Run, Hide Escape Angelin Sydney,2016-01-01 Run, Hide, Escape is unputdownable from beginning to end. Former Navy Seals Frank Dog Wright is recovering from PTSD in the safety and tranquillity of his sanctuary, a shack deep in the Appalachian Mountain Ranges. But his time alone is interrupted by the ghostly spirit of his deceased Team Leader, the legendary Joseph Tennessee Coleman. His message? 'Save Anita for me. Anita Ferguson is Tennessee's aunt. Initially, Frank refuses to listen. He digs his heels in until he could no longer ignore the persistent haunting appeals from his former Boss. Finally, Frank accepts the task, but now he has a problem. How does he explain to Anita that her dead nephew is speaking to him and telling him to protect her? He rehearses while he waits for her: 'Hey, your nephew's ghost sent me to keep you safe.' It sounds daft. More to the point, he sounds as though he needs to be institutionalised. Eventually, he is able to convince Anita that he is telling the truth and he isn't insane. She allows him to shadow her for a day. Thankfully she did because her life is suddenly upended when someone shot at her. From then on, it is up to Frank to keep her

safe and to get to the bottom of who wants her dead. It would take all his special forces skills to do so. Would he be able to keep her safe? And, would there be a chance for them to be together? To find out, get a copy NOW.

How to Think about Data Science Diego Miranda-Saavedra,2022-12-23 This book is a timely and critical introduction for those interested in what data science is (and isn't), and how it should be applied. The language is conversational and the content is accessible for readers without a quantitative or computational background; but, at the same time, it is also a practical overview of the field for the more technical readers. The overarching goal is to demystify the field and teach the reader how to develop an analytical mindset instead of following recipes. The book takes the scientist's approach of focusing on asking the right question at every step as this is the single most important factor contributing to the success of a data science project. Upon finishing this book, the reader should be asking more questions than I have answered. This book is, therefore, a practising scientist's approach to explaining data science through questions and examples.

Human Rights Responsibilities in the Digital Age Jonathan Andrew,Frédéric Bernard,2021-08-26 This book examines the tangled responsibilities of states, companies, and individuals surrounding human rights in the digital age. Digital technologies have a huge impact – for better and worse – on human lives; while they can clearly enhance some human rights, they also facilitate a wide range of violations. States are expected to implement efficient measures against powerful private companies, but, at the same time, they are drawn to technologies that extend their own control over citizens. Tech companies are increasingly asked to prevent violations committed online by their users, yet many of their business models depend on the accumulation and exploitation of users' personal data. While civil society has a crucial part to play in upholding human rights, it is also the case that individuals harm other individuals online. All three stakeholders need to ensure that technology does not provoke the disintegration of human rights. Bringing together experts from a range of disciplines, including law, international relations, and journalism, this book provides a detailed analysis of the impact of digital technologies on human rights, which will be of interest to academics, research students and professionals concerned by this issue.

Outside Insight Jorn Lyseggen,2017-10-12 Is your business looking out? The world today is drowning in data. There is a treasure trove of valuable and underutilized insights that can be gleaned from information companies and people leave behind on the internet - our 'digital breadcrumbs' - from job postings, to online news, social media, online ad spend, patent applications and more. As a result, we're at the cusp of a major shift in the way businesses are managed and governed - moving from a focus solely on lagging, internal data, toward analyses that also encompass industry-wide, external data to paint a more complete picture of a brand's opportunities and threats and uncover forward-looking insights, in real time. Tomorrow's most successful brands are already embracing Outside Insight, benefitting from an information advantage while their competition is left behind. Drawing on practical examples of transformative, data-led decisions made by brands like Apple, Facebook, Barack Obama and many more, in Outside Insight, Meltwater CEO Jorn Lyseggen illustrates the future of corporate decision-making and offers a detailed plan for business leaders to implement Outside Insight thinking into their company mindset and processes.

Community Structures and Processes on Lives of Refugee Children Sofia Leitão,Yvonne Vissing,2023-09-12 Communities around the world face challenges in how to assist the influx of refugees and immigrants, who arrive with only the clothes on their backs. They may have health problems and have experienced violence and trauma before they arrived in their new communities. They require healthcare, housing, education, jobs, financial & material support, and childcare, to name a few. Some arrive with families, but often, children and youth arrive unaccompanied and are in need of special care. Even well-intentioned and resource-rich communities may find themselves taxed as they struggle to help everyone in need. This book is framed by a human rights approach and highlights how social structures and institutional processes impact the lives of refugee and asylum-seeking children. Social institutions around the world tend to experience a similar type of challenge in serving this population. These challenges are examined in this book as recommendations for actions provided. The authored contributions present different perspectives on processes, interactions, policies, practices, and laws embedded in a variety of institutions and community social interactions. It is a reference for researchers, practitioners, and students in its presentation of academic and practitioner approaches to challenges faced by refugee children in different geographic and social contexts. Topics in this book include work on the character of transnational migrant families and communities, uses of new information and communication technologies, international frameworks of humanitarian assistance, social inclusion best practices in the integration of migrant children and unaccompanied minors, and models to provide multidisciplinary services on prevention, integration and rehabilitation integration strategies. Concepts of ACEs (Adverse Childhood Experiences) and HOPEs (Healthy Outcomes from Positive Experiences) are explored, along with lifelong learning as a catalyst for the sustained promotion of safe communities in the context of migration; and individual refugee needs and their family's future wellbeing towards service to refugees that work for the individual.
