Web Information Systems and Technologies Karl-Heinz Krempels,Alexander Stocker,2014-07-24 This book contains the thoroughly refereed and revised best papers from the 9th International Conference on Web Information Systems and Technologies, WEBIST 2013, held in Aachen, Germany, in May 2013, organized by the Institute for Systems and Technologies of Information, Control and Communication (INSTICC), and co-organized by the RWTH Aachen University. The 15 papers presented in this book were carefully reviewed and selected from 143 submissions. The papers were selected from those with the best reviews also taking into account the quality of their presentation at the conference. The papers are grouped into parts on Internet technology, Web interfaces and applications, society, e-business and e-government, Web intelligence, and mobile information systems.

Towards a New International Monetary Order Koen Bytteeber,2017-05-25 This book presents a thorough and critical evaluation of the monetary and financial system prevalent in Western economies. Further, it seeks to explain why this system so often leads to financial crises and why they have been dealt with unsatisfactorily in the past. In order to provide answers to these questions, the book investigates the monetary and financial system from a multidisciplinary perspective, with a strong focus on the ethical value choices which throughout history have shaped the monetary and financial legal system. In the closing chapters, the book also advances a detailed proposal for a New Global Monetary Order, one based on altruism, as an alternative to the neoliberal values dominant today.

Disruptive Selling Patrick Maes,2018-04-03 Adopt disruptive selling strategies that will empower your customers and ensure you stay competitive in the constantly evolving digital landscape with this carefully researched book, featuring case studies and examples from disruptive organizations such as AirBnB, Zalando and Bol.com. The heyday of the classic sales force is over. Customers lead mobile and online lives, and successful companies use disruptive concepts to engage with the digitally empowered consumer. This book will help companies transform themselves to the new age of selling by matching supply to demand in an innovative way. Successful disruptive selling concepts must be based on the right combination of a series of factors, including an understanding of what motivates customers' corresponding value propositions, appropriate organizational structures, and the right overarching business culture. Disruptive Selling demystifies all of this, and more. Featuring case studies and examples from disruptive organizations such as AirBnB, Zalando and Bol.com, it will empower readers to look critically at their organizations and begin their own disruptive selling journeys. Containing a carefully researched, clearly explained framework and practical guidelines that will allow readers to get started immediately, this book is the ultimate guide to remaining competitive and adaptive in a continually changing world.

International Handbook of Social Media Laws Paul Lambert,2015-07-30 Social media has become the online meeting place. People now communicate on an unparalleled scale. Covering 34 countries, this text provides a useful snapshot of the issues that permeate virtual life. This text will aid lawyers when looking for where to begin when

faced with a problem in this fast moving arena. Stephen Mason, barrister, academic and author International Handbook of Social Media Laws is the only title currently available to address social networking laws at an international level. It clearly explains each of the main legal issues and developments across various legal jurisdictions to ensure that a company's social media presence can be fully compliant with the law of each country. It covers all aspects of the law from a UK and international perspective by offering country report chapters that highlight the legal issues, cases and rules in each jurisdiction. Reviews "I was simply riveted ... [expert contributors] of a very high order indeed ... so much more than a worthy compendium of SM laws and cases. It simply brings the whole subject alive ... [it] not merely describes what is going on. It makes you think. That is why this book is so valuable ..." The Rt. Hon. Professor Sir Robin Jacob. Foreword. "Social media has become the online meeting place. People now communicate on an unparalleled scale. Covering 34 countries, this text provides a useful snapshot of the issues that permeate virtual life. This text will aid the lawyer, student, journalist and others when looking for where to begin when faced with a problem in this fast moving arena." Stephen Mason. Barrister, International expert and author on electronic evidence and electronic signatures. "In one wide-ranging volume, Lambert and the country reporters demonstrate that law can not only keep up with technological change, but can in fact stay well ahead by anticipating upcoming questions. This comprehensive comparative reference will be invaluable for lawyers and students serious about the widespread legal impact of social software, and the myriad ways in which different legal regimes react to these new and growing challenges." Professor Joshua Fairfield. Washington and Lee University School of Law. The Internet offers amazing and at times bewildering choices, especially when it comes to online social media. This volume is your guiding star, shedding expert light not only on the legal perspectives of issues cropping up, but also on what we can expect the future to hold. An essential work for everyone in the field! Viktor Mayer-Schönberger. Professor Oxford Internet Institute, internet and law expert, author of the bestselling book Delete: The Virtue of Forgetting in the Digital Age.

