Dementia Home Care Tracy Cram Perkins, 2021-03-18 The target audience is women between the ages of 42 and 65. They represent the majority of unpaid care givers for loved ones with dementia. *Dementia Home Care: How to Prepare Before, During and After* will examine taking on the role of care giver and help them make informed decisions about in-home care giving. It will give examples of how to create a safe living space, how to use distraction techniques, and suggest available resources for the care giver. It will emphasize the role of care giver respite and participating in dementia community support to relieve the daily stress of dementia care. Home care giver, Tracy Cram Perkins, will use anecdotes drawn from twelve years of experience. *Demetia Home Care* will cover aggressive behavior, coping strategies, memory aids, communication aids, and support services. There is a space at the end of each chapter for the reader to record special or humorous moments with their loved ones. And it will address the empty nester experience after the loss of a loved one—to a nursing facility or to death—rarely covered in other books of this genre. This life-lesson of care giving is not meant to destroy us but meant to remind us to take care of ourselves, forgive ourselves, accept ourselves. To know other people trudge up this same hill with us every day. To pay forward kindness in some measure. To know laughter has not abandoned us. At the end, to know some measure of joy. -- Tracy Cram Perkins

Assisting Seniors at Home Gretchen Mary Rose, 2020 Most families in need of assistance for senior caregiving have two questions: Can you, please, help us? How do we go about this? We don't even know where to start. This is the overshadowing climate that exists until a navigational chart is presented. *Assisting Seniors at Home: A Planning Guide for Families and Caregivers* is designed to harmonize the unique perspectives and roles of the three entities involved: the seniors, the family, and hired caregivers. Each role is described with specific intervention priorities for our aging family members. Within this guide, there are two skill level indicators, one for the general aging population and another for those with dementia. Each provide a clear description of specific needs as changes occur. This is the compass by which all family members may intercede proactively to bring seniors from early intervention to the final stages of hospice care. The skill level indicator is the most valuable element as it designates the amount of care needed, how to establish a care plan, and when to make necessary changes. In summary, this adds up to effective in-home care, inclusive of home modifications and safety as a top priority for all involved.

Workbook for Providing Home Care Hartman Publishing Staff, 1999-03

The Caring Class Richard Schweid, 2021-03-15 The number of elderly and disabled Americans in need of home health care is increasing annually, even as the pool of people—almost always women—willing to do this job gets smaller and smaller. The Caring Class takes readers inside the reality of home health care by following the lives of women training and working as home health aides in the South Bronx. Richard Schweid examines home health care in detail, focusing on the women who tend to our elderly and disabled loved ones and how we fail to value their work. They are paid minimum wage so that we might be absent, getting on with our own lives. The book calls for a rethinking of home health care and explains why changes are urgent: the current system offers neither a good way to live nor a good way to die. By improving the job of home health aide, Schweid shows, we can reduce income inequality and create a pool of qualified, competent home health care providers who would contribute to the well-being of us all. The Caring Class also serves as a guide into the world of our home health care system. Nearly 50 million US families look after an elderly or disabled loved one. This book explains the issues and choices they face. Schweid explores the narratives, histories, and people behind home health care in the United States, examining how we might improve the lives of both those who receive care and those who provide it.

Home Care Warren Balinsky, 1994-11-17 In the past ten years, the health industry has witnessed an explosion in the growth of home care services. In this timely book, the author shows health professionals how to increase access to home health care while

simultaneously controlling costs and maintaining quality. He reveals why home care has become the preferred form of treatment for many patients and caregivers and analyzes the specific patient populations for which it is most appropriate. Approx.

Home Health Care Provider Emily Prieto, MBA, LSW, 2008-06-09 This book is designed to foster quality care to home care recipients. It is written for companions, home health aides, and other care givers who deliver non-medical home care. Prieto provides information, tips, and techniques on personal care routines as well as additional responsibilities that are often necessary in this work, including home safety and maintenance, meal planning, errand running, caring for couples, and making use of recreational time. Going beyond standard nurses' aide training manuals, the book focuses on the psycho-social needs of home care recipients, stressing the need to maintain the house as a home and sustaining the recipient's way of life throughout caregiving situations. Prieto stresses interpersonal skills that benefit recipient and caregiver, creating a systematic, easy-to-follow plan for delivering quality service and maintaining, or improving, quality of life.

