When Reality Hits Arthur Berm, 2014-07-09 At the end of the Second World War in 1945, the United Nations (UN) was formed to prevent another World War like the one that had just ended. The following decades brought renewed and fresh life to many, and Canada or America were again "lands of opportunity." Since then, many changes have taken place in technology, the economy, and morality. Extreme ideologies and terrorism are becoming more commonplace. Wars and rumours of wars have Canada and America involved in many conflicts around the world; is the UN failing as a peacekeeper? Have we expected too much from an organization that now cannot even control itself. How long before we lose it all to the "New World Order?"

Tacky the Penguin Helen Lester, 2010-12-06 An offbeat penguin shows his peers the power of individuality in this humorous tale from the author of Pookins Gets Her Way. Tacky is an odd bird. He likes to do splashy cannonballs and greet his companions with a loud What's happening? In fact, he's something of an eccentric, which wouldn't be a problem if all the other penguins weren't such...conformists. When intimidating visitors invade their peaceful, nice, icy land, it'll take a lot more than a bunch of perfect penguins to save the day. Thank goodness Tacky's such an odd bird! "This book is must reading for any kid—or grown-up—who refuses to follow the pack."—Publishers Weekly

Hit Makers Derek Thompson, 2017-02-07 NATIONAL BESTSELLER A Book of the Year Selection for Inc. and Library Journal "This book picks up where *The Tipping Point* left off. -- Adam Grant, Wharton professor and New York Times bestselling author of *ORIGINALS* and *GIVE AND TAKE* Nothing "goes viral." If you think a popular movie, song, or app came out of nowhere to become a word-of-mouth success in today's crowded media environment, you're missing the real story. Each blockbuster has a secret history—of power, influence, dark broadcasters, and passionate cults that turn some new products into cultural phenomena. Even the most brilliant ideas wither in obscurity if they fail to connect with the right network, and the consumers that matter most aren't the early adopters, but rather their friends, followers, and imitators -- the audience of your audience. In his groundbreaking investigation, Atlantic senior editor Derek Thompson uncovers the hidden psychology of why we like what we like and reveals the economics of cultural markets that invisibly shape our lives. Shattering the sentimental myths of hit-making that dominate pop culture and business, Thompson shows quality is insufficient for success, nobody has good taste, and some of the most popular products in history were one bad break away from utter failure. It may be a new world, but there are some enduring truths to what audiences and consumers want. People love a familiar surprise: a product that is bold, yet sneakily recognizable. Every business, every artist, every person looking to promote themselves and their work wants to know what makes some works so successful while others disappear. *Hit Makers* is a magical mystery tour through the last century of pop culture blockbusters and the most valuable currency of the twenty-first century—people's attention. From the dawn of impressionist art to the future of Facebook, from small Etsy designers to the origin of *Star Wars*, Derek Thompson leaves no pet rock unturned to tell the fascinating story of how culture happens and why things become popular. In *Hit Makers*, Derek Thompson investigates: · The secret link between ESPN's sticky programming and the The Weeknd's catchy choruses · Why Facebook is today's most important newspaper · How advertising critics predicted Donald Trump · The 5th grader who accidentally launched *Rock Around the Clock*, the biggest hit in rock and roll history · How Barack Obama and his speechwriters think of themselves as songwriters · How Disney conquered the world—but the future of hits belongs to savvy amateurs and individuals · The French collector who accidentally created the Impressionist canon · Quantitative evidence that the biggest music hits aren't always the best · Why almost all Hollywood blockbusters are sequels, reboots, and adaptations

· Why one year--1991--is responsible for the way pop music sounds today · Why another year --1932-- created the business model of film · How data scientists proved that “going viral” is a myth · How 19th century immigration patterns explain the most heard song in the Western Hemisphere

The Last Lecture Randy Pausch, 2008-04-08 After being diagnosed with terminal cancer, a professor shares the lessons he's learned—about living in the present, building a legacy, and taking full advantage of the time you have—in this life-changing classic. We cannot change the cards we are dealt, just how we play the hand. —Randy Pausch A lot of professors give talks titled The Last Lecture. Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull over the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave—Really Achieving Your Childhood Dreams—wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because time is all you have . . . and you may find one day that you have less than you think). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