Smart City Emergence Leonidas Anthopoulos, 2019-06-15 Smart City Emergence: Cases from Around the World analyzes how smart cities are currently being conceptualized and implemented, examining the theoretical underpinnings and technologies that connect theory with tangible practice achievements. Using numerous cities from different regions around the globe, the book compares how smart cities of different sizes are evolving in different countries and continents. In addition, it examines the challenges cities face as they adopt the smart city concept, separating fact from fiction, with insights from scholars, government officials and vendors currently involved in smart city implementation. Utilizes a sound and systematic research methodology Includes a review of the latest research developments Contains, in each chapter, a brief summary of the case, an illustration of the theoretical context that lies behind the case, the case study itself, and conclusions showing learned outcomes Examines smart cities in relation to climate change, sustainability, natural disasters and community resiliency

everything a parent needs to know * Maria Boicova-Wynants,

Leaving Cloud 9 Ericka Andersen, 2018-06-26 A powerful, heartbreaking, and redemptive account of a boy who endured a childhood of poverty and abuse in an American Southwest trailer park named Cloud 9. Abandoned by his father at age two, Rick Sylvester lived with an abusive mother whose struggles as a member of the working poor led her to drugs, alcohol, theft, and prostitution--and eventually attempted suicide. Rick battled depression, anxiety, and PTSD as the chaos, neglect, and unpredictability of his childhood seemed to doom him to follow in his mother's footsteps. Well into adulthood, Rick stumbled through unemployment and divorce, using drugs and alcohol to numb the pain until he was diagnosed with bipolar disorder. Miraculously, though, he overcame the odds and today is a happy husband and father. How did this happen? Rick's answer is this: It was the Lord. A message of hope to those who are drowning from an undeserved childhood, *Leaving Cloud 9* speaks to millions who grew up poor, feeling ignored and hopeless, and who need the healing power of God. This indelibly American story conveys the steadfast love of Jesus and his power to deliver us from the most devastating of pasts.

Digital Literacies Mark Pegrum, Nicky Hockly, Gavin Dudeney, 2022-05-11 Dramatic shifts in our communication landscape have made it crucial for language teaching to go beyond print literacy and encompass the digital literacies which are increasingly central to learners' personal, social, educational and professional lives. By situating these digital literacies within a clear theoretical framework, this book provides educators and students alike with not just the background for a deeper understanding of these key 21st-century skills, but also the rationale for integrating these skills into classroom practice. This is the first methodology book to address not just why but also how to teach digital literacies in the English language classroom. This book provides: A theoretical framework through which to categorise and prioritise digital literacies Practical classroom activities to help learners and teachers develop digital literacies in tandem with key language skills A thorough analysis of the pedagogical implications of developing digital literacies in teaching practice A consideration of exactly how to integrate digital literacies into the English language syllabus Suggestions for teachers on how to continue their own professional development through PLNs (Personal Learning Networks), and how to access teacher development opportunities online. This book is ideal for English language teachers, English language learners of all ages and levels, academics and researchers of all age groups and levels, academics and students researching digital literacies, and anyone looking to expand their understanding of digital literacies within a teaching framework.

EU Citizenship and Free Movement Rights Sandra Mantu, Paul Minderhoud, Elspeth Guild, 2020-03-31 EU citizenship and Free Movement Rights examines how EU citizenship reconstructs in unexpected ways what citizenship as a status means and stands for in relation to family reunification, social rights, expulsion and discusses the effects of Brexit for EU citizens.

