The Handmaid's Tale Margaret Atwood,2017

The Green Book Great Britain. Treasury,2003 This new edition incorporates revised guidance from H.M Treasury which is designed to promote efficient policy development and resource allocation across government through the use of a thorough, long-term and analytically robust approach to the appraisal and evaluation of public service projects before significant funds are committed. It is the first edition to have been aided by a consultation process in order to ensure the guidance is clearer and more closely tailored to suit the needs of users.

The Book of Enoch, Or, 1 Enoch R. H. Charles,2019-08-15 This book has been considered by academicians and scholars of great significance and value to literature. This forms a part of the knowledge base for future generations. We have represented this book in the same form as it was first published. Hence any marks seen are left intentionally to preserve its true nature.

Truth in Translation Jason BeDuhn,2003 Truth in Translation is a critical study of Biblical translation, assessing the accuracy of nine English versions of the New Testament in wide use today. By looking at passages where theological investment is at a premium, the author demonstrates that many versions deviate from accurate translation under the pressure of theological bias.

A Century of Artists Books Riva Castleman,1997-09 Published to accompany the 1994 exhibition at The Museum of Modern Art, New York, this book constitutes the most extensive survey of modern illustrated books to be offered in many years. Work by artists from Pierre Bonnard to Barbara Kruger and writers from Guillaume Apollinaire to Susan Sontag. An important reference for collectors and connoisseurs. Includes notable works by Marc Chagall, Henri Matisse, and Pablo Picasso.

Crosshairs Catherine Hernandez,2020-12-08 The author of the acclaimed novel Scarborough weaves an unforgettable and timely dystopian tale about a near-future, where a queer Black performer and his allies join forces to rise up when an oppressive regime gathers those deemed “Other” into concentration camps. Set in a terrifyingly familiar near-future, with massive floods leading to rampant homelessness and devastation, a government-sanctioned regime called The Boots seizes on the opportunity to round up communities of color, the disabled, and the LGBTQ+ into labor camps. In the shadows, a new hero emerges. After he loses his livelihood as a drag queen and the love of his life, Kay joins the resistance alongside Bahadur, a transmasculine refugee, and Firuzeh, a headstrong social worker. Guiding them in the use of weapons and close-quarters combat is Beck, a rogue army

officer, who helps them plan an uprising at a major televised international event. With her signature “raw yet beautiful, disturbing yet hopeful” (Booklist) prose, Catherine Hernandez creates a vision of the future that is all the more frightening because it is very possible. A cautionary tale filled with fierce and vibrant characters, *Crosshairs* explores the universal desire to thrive, love, and be loved for being your true self.

The Photomontages of Hannah Höch Hannah Höch, Peter W. Boswell, Maria Martha Makela, Carolyn Lanchner, Kristin Makhholm, 1996 Here, in the first comprehensive survey of her work by an American museum, authors Peter Boswell, Maria Makela, and Carolyn Lanchner survey the full scope of Höch's half-century of experimentation in photomontage - from her politically charged early works and intimate psychological portraits of the Weimar era to her later forays into surrealism and abstraction.

Prosperity without Growth Tim Jackson, 2016-12-08 What can prosperity possibly mean in a world of environmental and social limits? The publication of *Prosperity without Growth* was a landmark in the sustainability debate. Tim Jackson's piercing challenge to conventional economics openly questioned the most highly prized goal of politicians and economists alike: the continued pursuit of exponential economic growth. Its findings provoked controversy, inspired debate and led to a new wave of research building on its arguments and conclusions. This substantially revised and re-written edition updates those arguments and considerably expands upon them. Jackson demonstrates that building a 'post-growth' economy is a precise, definable and meaningful task. Starting from clear first principles, he sets out the dimensions of that task: the nature of enterprise; the quality of our working lives; the structure of investment; and the role of the money supply. He shows how the economy of tomorrow may be transformed in ways that protect employment, facilitate social investment, reduce inequality and deliver both ecological and financial stability. Seven years after it was first published, *Prosperity without Growth* is no longer a radical narrative whispered by a marginal fringe, but an essential vision of social progress in a post-crisis world. Fulfilling that vision is simply the most urgent task of our times.

Transitions Theory Afaf I. Meleis, PhD, DrPS (hon), FAAN, 2010-02-17 It is very exciting to see all of these studies compiled in one book. It can be read sequentially or just for certain transitions. It also can be used as a template for compilation of other concepts central to nursing and can serve as a resource for further studies in transitions. It is an excellent addition to the nursing literature. Score: 95, 4 Stars. --Doody's Understanding and recognizing transitions are at the heart of health care reform and

this current edition, with its numerous clinical examples and descriptions of nursing interventions, provides important lessons that can and should be incorporated into health policy. It is a brilliant book and an important contribution to nursing theory. Kathleen Dracup, RN, DNSc Dean and Professor, School of Nursing University of California San Francisco Afaf Meleis, the dean of the University of Pennsylvania School of Nursing, presents for the first time in a single volume her original transitions theory that integrates middle-range theory to assist nurses in facilitating positive transitions for patients, families, and communities. Nurses are consistently relied on to coach and support patients going through major life transitions, such as illness, recovery, pregnancy, old age, and many more. A collection of over 50 articles published from 1975 through 2007 and five newly commissioned articles, Transitions Theory covers developmental, situational, health and illness, organizational, and therapeutic transitions. Each section includes an introduction written by Dr. Meleis in which she offers her historical and practical perspective on transitions. Many of the articles consider the transitional experiences of ethnically diverse patients, women, the elderly, and other minority populations. Key Topics Discussed: Situational transitions, including discharge and relocation transitions (hospital to home, stroke recovery) and immigration transitions (psychological adaptation and impact of migration on family health) Educational transitions, including professional transitions (from RN to BSN and student to professional) Health and illness transitions, including self-care post heart failure, living with chronic illness, living with early dementia, and accepting palliative care Organization transitions, including role transitions from acute care to collaborative practice, and hospital to community practice Nursing therapeutics models of transition, including role supplementation models and debriefing models

