King's Ransom Ed McBain, Rosalie Kerr, 1995 When a wealthy businessman is faced with a kidnapping, the ransom could ruin his biggest deal ever ? unless Detective Steve Carella can find the culprits before the kidnapping turns to murder. McBain has the ability to make every character believable ? which few writers these days can do. ? Associated Press McBain forces us to think twice about every character we meet?even those we thought we already knew. ? New York Times Book Review

Fly High, Fly Low (50th Anniversary ed.) Don Freeman, 2007-08-02 A Caldecott Honor book from the highly acclaimed author and illustrator of *Corduroy*! Sid the pigeon is very choosy about finding just the right home in the magnificent city of San Francisco. And find it he does, in the loop of a huge b in an electric sign high up on a skyscraper. Sid's view of San Francisco is without equal. So Sid asks the lovely dove Midge to share his home. But one morning, while Midge is taking her turn sitting on two eggs, disaster strikes. A truck comes and workers take down the letters on the skyscraper one by one. Winner of a Caldecott Honor, *Fly High, Fly Low* is a heartwarming story of two birds making a home--and then making another one--in one of America's great cities.

A High Low Tide André Joseph Gallant, 2018 Oysters are a narrative food: in each shuck and slurp, an eater tastes the place where the animal was raised. But that's just the beginning. André Joseph Gallant uses the bivalve as a jumping off point to tell the story of a changing southeastern coast, the bounty within its waters, and what the future may hold for the area and its fishers. With *A High Low Tide* he places Georgia, as well as the South, in the national conversation about aquaculture, addressing its potential as well as its challenges. The Georgia oyster industry dominated in the field of oysters for canning until it was slowed by environmental and economic shifts. To build it back and to make the Georgia oyster competitive on the national stage, a bit of scientific cosmetic work must be done, performed through aquaculture. The business of oyster farming combines physical labor and science, creating an atmosphere where disparate groups must work together to ensure its future. Employing months of field research in coastal waters and countless hours interviewing scholars and fishermen, Gallant documents both the hiccups and the successes that occur when university researchers work alongside blue-collar laborers on a shared obsession. The dawn of aquaculture in Georgia promises a sea change in the livelihoods of wild-harvest shellfishermen, should they choose to adapt to new methods. Gallant documents how these traditional harvesters are affected by innovation and uncertain tides and asks how threatened they really are.

Of Lands High and Low Martha Keyes, 2020-10-17 2020 Whitney Award Winner Scotland 1794 For more than twenty years, the Lowland village of Craigmuir has been untouched by smallpox, leaving the people vulnerable to a painful lesson on the price of belonging, belief, and survival. Isla Findlay belongs nowhere. The daughter of a disgraced woman and the Highlander who abandoned them both, she tries to be a dutiful niece to the uncle who has taken her in, blending into the village as best she can. But when a young Highlander's arrival in the area coincides with an outbreak of dreaded smallpox, it stirs up questions about Isla's past and forces a confrontation between the beliefs she holds and the community she wants to belong to. Dr. Graeme MacNeill killed the only patient he ever had: his own father. The only way he can think to atone is to cut all ties from the Lowland world his father hated—including his education as a physician—and embrace the Highland heritage he used to be ashamed of. He travels to Craigmuir to sell the unwanted estate he has inherited from an uncle and return home, but fate—and the red-headed young woman he encounters in the village—have no intention of letting him leave things so easily behind.