The Future of Newspapers Bob Franklin, 2013-09-13 The future of newspapers is hotly contested. Pessimistic pundits predict their imminent demise while others envisage a new era of participatory journalism online, with yet others advocating increased investment in quality journalism rather than free gifts and DVDs, as the necessary

cure for the current parlous state of newspapers. Globally, newspapers confront highly variable prospects reflecting their location in different market sectors, countries and journalism cultures. But despite this diversity, they face similar challenges in responding to the increased competition from expansive radio and 24 hour television news channels; the emergence of free Metro papers; the delivery of news services on billboards, pod casts and mobile telephony; the development of online editions, as well as the burgeoning of blogs, citizen journalists and User Generated Content. Newspapers' revenue streams are also under attack as advertising increasingly migrates online. This authoritative collection of research based essays by distinguished scholars and journalists from around the globe, brings together a judicious mix of academic expertise and professional journalistic experience to analyse and report on the future of newspapers. This book was published as special issues of Journalism Practice and Journalism Studies.

How the World Changed Social Media Daniel Miller, Elisabetta Costa, Nell Haynes, Tom McDonald, Razvan Nicolescu, Jolynna Sinanan, Juliano Spyer, Shriram Venkatraman, Xinyuan Wang, 2016-02-29 *How the World Changed Social Media* is the first book in *Why We Post*, a book series that investigates the findings of anthropologists who each spent 15 months living in communities across the world. This book offers a comparative analysis summarising the results of the research and explores the impact of social media on politics and gender, education and commerce. What is the result of the increased emphasis on visual communication? Are we becoming more individual or more social? Why is public social media so conservative? Why does equality online fail to shift inequality offline? How did memes become the moral police of the internet? Supported by an introduction to the project's academic framework and theoretical terms that help to account for the findings, the book argues that the only way to appreciate and understand something as intimate and ubiquitous as social media is to be immersed in the lives of the people who post. Only then can we discover how people all around the world have already transformed social media in such unexpected ways and assess the consequences

Morning Sunshine! Robin Meade, 2009-09-10 Robin Meade is the poster child for confidence and self-assurance. But the anchor of *Morning Express* with Robin Meade wasn't always that way. In fact, there was a period in her career

when she was plagued with anxiety and panic attacks. In *MORNING SUNSHINE*, she tells how she overcame her fear of public speaking to go on and achieve her dream of becoming a news anchor. Robin Meade offers her own tried-and-true four-step approach to building confidence. Her trademark warm, personal style translates from the screen to the page in this book, which will give readers even more insight into the young woman who came out of nowhere to become one of the most popular news anchors on television today.

Smart Systems for Industrial Applications C. Venkatesh, N. Rengarajan, P. Ponmurugan, S. Balamurugan, 2022-01-07 *SMART SYSTEMS FOR INDUSTRIAL APPLICATIONS* The prime objective of this book is to provide an insight into the role and advancements of artificial intelligence in electrical systems and future challenges. The book covers a broad range of topics about AI from a multidisciplinary point of view, starting with its history and continuing on to theories about artificial vs. human intelligence, concepts, and regulations concerning AI, human-machine distribution of power and control, delegation of decisions, the social and economic impact of AI, etc. The prominent role that AI plays in society by connecting people through technologies is highlighted in this book. It also covers key aspects of various AI applications in electrical systems in order to enable growth in electrical engineering. The impact that AI has on social and economic factors is also examined from various perspectives. Moreover, many intriguing aspects of AI techniques in different domains are covered such as e-learning, healthcare, smart grid, virtual assistance, etc. Audience The book will be of interest to researchers and postgraduate students in artificial intelligence, electrical and electronic engineering, as well as those engineers working in the application areas such as healthcare, energy systems, education, and others.

