Chinese Companies and the Hong Kong Stock Market Flora Xiao Huang, Horace Yeung, 2013-10-30 Listing by companies from one country on the stock market of another country is a device often used both to raise capital in, and to increase bonding with, the target country. This book examines the listing by Chinese companies on the Hong Kong stock market. It discusses the extent of the phenomenon, compares the two different regulatory regimes, and explores the motivations for the cross-listing. It argues that a key factor, in addition to raising capital and bonding with the Hong Kong market, is Chinese companies' desire to encourage legal and regulatory reforms along Hong Kong lines in mainland China, in order to develop and open up China's domestic capital markets.

A Guide to the Equity Markets of Hong Kong Paul B. McGuinness, 1999 This book explains the structure and outline of Hong Kong's equity markets, and examines Hong Kong's rising prominence (ranked sixth largest in the world) and importance as a financial centre in the region. It details the workings of the equity market system, covering the basics of all the major derivatives, and gives a brief overview of its other regional contemporary markets. Hong Kong's equity market has changed beyond all recognition over the last decade. The rise of China and East Asia has fuelled tremendous growth in this market. In the last two years alone, the market capitalisation of stocks traded in The Stock exchange of Hong Kong (SEHK) has grown by almost 100%. This growth, reflecting both the appreciation of existing stock values and a flood of new listing, is expected to continue as the PRC develops in to a world economic power. The rising volumes of trading and recent flurry of 'H' share listings and other PRC-backed stocks, is also indicative of the PRC's commitment to establish Hong Kong as the centre of its financial system. Hong Kong's mantle as the financial

People's Republic of China-Hong Kong Special Administrative Region: Financial Sector Assessment Program-Technical Note-Regulation and Supervision of Secondary Markets International Monetary Fund, International Monetary Fund. Monetary and Capital Markets Department, 2021-06-15 Hong Kong SAR has, over the recent years, become an equity trading hub catering to domestic and foreign investors, including increasingly to investors from Mainland China. Most trading is conducted on markets operated by recognized exchange companies, with limited domestic trading happening via automated trading services (ATS) providers in the form of alternative liquidity pools. The introduction of Stock Connect in 2014 enabled investors from Hong Kong (including domestic and foreign) to directly invest in the Shanghai and later Shenzhen markets and investors from the Mainland to directly access the Hong Kong market. Trading via Stock Connect has seen a steady rise over the last few years, increasing the linkages between Hong Kong SAR and the Mainland. Mainland companies currently account for over 60 per cent of market capitalization of the equities traded on the Stock Exchange of Hong Kong (SEHK).

The Financial Markets of Hong Kong Andrew F. Freris, 2018-10-26 The financial markets of Hong Kong have a reputation for volatility, but careful analysis of past behaviour reveals consistent trends and coherent actions. This study, first published in 1991, at a time of uncertainty before Hong Kong's transfer to China in 1997, analyses each of the financial markets in the colony, and explains the activities of banks, deposit-taking companies, the stock exchange, and markets in capital, gold, futures, unit trusts, and foreign exchange. Examining these in terms of structure, regulation and in competition, it constitutes not just a description but a thorough analysis of the characteristic dynamics of each market.

Asia's Stock Markets from the Ground Up Herald van der Linde, 2021-10-15 A summary of how stock markets work for those looking to invest. This book is a practical guide to Asia's stock markets for a general audience. It is for people who do not know much about financial markets but, for whatever reason, would like to learn more. They could be seasoned expatriate pilots, academics and other professionals, newcomers in the region as well as students or young men and women about to start in the finance industry. The idea is to cut through the alphabet soup of industry jargon to provide a clear understanding of how these markets work, how they differ from each other in size and depth, what unique features each stock market has and what drives all the different sectors in

these markets – consumers, the internet, banks and technology. The book includes helpful history lessons and personal anecdotes drawn from the author's 30 years in the world of Asian investments.

Spillovers of the U.S. Subprime Financial Turmoil to Mainland China and Hong Kong SAR: Evidence from Stock Markets Tao Sun,Xiaojing Zhang,2009-08-01 This paper focuses on evidence from stock markets as it investigates the spillovers from the United States to mainland China and Hong Kong SAR during the subprime crisis. Using both univariate and multivariate GARCH models, this paper finds that China's stock market is not immune to the financial crisis, as evidenced by the price and volatility spillovers from the United States. In addition, HK's equity returns have exhibited more significant price and volatility spillovers from the United States than China's returns, and past volatility shocks in the United States have a more persistent effect on future volatility in HK than in China, reflecting HK's role as an international financial center. Moreover, the impact of the volatility from the United States on China's stock markets has been more persistent than that from HK, due mainly to the United States as the origin of the subprime crisis. Finally, as expected, the conditional correlation between China and HK has outweighed their conditional correlations with the United States, echoing increasing financial integration between China and HK.

Macroeconomic Linkages Between Hong Kong and Mainland China Hans GENBERY,Dong HE,2008-07-01 This volume sheds light on the important policy issues facing both Hong Kong and the Mainland, including how resilient the Hong Kong economy is against external shocks, how large portfolio capital outflows from China will be once its capital account is liberalized, and in what ways fund flows between Hong Kong and the Mainland affect Hong Kong's monetary and financial conditions. With 11 essays, this monograph can be divided into 2 parts. Part I studies the "real" linkages between Hong Kong and the Mainland, while Part II focuses on the financial linkages. A detailed introduction written by the editors will serve as a non-technical summary of the essays. Published by City University of Hong Kong Press. 000000000000

Hong Kong Stephen Chiu,Tai-Lok Lui,2009-06-09 Hong Kong is a small city with a big reputation. The practitioner's interest in Chinese markets stems from corporations; investors and financial institutions foresee substantial benefits from investing in China in the long run. However, the academic literature on the development of securities markets and reform of state enterprises in China is still in its infancy and fragmented. This handbook aims to bridge that gap by presenting a wide spectrum of research in the forefront of financial applications. It integrates theory and practice with state-of-the-art statistical techniques and provides numerous insights into the main challenges confronting Chinese markets in the new millennium.
