American Cars, 1946-1959 J. “Kelly” Flory, Jr.,2008-11-24 From the resumption of automobile production at the close of World War II through the 1950s, the American auto industry would see the births and deaths of several manufacturers, great technological advances, and an era of dramatic styling as a prospering nation asserted its growing mobility. Cars of this period are among the most iconic vehicles ever built in the United States: the 1949 Ford, the remarkable Studebaker designs of 1950 and 1953, the 1955-1957 Chevrolets, the Forward Look Chrysler products, the ill-fated Edsel and many others. This comprehensive reference book details every model from each of the major manufacturers (including independents such as Kaiser-Frazer and Crosley but excluding very low-volume marques such as Tucker) from model years 1946 through 1959. Year by year, it provides an overview of the industry and market, followed by an individual report on each company: its main news for the year (introductions or cancellations of models, new engines and transmissions, advertising themes, sales trends etc.); its production figures and market status; and its powertrain offerings, paint colors and major options. The company's models are then detailed individually with such information as body styles, prices, dimensions and weights, standard equipment and production figures. Nearly 1,000 photographs are included.

Land Administration and Practice in Hong Kong, Fifth Edition Roger Nissim,2021-11-01 The purpose of this book is to explain both the historical context and current practices of land administration in Hong Kong. Although Hong Kong has an open and business-friendly environment, it is underpinned by a socialist leasehold land tenure system. The government is landlord to virtually all land and so it plays a pivotal role in the administration of this scarce, and therefore, valuable resource. As land administration is governed by private contract law rather than legislation, it is constantly evolving with the courts handing down significant decisions on a regular basis. Government practice has to respond to this, as well as the community’s concern on how best land can be administered. The fifth edition has some substantial and important updates which should continue to be useful to both students and practitioners of surveying, architecture, planning and law, as well as the wider business and financial community.

It offered a history of tradition, superior quality, and a pampered buying experience. Today, however, luxury is simply a product packaged and sold by multibillion-dollar global corporations focused on growth, visibility, brand awareness, advertising, and, above all, profits. Award-winning journalist Dana Thomas digs deep into the dark side of the luxury industry to uncover all the secrets that Prada, Gucci, and Burberry don't want us to know. Deluxe is an uncompromising look behind the glossy façade that will enthrall anyone interested in fashion, finance, or culture.