Broadcast News Writing, Reporting, and Producing Frank Barnas, Ted White, 2013-10-08 Jargon buster: convergent journalism: ?Media convergence is the most significant development in the news industry in the last century. The ability to interchange text, audio, and visual communication over the Internet has fundamentally transformed the way news organizations operate. Convergence has enabled media companies to gather, disseminate, and share information over a variety of platforms. Throughout the history of journalism, it has been common for journalists to study one medium, such as traditional print or broadcast, and to anticipate a career working only in their chosen field. However, the 21st century journalist has fluidity to write and deliver news content in a variety of formats. (source: <http://www.convergencejournalism.com/>) *Broadcast News Writing, Reporting, and Producing* presents

a solid foundation for any student learning how to become a broadcast journalist ? in today's world of convergent journalism, it is more important than ever that broadcast textbooks cover the most current trends in media. Convergent journalism (the coverage of news across multiple delivery platforms such as the internet, television, podcasts, ipods, blogs, etc) is here to stay ? broadcast journalism continues to morph as newer and more advanced content platforms are hatched and developed, and broadcast journalists must understand how to write, report, and produce for multiple platforms simultaneously. Just one crucial fact remains: students will need training on how to perform successfully in a world in which current events aren't just shown on the ten o'clock evening news. Broadcast News Writing, Reporting, and Producing will be completely overhauled to reflect the trends of convergent journalism on every page. New co-author Frank Barnas brings a multi-faceted perspective of writing, reporting, and producing that allows for multi-platform delivery systems, and shows students with real-world examples the functions and practices of today's media. The new edition will be rewritten and restructured to accommodate common 16-week course modules, and will be divided into four major sections of the news: gathering, writing, reporting, and producing. Sidebars featuring how examples used in the text relate to convergence in journalism help students to draw connections easily between current stories and trends in the industry. The comprehensive approach of this text brings a multi-faceted perspective of writing, reporting, and producing that is needed more than ever in today's world of convergent journalism. This newest edition is being completely overhauled by the experienced journalist Frank Barnas. New photos and illustrations, a restructuring of the text, expanded end-of-chapter exercises, newer and more relevant examples, and more information on producing all contribute to giving readers what they need most: a nuanced understanding of how the media of today function in a world without news boundaries.

Building Broadband Networks Marlyn Kemper Littman, 2002-06-03 Optical networks, undersea networks, GSM, UMTS...The recent explosion in broadband communications technologies has opened a new world of fast, flexible services and applications. To successfully implement these services, however, requires a solid understanding of the concepts and capabilities of broadband technologies and networks. Building Broadband Networks provides a comprehensive, non-theoretical introduction to broadband networking. It clearly and thoroughly conveys the principles and the technical fundamentals of the high-performance technologies that enable the reliable delivery of media-rich voice, video, and data services. After a careful examination of ISDN and ATM technologies, it describes optical network solutions based on SONET/SDH, WDM, and DWDM technologies. It then explores Ethernet operations and services and introduces Frame Relay and Fibre Channel networks, DSL solutions, and wireline and wireless cable networks. The author reviews the capabilities of cellular technologies, describes the characteristics of wireless networking technologies, and examines broadband satellite networks. She also explores next-generation network configurations, such as Internet2 and GEANT, and concludes with a study of network

security problems and solutions. The process of building and implementing broadband networks is technically complicated. Straightforward, highly readable, and logically presented, Building Broadband Networks provides the foundation for understanding the broadband communications infrastructure and the framework needed to effectively develop and deploy broadband network solutions.

Coulomb Screening by Mobile Charges Jean-Noel Chazalviel, 1999-07-28 This work is the first comprehensive treatment of screening, particularly with respect to out-of-equilibrium systems. It is divided into two parts. The first outlines the principles of screening at equilibrium or near equilibrium, while the second is devoted to the case of strong deviations from equilibrium. A great strength of this text is its unique interdisciplinary exposition, which sometimes leads to an unconventional presentation of classical results. Following the introduction of each major concept, applications to different subject areas are described and further developed by problems, with solutions provided. The extensive list of references will be useful to both graduate students and researchers. It should appeal to scientists and engineers from the areas of solid state physics, materials science, electrical engineering, electrochemistry, and biophysics.