Looking High and Low Brenda Jo Bright, Liza Bakewell, 2022-12-06 Can low-riders rightfully be considered art? Why are Chicano murals considered art while graffiti is considered vandalism? What do Native American artisans think about the popular display of their ceremonial objects? How do the middlebrow notions of Getty workers influence highbrow values at the J. Paul Getty Trust? *Looking High and Low* attempts to answer these questions—and the broader question What is art?—by bringing together a collection of challenging essays on the meaning of art in cultural context and on the ways that our understandings of art have been influenced by social process and aesthetic values. Arguing that art is constituted across cultural boundaries rather than merely inside them, the contributors explore the relations between art, cultural identity, and the social languages of evaluation—among artists, art critics, art institutions, and their audiences—in the Southwest and in Mexico. The authors use anthropological methods in art communities to uncover compelling evidence of how marginalized populations make meaning for themselves, how images of ethnicity function in commercial culture, how Native populations must negotiate sentimental marketing and institutional appropriation of their art work, and how elite populations use culture and ritual in ways that both reveal and obscure their power and status. The authors make dramatic revelations concerning the construction and contestation of ideas of art as they circulate between groups where notions of what art should be are often at odds with each other. This volume challenges conventional modes of analyzing art. Its ethnographic explorations illuminate the importance of art as a cultural force while creating a greater awareness of the roles that scholars, museum curators, and critics play in the evaluation of art. Pulling G Erik Seedhouse, 2012-09-26 Performing in a high G environment is extremely demanding on the body: pulling G forces blood to the body's extremities, putting the pilot, astronaut or driver at risk of G-Induced Lack of Consciousness (G-LOC). In "Pulling G" Erik Seedhouse describes what it feels like to pull 7 G in a fighter plane and the G pressures on the body when driving a Formula 1 car and many other gravity-defying vehicles. The book relates, for the first time, the effects of G in both hyper-gravity and microgravity. It describes the human response to increased and decreased G and the potentially dangerous effects of high G, with particular

reference to dynamic injuries sustained in high acceleration environments. "Pulling G" provides an overview of G-related research and the development of intervention methods to mitigate the effects of increased and reduced G. As well as relating the training required to overcome G-forces on the Formula 1 track, Erik Seedhouse looks at the G forces encountered in such G environments as ejection from an aircraft, launch/re-entry, and zero-G. The book also considers how artificial gravity can be used to prevent bone demineralization and to reduce the effects of de-conditioning in astronauts. Erik Seedhouse is eminently qualified to describe the effects of large accelerations on the body. In addition to being the author of several previously published Springer Praxis books, he has developed astronaut-training protocols and is the training director for Astronauts for Hire (A4H). He is also the Canadian Forces' High Risk Acceleration Training Officer.

Inventing High and Low Stephanie Anne Sieburth,1994 Dire word of the cultural threat of the lowbrow goes back at least to the ancient Greeks, and yet, Stephanie Sieburth suggests, no division between high and low culture will stand up to logical scrutiny. Why, then, does the opposition persist? In this book Sieburth questions the terms of this perennial debate and uncovers the deep cultural, economic, and psychological tensions that lead each generation to reinvent the distinction between high and low. She focuses on Spain, where this opposition plays a special role in notions of cultural development and where leading writers have often made the relation of literature to mass culture the theme of their novels. Choosing two historical moments of sweeping material and cultural change in Spanish history, Sieburth reads two novels from the 1880s (by Benito Pérez Galdós) and two from the 1970s (by Juan Goytisolo and Carmen Martín Gaité) as fictional theories about the impact of modernity on culture and politics. Her analysis reveals that the high/low division in the cultural sphere reinforces other kinds of separations--between social classes or between men and women--dear to the elite but endangered by progress. This tension, she shows, is particularly evident in Spain, where modernization has been a contradictory and uneven process, rarely accompanied by political freedom, and where consumerism and mass culture coexist uneasily with older ways of life. Weaving together a wide spectrum of diverse material, her work will be of interest to readers concerned with Spanish history and literature, literary theory, popular culture, and the relations between politics, economics, gender, and the novel.

Sacred High City, Sacred Low City Steven Heine,2012 In *Sacred High City, Sacred Low City*, Steven Heine argues that lived religion in Japan functions as an integral part of daily life; any apparent lack of interest masks a fundamental commitment to participating regularly in diverse, though diffused, religious practices. The book uses case studies of religious sites at two representative but contrasting Tokyo neighborhoods as a basis for reflecting on this apparently contradictory quality. In what ways does Japan continue to carry on and adapt tradition, and to what extent has modern secular society lost touch with the traditional elements of religion? Or does Japanese religiosity reflect another, possibly postmodern, alternative beyond the dichotomy of sacred and secular, in which religious differences as well as a seeming indifference to religion are encompassed as part of a contemporary lifestyle?

