Pocket Rough Guide Hong Kong & Macau Rough Guides, 2014-02-03 The Pocket Rough Guide to Hong Kong and Macau celebrates the energy of these two former European colonies, sitting just 37 miles apart on the south China coast. This fully updated guidebook includes the lowdown on the shopping opportunities and cutting-edge architecture of Hong Kong's downtown, parks, and harbourside cityscapes--all existing alongside traditional temples and street markets. Go further afield to appreciate the beaches, rural landscapes, and old walled villages of the New Territories, easy to reach in even a short visit but often overlooked. Across the Pearl River, and close enough for day trips, Macau's eighteenth-century churches and lanes incongruously rub shoulders with ostentatious casinos. The Pocket Rough Guide to Hong Kong and Macau features inspirational photography and detailed, reliable maps that show you the best of the city. There are up-to-the-minute reviews of the region's dining and entertainment, too, from indigenous Macanese cuisine and the best places for traditional dim sum, to Lan Kwai Fong's bars and which old colonial hotels serve afternoon tea. Self-Organization and Mobility Deprivation of Poor Workers in Hong Kong and Singapore Joseph Cho-Yam Lau,2023-10-16 This book focuses on the influence of socio-economic and land-use policies on the commuting problems and quality of life of the poor in Singapore and Hong Kong. It considers the influence of self-organisation: how the mobility of an individual is constituted by structures such as transport systems or socio-economic structural factors, as well as influenced by individual decisions. Where most transport studies focus on the influence of factors such as income inequality, the gender gap, and the built environment, this book fills a gap in paying particular attention to the influence of individual decisions on commuting. Given the prevalence of the former in research, government decision-makers are often constrained by these approaches and fail to understand the commuting problems of the poor. This book argues that the self-organisation approach provides some ideas that are outside the common conceptual framework in conventional transport planning and looks to improve mobility of lower-income commuters. Relevant to social science researchers working in areas such as urban planning and transport, mobility deprivation, and poverty, this book breaks new ground in quality of life studies in the Singapore and Hong Kong contexts.

Dimitriou and Cook explore the historical developments, current issues and problems, policy and planning responses and new directions. Hong Kong has experienced remarkable economic growth as the 'Gateway to China' and its land-use has become a model for other cities in the region and for China as a whole.
