Islamic History R. Stephen Humphreys,2020-06-16 This book will be immensely helpful to those who wish to orient themselves to what has become a very large body of literature on medieval Islamic history. Combining a bibliographic study with an inquiry into method, it opens with a survey of the principal reference tools available to historians of Islam and a systematic review of the sources they will confront. Problems of method are then examined in a series of chapters, each exploring a broad topic in the social and political history of the Middle East and North Africa between A.D. 600 and 1500. The topics selected represent a cross-section of Islamic historical studies, and range from the struggles for power within the early Islamic community to the life of the peasantry. Each chapter pursues four questions. What concrete research problems are likely to be most challenging and productive? What resources do we possess for dealing with these problems? What strategies can we devise to exploit our resources most effectively? What is the current state of the scholarly literature for the topic under study?

Islamic Law in Early Modern Iran Zahir Bhalloo,2023-10-24 Historical studies on the practice of Islamic law (sharī'a) tend to focus on practice in a Sunni setting during the Mamluk or Ottoman periods. This book decenters Sunni and Mamluk and Ottoman normativity by investigating the practice of sharī'a in a Twelver Shi'i Persian-speaking milieu, in early modern Iran between the sixteenth to twentieth centuries. Drawing on documentary evidence and narrative sources, it reconstructs who the practitioners of Islamic law were, how they authenticated, annulled, and archived legal documents, and how they intervened in the resolution of disputes over religious endowments (waqf). The study demonstrates that following Iran's conversion to Twelver Shi'ism under the Safavids, the dominance of Uṣūlī Shi'i legal theory, which conferred judicial authority on scholars recognized as Shi'i jurists (mujtahids), affected both the practitioners of Islamic law and the procedures of sharī'a court practice in Iran. Shi'i jurists in Iran, as a result, would come to exercise by the end of the nineteenth century a judicial monopoly over valid sharī'a court practice thus laying the foundation for Ayatollah Khomeini's extension, during the Iranian revolution, of the authority of the Shi'i jurist over political affairs.

Islamic Law, Tribal Customary Law and Waqf Aharon Layish,2023-10-30 In this collected volume, Aharon Layish demonstrates that legal documents are an essential source for legal and social

history. Since the late nineteenth century, Islamic law has undergone tremendous transformations, some of which have strongly affected the basic features of its nature. The changes include the transformation of Islamic law from a jurists' law to a statutory law; the abolishment of waqf; the Islamization of tribal customary law; the creation of Sudanese legal methodologies strongly inspired by Šūfī and Salafī traditions or Western law, and the emergence of an Israeli version of Islamic law.

Net Common Language Runtime Unleashed Kevin R. Burton, 2002 The .NET Framework provides a runtime environment called the Common Language Runtime, which manages the execution of code and provides services that make the development of robust software easier. The Common Language Runtime (CLR) provides a solid foundation for developers to build various types of applications. Whether a developer is writing an ASP.NET application, a Windows Forms application, a Web Service, a mobile code application, a distributed application, or an application that combines several of these application models, the CLR provides huge benefits such as simplified development and the ability to integrate code written in various languages. This book is a high-end comprehensive reference to the capability of the CLR. The samples in the book have been written so that they not only illustrate a principle but give the reader a springboard to quickly translate the sample to practical, real-world applications. After reading this book, readers will be able to significantly increase their productivity by comfortably using the power and expressiveness of the Common Language Runtime in their applications. This book will take the reader beyond the syntax of C# to using and understanding the CLR to build secure, maintainable, and high performance applications.

Chronicles on African Philosophy of Higher Education, 2023-05-15 The central argument in this book revolves around the significance of an African philosophy of higher education. Such a philosophy is geared towards cultivating democratic iterations, co-belonging, and critique within human encounters. Together, these actions can enhance intellectual activism within and beyond the encounters. A philosophy of higher education is constituted by a philosophical act of reflexivity according to which (how), freedom (both autonomous and communal), cosmopolitanism (learning to live with differences and otherness), and caring with others (ubuntu) can be rhythmically practised. What makes an African philosophy of higher education distinctive and realisable is that practices ought to be based on iterations, co-belonging, and critique. If intellectual activism were not to become

a major act of resistance on the basis of which educational, political, and societal dystopias can be undermined, such a philosophy of higher education would not have a real purpose. An African philosophy of higher education is an intellectually activist endeavour because of its concern to be oppositional to constraints in and about higher education. In conversation with such an understanding of this philosophy, contributors to this volume offer responses to why human freedom, cosmopolitanism, and caring with others (ubuntu) can be rhythmically enacted.