High Technology and Low-income Communities Donald A. Schön,Bishwapriya Sanyal,William John Mitchell,1999 How will low-income communities be affected by the waves of social, economic, political, and cultural change that surround the new information technologies? How can we influence the outcome? This action-oriented book identifies the key issues, explores the evidence, and suggests some answers. Avoiding both utopianism and despair, the book presents the voices of technology enthusiasts and skeptics, as well as social activists. The book is organized into three parts. Part I examines the issues in their socio-technical, economic, and historical contexts. Part II--the core of the book--proposes five initiatives for using computers and electronic communications to benefit low-income urban communities: - to provide access to the new technologies in ways that enable low-income people to become active producers rather than passive users;- to use the new technologies to improve the dialogue between public agencies and low-income neighborhoods;- to help low-income youth to exploit the entrepreneurial potential of information technologies;- to develop approaches to education that take advantage of the educational capabilities of the computer;- to promote the community computer: applications of computers and communications technology that foster community development. Part III presents a synthesis of the various topics. Its main questions are, What are the prospects and problems of initiatives to enable the poor to benefit from the new technologies? and What federal, state, and municipal policies would enhance the prospects for success? Contributors Alice Amsden, Jeanne Bamberger, Anne Beamish, Manuel Castells, Joseph Ferreira, Peter Hall, Leo Marx, William J. Mitchell, Mitchel Resnick, Bish Sanyal, Donald A. Schön, Alan and Michelle Shaw, Michael Shiffer, Bruno Tardieu, Sherry Turkle, Julian Wolpert

High and Low Moderns Maria DiBattista,Lucy McDiarmid,1996-12-05 This collection of essays on modernist culture reassesses the convergence of low and high cultures, of socialist and aesthete, late Victorian and young Georgian, the popular and the coterie. Academic literary studies have until recently preferred to treat the opaque, difficult writings of high moderns Conrad, Yeats, Woolf, and Eliot, and the more accessible work of the low moderns Kipling, Shaw, and Wells in separate categories. In contributions by scholars David Bromwich, Roy Foster, Edna Longley, Louis Menand, Edward Mendelson, and others, *High and Low Moderns* brings these writers into critical proximity. Essays on such topics as the public mourning of Queen Victoria, Florence Farr and the New Woman, the Edwardian Shaw, Lady Gregory's attraction to Irish felons, and the high artistic uses of low entertainments--cinema, detective fiction, and journalism--introduce a subtler model of modernism, in which demotic and elite cultural forms criticize, imitate, and address one another.

Seeing High and Low Patricia Johnston,2006-06-14 Publisher Description

The Causes of High and Low Reading Achievement Ronald P. Carver,2000-02-01 This book describes all of the important factors that cause some students to have low reading achievement and others to have high reading achievement. It concentrates on the main factors that influence how much a student gains in reading achievement during a year of school, or a calendar year. An attempt is made to answer the following questions: what can educators do to increase reading achievement, and what is beyond their influence? The author is directly concerned with achievement associated with normal or typical reading. The focus of the book is on things teachers can do during an entire school year that are likely to improve the reading level and reading rate of students, which in turn, will increase their reading achievement.

This effort to specify the most important causes of high and low reading achievement represents an integration of two disciplines of scientific psychology-- experimental psychology and psychometrics. A glossary at the end of the book contains definitions of terms and concepts. Helpful appendices explain rauding theory, the three laws of rauding theory, and the equations that can be used to predict the accuracy of reading comprehension, provide conversions among units of rauding rate, and list the numbered equations presented in the book.

Buzz and Ollie's High, Low Adventure Marilyn Sloan Felts,2002-09 Each of the adventures of Buzz and Ollie is designed to help teach a basic music principle. One of the first methods used to teach children about pitch is to help them distinguish between high and low sounds. In Buzz and Ollie's High, Low Adventure, the brother and sister find themselves lost in the forest. With the help of some delightful forest friends, they must determine which sounds are high and which are low in order to find their way home. This story can be used in the classroom or at home to teach or reinforce the music principle of pitch.

High Life Low Life Liam Gildea,2021-09-09 If you are living with bipolar illness or have a family member with the illness, this book may prove to be of some help. Whilst living with a mental health condition can be extremely difficult it can be a great teacher. By the end of the book you will realise that no mental illness defines you as a person. You're on the cusp of a life worth living, it's just a matter of making the next right step.