Lights of Dragomar Marc Krautwedel, 2022-08-17 ‘We have to be prepared for everything, even for someone who destroys everything so that no one has it, not even him.’ They stood side by side again in silence on the terrace, high up on the mountain, watching the play of colours in the night sky. They heard the wind and the occasional cracking of ice floes piled on top of each other in the ocean in front of them. The waves that thundered recurrently against the rocks were a low murmur up on the mountain, accompanied by the fresh smell of the sea. ‘Will we win?’ asked Galbohei, without taking his eyes off the sky glow. ‘We have the advantage,’ replied Eremides. ‘We know the value of freedom and we don’t want to lose it. We know friendship and will not give it up. We know love and want to be able to continue to love.’ Antarctica, circa 1540. Two aging swashbucklers confer on how to defend or stand their ground against a hostile force they know. Things look tight. They live on an island, in a mountain rich in tradition and myths. It is called “The Mountain of Hope”. Actually, it is Dragomar, supposedly the ancient home of dragons and their successful “cultural successors”. A slightly pubescent youth is bored far away from Dragomar. Everything is trivial, transparent and repeats itself in a daily rhythm. He would like to travel the ocean but he is not allowed to yet. He dreams of adventures and battles that seem so real to him, as if he were having a déjà vu with a claim to historical truth. Fire seems to come out of his nose and he changes in other ways as well. He is drawn toward a distant island where there is a mountain with a crystal shining brightly and mysteriously at the top. He is told that he is a foster child and that his grandfather, his last relative, lives on the distant island. The budding hero sets out, meets various people, develops physical and mental abilities, is kidnapped. There is a sea battle for him, because he is supposed to be something like an heir to the throne. He learns about history, past forms of government and more about ancient myths. So much for the plot. That Italian emperor penguins completely deface and shred the “Band of Brothers” speech of Henry V; that a black dragon can spit black holes and is about to merge into the matrix; that really fascistic meanies are afraid of the crowd of penguins and are prone to vulgarity; that the topic of separation of powers is a real problem ... all this fills the pages in such a way that it is irrelevant whether there is a human, animal or dragon giving something to the best. A little excursion into humanity. A little unexplained philosophy; a little unexplained physics; a little unexplainable behaviour. Myths, legends, magic - and everyday life.

Teaching Online Claire Howell Major,2015-03-15 Demystifies online teaching for both enthusiastic and wary educators and helps faculty who teach online do their best work as digital instructors. It is difficult to imagine a college class today that does not include some online component—whether a simple posting of a syllabus to course management software, the use of social media for communication, or a full-blown course offering through a MOOC platform. In *Teaching Online*, Claire Howell Major describes for college faculty the changes that accompany use of such technologies and offers real-world strategies for surmounting digital teaching challenges. Teaching with these evolving media requires instructors to alter the ways in which they conceive of and do their work, according to Major. They must frequently update their knowledge of learning, teaching, and media, and they need to develop new forms of instruction, revise and reconceptualize classroom materials, and refresh their communication patterns. Faculty teaching online must also reconsider the student experience and determine what changes for students ultimately mean for their own work and for their institutions. *Teaching Online* presents instructors with a thoughtful synthesis of educational theory, research, and practice as well as a review of strategies for managing the instructional changes involved in teaching online. In addition, this book presents examples of best practices from successful online instructors as well as cutting-edge ideas from leading scholars and educational technologists. Faculty members, researchers, instructional designers, students, administrators, and policy makers who engage with online learning will find this book an invaluable resource.

See Jane Hit James Garbarino,2007-01-30 From one of America's leading authorities on juvenile violence comes a groundbreaking investigation of the explosion of violent behavior in girls With *Lost Boys*, James Garbarino became our foremost explicator of violent behavior in boys. Now he turns his attention to its increasing incidence in girls. Twenty-five years ago, ten boys were arrested for assault for every one girl. Now that ratio is four-to-one and dropping. Combining clinical experience with incisive analyses of social trends, Garbarino traces the factors—many of them essentially positive—behind the epidemic: girls' increased participation in sports and greater comfort with their physicality, but also their lack of training in handling aggression. *See Jane Hit* goes beyond diagnosing the problem to outline a clear-eyed, compassionate solution.

Professor Penguin Lloyd Spencer Davis,2014-10-17 Meet 'Bill Bryson in Antarctica' in this engaging book by one of the world's authority on penguins. Part memoir, partly the research of a field biologist, *Professor Penguin* could be called 'How Penguins Shaped My Life'. Based on journals kept during Davis's years of working with penguins in the wild, the story takes readers to remote locations: Antarctica, the Galapagos, the deserts of Chile and Peru, the Falkland Islands, the wild coasts of Argentina and South Africa, and New Zealand. Davis, a world authority on penguins, reveals that these box-office favourites are not the cute 'mate for life' animals we've been led to believe. He also reveals that penguins are a lot like humans — sometimes disturbingly so — when it comes to their basic needs: sex, food, shelter, marriage, family and travel. Over the years that Davis studies penguins, he realises that they are far more complex and nuanced than he imagines at his first encounter. 'They really don't deserve to be seen as so black and white.' He expertly marries scientific knowledge with his own anecdotes — told with humour, hard-earned knowledge and insight. He also includes stories about those who have helped advance our knowledge of penguins —other 'Professor Penguins'. Implicit throughout is Davis's philosophy - the more we learn about the natural world, and

specifically penguins, the more we learn about ourselves. And he asks: Is the isolation of Antarctica sufficient to protect penguins from us?

Local conservation officials immediately launched a massive rescue operation, and 12,500 volunteers from around the globe rushed to South Africa in hopes of saving the imperiled birds. Serving as a rehabilitation manager during the initial phase of the three-month effort, Dyan deNapoli--better known as the Penguin Lady for her extensive work with penguins--and fellow volunteers de-oiled, nursed back to health, and released into the wild nearly all of the over 19,000 affected birds. Now, at the tenth anniversary of the disaster, deNapoli recounts the extraordinary story of the world's largest and most successful wildlife rescue--From publisher description.

Now, for the first time ever, Crawford opens up in her memoir, *A Song for You*.
