inhabited our world. The product of thirty years of intensive research, The 12th Planet is the first book in Zecharia Sitchin's prophetic Earth Chronicles series--a revolutionary body of work that offers indisputable documentary proof of humanity's extraterrestrial forefathers. Travelers from the stars, they arrived eons ago, and planted the genetic seed that would ultimately blossom into a remarkable species...called Man. The 12th Planet brings to life the Sumerian civilization, presenting millennia-old evidence of the existence of Nibiru, the home planet of the Anunnaki, and of the landings of the Anunnaki on Earth every 3,600 years, and reveals a complete history of the solar system as told by these early visitors from another planet. Zecharia Sitchin's Earth Chronicles series, with millions of copies sold worldwide, deal with the history and prehistory of Earth and humankind. Each book in the series is based upon information written on clay tablets by the ancient civilizations of the Near East. The series is offered here, for the first time, in highly readable, hardbound collector's editions with enhanced maps and diagrams.

Sûrya-Siddhânta Phanindralal Gangooly,1989 The oldest and most important treatise of the post-Christian period on Indian Astronomy that has come down to us is the Surya Siddhanta consisting 14 chapters written in slokas. Alberuni says that Lata was the author of this work. According to the introductory verses Surya the sun-god revealed it to Asura Maya in the city of Romaka.

 the first is if the immersed boundary now implemented in openfoam extend3 2 can handle the the multiregion problem such as heat transfer between two regions i think maybe now the ib just act as a wall boundary is that correct the second is if the stl surface need closed because i want to add cyclic boundary for the left and right side of the

 nov 3 2017 this study has proposed a new immersed boundary method in openfoam to simulate incompressible bluff body fluid flows this ibm originally proposed by 1 is accurate and versatile for the study of unsteady deforming structures as it relies only on the accuracy of the interpolation and spreading steps which are independent of the
