The Hindi Music Jukebox Manek Premchand,2018-07-18 This Indian film music book is a collection of eighty essays about the people who made remarkable music in Bollywood cinema, especially during the great era, and the ideas such people brought to the recording studios. When songs had to go without rhythms or when melodies had plenty of Q n A in them. In this music book, we flirt with Rock n Roll and scan songs that speed up at the end, we peep behind the screen to see what the idea was behind chorus songs in our films – even if there was no one to sing that chorus on the screen; it's a huge list. These pages are a reflection of the time when everyone was fired up in their art, and when no one wanted to finish last in the race. It is about artists who every now and then dreamt ideas, and only after crystallizing things perfectly in their mind's eye, went out to translate and transform their dreams into unforgettable melodies in Indian movies. Jukebox will interest the layman as well as the academician.

The Influence of Hindustani Classical Music on Bollywood Songs. A Statistical Outlook Amrita Singh,Soubhik Chakraborty,2019-07-19 Master's Thesis from the year 2019 in the subject Musicology, grade: 8.5, , language: English, abstract: The present work attempts to study the impact of Hindustani Classical Music on Bollywood in a legitimate manner using a statistical approach emphasizing on statistical modeling of musical structure and performance and other statistical features such as note duration and inter onset interval with a case study in raga Yaman. Any music originates in the society and develops with the changing realities of it. It accepts new and modifies the existing cultural norms in different periods of time. This process of acceptance and rejection makes any form of art exist for long. In spite of all this, in various phases, Hindustani classical music, being the base of many popular Bollywood songs has helped in their popularity and lifelong existence because of the strong focus on melody. A raga, which is the nucleus of Indian classical music, be it Hindustani or Carnatic, is a melodic structure with fixed notes and a set of rules which characterize a certain mood conveyed by performance. Hindustani ragas have embraced the elements of several Bollywood songs, which has given these songs a strong impact

despite the strong influence of western art music in Bollywood music industry. The present work attempts to study this impact in a legitimate manner using a statistical approach emphasizing on statistical modeling of musical structure and performance and other statistical features such as note duration and inter onset interval with a case study in raga Yaman. It turns out that the same statistical model for both the raga bandish and a song based on the same raga, i.e., Yaman, an evening raga of the Kalyan thaat.

More Than Bollywood Gregory D. Booth, Bradley Shope, 2014 This is the first book to tackle the diverse styles and multiple histories of popular musics in India. It brings together fourteen of the world's leading scholars on Indian popular music to contribute chapters on a range of topics from the classic songs of Bollywood to contemporary remixes, summarized by a reflective afterword by popular music scholar Timothy Taylor. The chapters in this volume address the impact of media and technology on contemporary music, the variety of industrial developments and contexts for Indian popular music, and historical trends in popular music development both before and after the Indian Independence in 1947. The book identifies new ways of engaging popular music in India beyond the Bollywood musical canon, and offers several case studies of local and regional styles of music. The contributors address the subcontinent's historical relationships with colonialism, the transnational market economies, local governmental factors, international conventions, and a host of other circumstances to shed light on the development of popular music throughout India. To illustrate each chapter author's points, and to make available music not easily accessible in North America, the book features an Oxford web music companion website of audio and video tracks.

Hindi Film Songs and the Cinema Anna Morcom, 2017-07-05 Since their beginnings in the 1930s, Hindi films and film songs have dominated Indian public culture in India, and have also made their presence felt strongly in many global contexts. Hindi film songs have been described on the one hand as highly standardized and on the other as highly eclectic. Anna Morcom addresses many of the paradoxes eccentricities and myths of not just Hindi film songs but also of Hindi cinema by analysing film songs in cinematic context. While the presence of songs in Hindi films is commonly dismissed as purely commercial this book demonstrates that in terms of the production process, musical style, and commercial life, it is most powerfully the parent film that shapes and defines the film songs and their success rather than the other way round. While they constitute India's still foremost genre of popular music, film songs are also situational, dramatic sequences, inherently multi-media in style and conception. This book is uniquely grounded in detailed musical and visual analysis of Hindi film songs, song sequences and films as well as a wealth of ethnographic material from the Hindi film and music industries. Its findings lead to highly novel ways of viewing Hindi film songs, their key role in Hindi cinema, and how this affects their wider life in India and across the globe. It will be indispensable to scholars seeking to understand both Hindi film songs and Hindi cinema. It also forms a major

contribution to popular music, popular culture, film music studies and ethnomusicology, tackling pertinent issues of cultural production, (multi-)media, and the cross-cultural use of music in Hindi cinema. The book caters for both music specialists as well as a wider audience.