Propaganda Jacques Ellul, 2021-07-27 This seminal study and critique of propaganda from one of the greatest French philosophers of the 20th century is as relevant today as when it was first published in 1962. Taking not only a psychological approach, but a sociological approach as well, Ellul's book outlines the taxonomy for propaganda, and ultimately, it's destructive nature towards democracy. Drawing from his own experiences fighting for the French resistance against the Vichy regime, Ellul offers a unique insight into the propaganda machine.

The Ancient Egyptian Pyramid Texts James P. Allen, 2007-08-30 The Pyramid Texts are the oldest body of extant literature from ancient Egypt. First carved on the walls of the burial chambers in the pyramids of kings and queens of the Old Kingdom, they provide the earliest comprehensive view of the way in which the ancient Egyptians understood the structure of the universe, the role of the gods, and

the fate of human beings after death. Their importance lies in their antiquity and in their endurance throughout the entire intellectual history of ancient Egypt. This volume contains the complete translation of the Pyramid Texts, including new texts recently discovered and published. It incorporates full restorations and readings indicated by post-Old Kingdom copies of the texts and is the first translation that presents the texts in the order in which they were meant to be read in each of the original sources.

The Metric Tide James Wilsdon, 2016-01-20 'Represents the culmination of an 18-month-long project that aims to be the definitive review of this important topic. Accompanied by a scholarly literature review, some new analysis, and a wealth of evidence and insight... the report is a tour de force; a once-in-a-generation opportunity to take stock.' – Dr Steven Hill, Head of Policy, HEFCE, LSE Impact of Social Sciences Blog 'A must-read if you are interested in having a deeper understanding of research culture, management issues and the range of information we have on this field. It should be disseminated and discussed within institutions, disciplines and other sites of research collaboration.' – Dr Meera Sabaratnam, Lecturer in International Relations at the School of Oriental and African Studies, University of London, LSE Impact of Social Sciences Blog Metrics evoke a mixed reaction from the research community. A commitment to using data and evidence to inform decisions makes many of us sympathetic, even enthusiastic, about the prospect of granular, real-time analysis of our own activities. Yet we only have to look around us at the blunt use of metrics to be reminded of the pitfalls. Metrics hold real power: they are constitutive of values, identities and livelihoods. How to exercise that power to positive ends is the focus of this book. Using extensive evidence-gathering, analysis and consultation, the authors take a thorough look at potential uses and limitations of research metrics and indicators. They explore the use of metrics across different disciplines, assess their potential contribution to the development of research excellence and impact and consider the changing ways in which universities are using quantitative indicators in their management systems. Finally, they consider the negative or unintended effects of metrics on various aspects of research culture. Including an updated introduction from James Wilsdon, the book proposes a framework for responsible metrics and makes a series of targeted recommendations to show how responsible metrics

can be applied in research management, by funders, and in the next cycle of the Research Excellence Framework. The metric tide is certainly rising. Unlike King Canute, we have the agency and opportunity – and in this book, a serious body of evidence – to influence how it washes through higher education and research.

Busted in New York & Other Essays Darryl Pinckney, 2020-11-17 '[Pinckney] reveals himself to be a skilful chronicler of black experience in literary criticism, reportage and biography' The New York Times In these twenty-five essays, Darryl Pinckney has given us a view of our recent racial history that blends the social and the personal and wonders how we arrived at our current moment. Pinckney reminds us that white supremacy isn't back; it never went away. It is this impulse to see historically that is at the core of *Busted in New York and Other Essays*, which traces the lineage of black intellectual history from Booker T. Washington through the Harlem Renaissance, to the Black Panther Party and the turbulent sixties, to today's Afro-pessimists, and celebrated and neglected thinkers in between. These are capacious essays whose topics range from the grassroots of protest in Ferguson, Missouri, to the eighteenth-century Guadeloupian composer Joseph Bologne, from an unsparing portrait of Louis Farrakhan to the enduring legacy of James Baldwin, the unexpected story of Black people experiencing Russia, Barry Jenkins's *Moonlight*, and the painter Kara Walker. The essays themselves are a kind of record, many of them written in real-time, as Pinckney witnesses the Million Man March, feels and experiences the highs and lows of Obama's first presidential campaign, explores the literary Black diaspora, and reflects on the surprising and severe lesson he learned firsthand about

the changing urban fabric of New York. As Zadie Smith writes in her introduction to the book: How lucky we are to have Darryl Pinckney who, without rancor, without insult, has, all these years, been taking down our various songs, examining them with love and care, and bringing them back from the past, like a Sankofa bird, for our present examination. These days Sankofas like Darryl are rare. Treasure him!
