The Higher Self & Lower Self Vashist Vaid,2016-12-02 This book named as The Higher Self and the Lower Self, provides the "questioning reader" those important pieces of information, which "Awakens" or add on more "Vital Conscious Energy Vibrations" to the evolving "Embodied Consciousness" of the incarnated "form container", known in Sanskrit language as a "Kosha", which is commonly referred to as the "physical body" of conscious existence, having a "given name", which is provided after "incarnation" by the family elders upon this physical plane of planet earth, in most cases by the caring and loving "Parents", who perform the "Name Giving Ritual".

Lower Ed Tressie McMillan Cottom,2017-02-28 More than two million students are enrolled in for-profit colleges, from the small family-run operations to the behemoths brandished on billboards, subway ads, and late-night commercials. These schools have been around just as long as their bucolic not-for-profit counterparts, yet shockingly little is known about why they have expanded so rapidly in recent years—during the so-called Wall Street era of for-profit colleges. In *Lower Ed* Tressie McMillan Cottom—a bold and rising public scholar, herself once a recruiter at two for-profit colleges—expertly parses the fraught dynamics of this big-money industry to show precisely how it is part and parcel of the growing inequality plaguing the country today. McMillan Cottom discloses the shrewd recruitment and marketing strategies that these schools deploy and explains how, despite the well-documented predatory practices of some and the campus closings of others, ending for-profit colleges won't end the vulnerabilities that made them the fastest growing sector of higher education at the turn of the twenty-first century. And she doesn't stop there. With sharp insight and

deliberate acumen, McMillan Cottom delivers a comprehensive view of postsecondary for-profit education by illuminating the experiences of the everyday people behind the shareholder earnings, congressional battles, and student debt disasters. The relatable human stories in *Lower Ed*—from mothers struggling to pay for beauty school to working class guys seeking “good jobs” to accomplished professionals pursuing doctoral degrees—illustrate that the growth of for-profit colleges is inextricably linked to larger questions of race, gender, work, and the promise of opportunity in America. Drawing on more than one hundred interviews with students, employees, executives, and activists, *Lower Ed* tells the story of the benefits, pitfalls, and real costs of a for-profit education. It is a story about broken social contracts; about education transforming from a public interest to a private gain; and about all Americans and the challenges we face in our divided, unequal society.

Pulling G Erik Seedhouse, 2012-09-26 Performing in a high G environment is extremely demanding on the body: pulling G forces blood to the body's extremities, putting the pilot, astronaut or driver at risk of G-Induced Lack of Consciousness (G-LOC). In “Pulling G” Erik Seedhouse describes what it feels like to pull 7 G in a fighter plane and the G pressures on the body when driving a Formula 1 car and many other gravity-defying vehicles. The book relates, for the first time, the effects of G in both hyper-gravity and microgravity. It describes the human response to increased and decreased G and the potentially dangerous effects of high G, with particular reference to dynamic injuries sustained in high acceleration environments. “Pulling G” provides an overview of G-related research and the development of intervention methods to mitigate the effects of increased

and reduced G. As well as relating the training required to overcome G-forces on the Formula 1 track, Erik Seedhouse looks at the G forces encountered in such G environments as ejection from an aircraft, launch/re-entry, and zero-G. The book also considers how artificial gravity can be used to prevent bone demineralization and to reduce the effects of de-conditioning in astronauts. Erik Seedhouse is eminently qualified to describe the effects of large accelerations on the body. In addition to being the author of several previously published Springer Praxis books, he has developed astronaut-training protocols and is the training director for Astronauts for Hire (A4H). He is also the Canadian Forces' High Risk Acceleration Training Officer.

Chemistry of the Upper and Lower Atmosphere Barbara J. Finlayson-Pitts, James N. Pitts Jr., 1999-11-17 Here is the most comprehensive and up-to-date treatment of one of the hottest areas of chemical research. The treatment of fundamental kinetics and photochemistry will be highly useful to chemistry students and their instructors at the graduate level, as well as postdoctoral fellows entering this new, exciting, and well-funded field with a Ph.D. in a related discipline (e.g., analytical, organic, or physical chemistry, chemical physics, etc.). *Chemistry of the Upper and Lower Atmosphere* provides postgraduate researchers and teachers with a uniquely detailed, comprehensive, and authoritative resource. The text bridges the gap between the fundamental chemistry of the earth's atmosphere and real world examples of its application to the development of sound scientific risk assessments and associated risk management control strategies for both tropospheric and stratospheric pollutants. Serves as a graduate textbook and must have reference for all atmospheric scientists Provides more than 5000 references to the literature through the end of 1998 Presents tables of new actinic flux data for the troposphere and stratosphere (0-40km) Summarizes kinetic and photochemical data for the troposphere and stratosphere Features

problems at the end of most chapters to enhance the book's use in teaching Includes applications of the OZIPR box model with comprehensive chemistry for student use