Home Health Nursing Karen E. Monks, 2002-10-22 This unique, spiral-bound handbook is compact, portable, and written with busy home health nurses in mind! Organized by body system, it offers instant advice on assessment and care planning for the disorders home health nurses are likely to encounter. Providing assessment guides for all body systems, the home environment, and the client's psychological status, it includes full care plans for over 50 illnesses and conditions most commonly encountered in the home. Each plan lists nursing diagnoses, short- and long-term expected outcomes, nursing interventions, and client caregiver interventions. Care plans are organized by body systems to allow for quick retrieval of information. Both short-term and long-term outcomes are included in the care plans to aid evaluation of the care provided. Detailed assessment guidelines are provided for all body systems to facilitate complete and comprehensive client examinations. Guidelines for environmental and safety assessments aid in the appraisal and improvement of clients' living conditions. Client and caregiver interventions are outlined in the care plans to promote active client participation in self-care. The convenient pocket size makes transportation and use convenient to home health nurses. Appendices on documentation guidelines, laboratory values, medication administration, home care resources, and standard precautions provide quick access to useful home care information. Related OASIS items are identified in the assessment section, and ICD-9 diagnostic codes in the care plans section assist with proper home care documentation. Visit frequency and duration schedules are suggested within each care plan to assist nurses in evaluating and planning care. NANDA nursing diagnoses are consistent with the latest 2001-2002 nomenclature. An increase in suggested therapy referrals within the care plans and in a new appendix helps nurses identify indicators for specialized services. A fully updated Resources Appendix includes websites for easy access to home health service information.

Providing Home Care for Older Adults Danielle L. Terry, Michelle E. Mlinac, Pamela L. Steadman-Wood, 2020-09-09 A practical guide to providing home-based mental health services, *Providing Home Care for Older Adults* teaches readers to how to handle the unique aspects of home-based care and apply and adapt evidence-based assessment and treatment within the home-based setting. Featuring contributions from experienced, board-certified home care psychologists, social workers, and psychiatrists, the book explains the

multifaceted role of a home-based provider, offers concrete and practical considerations for working within the home, and highlights adaptations to specific evidence-based methods used in treating homebound older adults. Also covered are special topics related to hoarding, safety, capacity evaluations, caregivers, case management, and use of technology. Each chapter includes engaging case examples with practical tips that illustrate what it is like to work in this new and exciting frontier. Psychologists, counselors, and other mental health practitioners in home settings will be able to use this guide to provide effective home-based care to older adults.

The Caring Self Clare L. Stacey, 2011-07-07 According to the Bureau of Labor Statistics, there were approximately 1.7 million home health aides and personal and home care aides in the United States as of 2008. These home care aides are rapidly becoming the backbone of America's system of long-term care, and their numbers continue to grow. Often referred to as frontline care providers or direct care workers, home care aides—disproportionately women of color—bathe, feed, and offer companionship to the elderly and disabled in the context of the home. In *The Caring Self*, Clare L. Stacey draws on observations of and interviews with aides working in Ohio and California to explore the physical and emotional labor associated with the care of others. Aides experience material hardships—most work for minimum wage, and the services they provide are denigrated as unskilled labor—and find themselves negotiating social norms and affective rules associated with both family and work. This has negative implications for workers who struggle to establish clear limits on their emotional labor in the intimate space of the home. Aides often find themselves giving more, staying longer, even paying out of pocket for patient medications or incidentals; in other words, they feel emotional obligations expected more often of family members than of employees. However, there are also positive outcomes: some aides form meaningful ties to elderly and disabled patients. This sense of connection allows them to establish a sense of dignity and social worth in a socially devalued job. The case of home care allows us to see the ways in which emotional labor can simultaneously have deleterious and empowering consequences for workers.

Competency in Home Care Terasa Astarita, Gayle Materna, Cynthia Blevins, 1998 *Competency in Home Care* doesn't just describe the standards of practice... it gives you the resources to meet them. it provides practical, authoritative guidance for: creating effective staff development plans, designing orientation programs that get caregivers up to speed immediately, establishing performance criteria for every position in the home care continuum, and ensuring ongoing competency. Plus you get powerful insights into the growth of modern home care, The role of competency programs in staff recruitment and retention, and how to get it done in any organization, regardless of background, makeup, or affiliation.
