A Christmas Message Debbie Macomber,2020-10-27 This season, discover the magic of two classic heartwarming stories and the message of love and giving at Christmas! Christmas Letters Katherine O'Connor spends her days at a cozy café writing Christmas letters for other people. She's good at making their everyday lives sound more interesting. But for renowned child psychologist Dr. Wynn Jeffries, who also frequents the café, Christmas means deception. Katherine argues with Wynn about his theories while he argues that her letters are nothing but lies. They disagree about practically everything—but as the days move closer to Christmas, Katherine and Wynn may find that love means accepting your differences while discovering what you share. Call Me Mrs. Miracle For Jake Finley, owner of Finley's Department Store in New York City, Christmas means only one thing to him: profit. The holiday was destroyed for him by a tragedy years before. But now he needs a Christmas miracle to keep the business afloat. Holly Larson needs a miracle, too. Her nephew's father won't be home for Christmas, but at least she can get him the one gift he desperately wants. If she can figure out how to pay for it... Fortunately, it's Mrs. Miracle to the rescue. Next to making children happy, she likes nothing better than helping others—and that includes a bit of matchmaking!

**Email, SMS, MMS** Carmen Frehner,2008 Are email and SMS forms of writing or speech? This question cannot be answered easily because their registers are hybrid; they make use of both orality and literacy. This book offers an accurate placement of emails and text messages along the written/spoken continuum. Emails and text messages are also compared to letters and phone calls while a closer comparison of SMS and telegrams shows how far text messaging can be regarded as a renaissance of telegrams. Attention is further paid to multimedia messaging and questions concerning the proportion of image to text, picture categories as well as MMS dialogues are approached. The book finally comments on linguistic changes and deals with the German language community's concern with regard to the increasing use of Anglicisms.

Media, Identity, and Struggle in Twenty-First-Century China Rachel Murphy,Vanessa L. Fong,2013-09-13 How are different groups of people such as sex workers, migrant workers, rural cadres and homosexuals represented in China's media? How accurately do representations created by the media reflect the lived experiences of Chinese people? Do Chinese people accept the representations and messages disseminated by the media? Can they use the media to portray their own interests? How are media practices in China changing? Have new technologies and increased access to international media opened up new spaces for struggle in China? The essays in this volume address these questions by using a combination of ethnography and textual analysis and by exploring representation in and usage of a range of media including instant messaging, the internet, television, films, magazines and newspapers. The essays highlight highlights the richness, diversity, and sometimes contradictory tendencies of the meanings and consequences of media representations in China. The volume cautions against approaches that take the representations created by the media in China at face value and against oversimplified assumptions about the motivations and agency of players in the complex struggles that occur between the media, the Chinese state, and Chinese citizens.

*Law, Religion and Human Flourishing in Africa* M. Christian Green,2019-05-15 A shared interest of law and

religion is the advancement of human flourishing, yet there is no common understanding of what it means for humans to flourish and the means by which to attain a flourishing life. The concept of human flourishing is especially important for Africa, where community and national development compete with forces of conflict and scarce resources. In the broadest sense, the concept of human flourishing focuses our attention on having a comprehensively good or worthwhile life, but various religious and legal traditions suggest different norms for measuring the quality of life and designing the institutional structures that could best facilitate and preserve it.

Complex Networks V Pierluigi Contucci,Ronaldo Menezes,Andrea Omicini,Julia Poncela-Casasnovas,2014-02-20 A network is a mathematical object consisting of a set of points that are connected to each other in some fashion by lines. It turns out this simple description corresponds to a bewildering array of systems in the real world, ranging from technological ones such as the Internet and World Wide Web, biological networks such as that of connections of the nervous systems, food webs or protein interactions, infrastructural systems such as networks of roads, airports or the power-grid, to patterns of social and professional relationships such as friendship, sex partners, network of Hollywood actors, co-authorship networks and many more. Recent years have witnessed a substantial amount of interest within the scientific community in the properties of these networks. The emergence of the internet in particular, coupled with the widespread availability of inexpensive computing resources has facilitated studies ranging from large scale empirical analysis of networks in the real world, to the development of theoretical models and tools to explore the various properties of these systems. The study of networks is broadly interdisciplinary and central developments have occurred in many fields, including mathematics, physics, computer and information sciences, biology and the social sciences. This book brings together a collection of cutting-edge research in the field from a diverse array of researchers ranging from physicists to social scientists and presents them in a coherent fashion, highlighting the strong interconnections between the different areas. Topics included are social networks and social media, opinion and innovation diffusion, biological and health-related networks, language networks, as well as network theory, community detection, or growth models for Complex Networks.

**The Internet in China** Zixue Tai,2007-05-07 The Internet in China examines the cultural and political ramifications of the Internet for Chinese society. The rapid growth of the Internet has been enthusiastically embraced by the Chinese government, but the government has also rushed to seize control of the virtual environment. Individuals have responded with impassioned campaigns against official control of information. The emergence of a civil society via cyberspace has had profound effects upon China--for example, in 2003, based on an Internet campaign, the Chinese Supreme People's Court overturned the ruling of a local court for the first time since the Communist Party came to power in 1949. The important question this book asks is not whether the Internet will democratize China, but rather in what ways the Internet is democratizing communication in China. How is the Internet empowering individuals by fostering new types of social spaces and redefining existing social relations?
