**Old Muslim Calendars of Southeast Asia** Ian Proudfoot, 2018-12-24 It has been said that a modern arrogance has blocked our access to the history of the Muslim calendar in Southeast Asia. Without at least the outlines of that history, we simply do not understand the basis of dates found in Malay sources. Also, without a history of Malay calendars we are denied an understanding of the context from which the Javanese Muslim calendar arose. This volume, the result of combining empirical evidence with a sound understanding of the structural requirements of calendar-making, and of the mechanisms through which these needs could be met, for the first time explains how these old octaval calendars actually worked. It traces the history of Muslim calendars in Southeast Asia, and attempts to put them into their historical and cultural context. Understanding the old calendars will at last throw light on a number of essential aspects of older Malay science and culture. An accompanying interactive CD-ROM presents the reader with a tool for converting Malay and Javanese dates, with access to the range of variant calendars.

*The Blessed Days and Nights of the Islamic Year* Hüseyin Algül, 2005 The blessed days, nights, and months are each a distinctive sign of Islam. They are celebrated by Muslims all around the world in due respect to their unique worth and sanctity that make them distinct from the rest of the year. Although the worth and sanctity of these special times have essentially been

shaped by the Islamic tradition from the seventh century onwards, most of these dates have their origins far back in history.

**Calendrical Calculations** Edward M. Reingold, Nachum Dershowitz, University of Illinois at Urbana-Champaign. Department of Computer Science, 1989

Blessed Days & Nights Of The Islamic Yea Huseyin Algul, 2008-11-01 The blessed days, nights, and months are each a distinctive sign of Islam. They are celebrated by Muslims all around the world in due respect to their unique worth and sanctity that make them distinct from the rest of the year. Muslims commemorate Prophet Noah and his tireless messengership every year by cooking Ashura pudding and sharing it with their neighbors; they remember the great model of Abraham as the friend of God who displayed the greatest example of submission to the Divine Will. Providing essential information about various components of Islamic tradition as the universal heritage of human history, we hope this book will serve to the better understanding and mutual respect between members of different faiths.

**Muslim Holidays in 2023** Taher Chilchi, 2023-01-05 The Muslim calendar The Muslim calendar, also known as the Hijri calendar, is a lunar calendar used by Muslims around the world to mark religious holidays and celebrations. It was instituted by the Prophet Muhammad and has been adopted as the official calendar in many Muslim countries. The Hijri calendar has 12 months in the year, each of 29 or 30 days, and a year has about 354 days. The months of the Hijri calendar are: Muharram, Safar, Rabi al-awwal, Rabi al-thani, Jumada al-awwal, Jumada al-thani, Rajab, Sha'ban, Ramadan, Shawwal, Dhu al-Qi'dah and Dhu al-Hijjah. The Hijri calendar is a lunar calendar that begins with the exodus of the Prophet Muhammad from Mecca to Medina, which is considered the year of the Hegira. The year of the Hegira corresponds to the year 622 of the Common Era (CE). So, if we are in 2023 of the common era, we are in the year 1444 of the Hegira. However, it is important to note that the Hijri calendar is a lunar calendar and the dates of the Hijri calendar do not coincide exactly with those of the Gregorian calendar, which is the most commonly used

solar calendar in the world today. The Hijri calendar was instituted by Caliph Omar in the seventh century CE and is used by Muslims to set the dates of religious festivals and ceremonies. The dates of the Hijri calendar are about 11 days shorter than those of the Gregorian calendar, which means that Muslim holidays move back 11 days each year compared to the Gregorian calendar. The dates of the Muslim holidays are determined according to this calendar and can therefore vary from one year to another.

*1441 Ah: (august 2019 - August 2020)* Papatia Feauxzar, 2019-01-09 1441 AH by Papatia Feauxzar is a Muslim planner, a hijri calendar, a notebook and a gratitude journal.

**Light in the Heavens** al-Qāḍī al-Quḍā'ī, 2019-11-15 Humanitarian lessons and practical insights from the prophet of Islam The words of Muhammad, messenger of God and prophet of Islam, have a special place in the hearts of his followers. Wielding an authority second only to the Qur'an, they are cited by scholars in a vast array of disciplines—including law, theology, metaphysics, poetry, grammar, history, and medicine—and are quoted by Muslims to one another in their daily lives. *Light in the Heavens* by al-Qadi al-Quda'i, a Sunni judge in the Fatimid court in Egypt, is an outstanding example of a compilation of these sayings, known as hadiths, that circulated orally and were later assembled and written down. From North Africa to India, generations have used *Light in the Heavens* as a teaching text for children as well as adults, and many of its 1,200 sayings are familiar to individuals of

diverse denominations and ethnicities. For Muslims—who consider Muhammad's teachings the fount of wisdom and the beacon of guidance in all things, mundane and sublime—these sayings provide a direct window into the inspired vision of one of the most influential humans to have walked the Earth. An English-only edition.

Caesarean Moon Births: Calculations, Moon Sighting, and the Prophetic Way  
Hamza Yusuf, 2014-01-10 Prior to the advent of electricity, every night held the possibility of a celestial light show. People in even the most urban environments were exposed to the awe and majesty of the heavens, which clearly proclaim the glory of God. The contemplation of the celestial orbs and their movements provided early man with the most direct connection to his Lord. In the Qur'anic story of Abraham, it is his observance of heavenly phenomena that leads him to his certainty of God's unity and transcendence. Since the time of the Seljuq Turks, the crescent moon has been a sign of Islam. For Muslims in North America, there has been much confusion regarding when Ramadan begins, when to fast, and when to break the fast. Hamza Yusuf provides clarity through this detailed and scholarly work that decisively makes the case for sighting the crescent moon with the naked eye, as has been the Islamic tradition for 1400 years. This is essential reading for anyone seeking guidance on this important and sacred matter.
