Art Wolfe,Martha Hill

How to Photograph Your Life Nick Kelsh, 2003-04-01 Offers a guide to capturing everyday moments using an amateur camera, including tips on do's and don'ts, photographic techniques, special effects, and candid photographs.

American Horizons Keith F. Davis, Art Sinsabaugh, 2004 This revealing monograph explores how Sinsabaugh's wide format photographs expose the bond between humankind and the earth as suggested by his images of wide horizons, interspersed by skyscrapers, bridges, silos and highways. 96 colour & 200 b/w illustrations

Shifting Horizons Liz Wells, Catherine Fehily, Kate Newton, 2001-06-23 Throughout the history of photography the genre of landscape has been dominated by male perspectives. Shifting Horizons makes us rethink our perceptions of the inner and outer landscapes we experience. Ten women photographers reinterpret the notion of "landscape. Using techniques ranging from historical non-silver processes to new digital imaging technologies, they are concerned with borders: between land and sea, day and night, inside and outside, public and private, absence and presence, space and enclosure, image and words; past, present and future.

Horizon Bert Danckaert, Alison Nordstrom, 2016-12-20 *A new and surprising book by artist Bert Danckaert* His previous book Simple Present sold out in just a few weeks* With supplementary text from Alison Nordstrom, world famous photography expert Bert Danckaert explores new horizons in this latest collection of his work. Danckaert has been a name to remember in the art photography world, ever since his 1990 debut. This book maintains continuity with his previous collections, with pictures focussing on the urbane urbanism of walls, street corners and footpaths. However, this time his signature hermetic minimalism makes way for humour and vivacity. This book chronicles a fresh project from a photographer on the way the top.

Sigurður Gudmundsson Kirstin Dagmar Jóhannesdóttir, Lily van Ginneken, 2014 Icelandic sculptor Sigurður Gudmundsson moved to Amsterdam in 1970. The photo works he began to produce around this time reflected conceptual tendencies like the Fluxus movement. His approach to themes like man and his relationship with nature, or man's struggle with existential issues, comes across as highly personal, distinguished by its witty yet melancholic undertone. Like many conceptual artists, Gudmundsson concerns himself with the artist's action as a work of art in itself; his photo works thus become poetic contemplations of the world around him. With essays by Kristín Dagmar Jóhannesdóttir and Lily van Ginneken, plus an interview with the artist.

The New Art of Photographing Nature Art Wolfe, Martha Hill, 2013-04-02 A new spin on the classic guide to composing stunning images of nature and wildlife What is the difference between a good picture and a great one? In this fully revised edition of the classic bestseller *The Art of Photographing Nature*, master photographer Art Wolfe and former Audubon photo editor Martha Hill team up to explain the art of composing images of enduring beauty. Against a backdrop of more than 250 photographs of nature, wildlife, and landscapes, they share insights and advice about what works and what doesn't, and how small changes can take an image from ordinary to extraordinary. Throughout, all-new tips from digital imaging expert Tim Grey show readers how to make the most of digital technology, whether by choosing the right color space, understanding sensor size, or removing distracting elements in post-processing. The result is an invaluable collection of expert advice updated for the modern age.

Liquid Horizon, 2021-02-16 Sensual, meditative, and powerfully evocative photographic studies of the ocean by professional surfer Danny Fuller. Danny Fuller's work as a photographer and artist is best understood through his thirty years as a professional surfer. Fuller who is known for riding the waves of North Shore Oahu's famous Pipeline and Maui's treacherous Jaws sees and experiences the ocean in ways intimate and infinite. Fuller's

nocturnal seascapes of the world's most savage and beautiful waves, all captured exclusively by moonlight with slow exposures, share the soulful beauty of the ocean, in meditative, painterly studies of subtle changes of light and color. In the tradition of artists drawn to the sea for inspiration, Fuller expresses a surfer's deep spiritual connection to the ocean and to the meaning of consequence in surfing. The sensual allure of blue mixed with the ominous presence of water, whose scale is epic, reminds us just how minuscule and insignificant we are relative to the powers of the sea.

Over the Horizon David Thoreson, 2016-08-10

Horizon Barry Lopez, 2019-03-19 ONE OF THE BEST BOOKS OF THE YEAR: THE NEW YORK TIMES • NPR • THE GUARDIAN From pole to pole and across decades of lived experience, National Book Award-winning author Barry Lopez delivers his most far-ranging, yet personal, work to date. Horizon moves indelibly, immersively, through the author's travels to six regions of the world: from Western Oregon to the High Arctic; from the Galápagos to the Kenyan desert; from Botany Bay in Australia to finally, unforgettably, the ice shelves of Antarctica. Along the way, Lopez probes the long history of humanity's thirst for exploration, including the prehistoric peoples who trekked across Skraeling Island in northern Canada, the colonialists who plundered Central Africa, an enlightenment-era Englishman who sailed the Pacific, a Native American emissary who found his way into isolationist Japan, and today's ecotourists in the tropics. And always, throughout his journeys to some of the hottest, coldest, and most desolate places on the globe, Lopez searches for meaning and purpose in a broken world.

Master Low Light Photography Heather Hummel, 2016-06-20 Most photographers shoot in abundant sunlight. The problem is, full sun creates harsh, unflattering shadows that undermine images. Working in low light — in early morning or at twilight or when Mother Nature cues the clouds or fans in the fog — can help photographers produce stand-out images. Photographers will learn to analyze light and determine the best camera settings

for creating captivating low-light images outdoors. Composition—the artful arrangement of all of the image elements — is detailed next. From there, Hummel provides text and illustrations to guide readers through the art of producing low-light images of sunrises and sunsets; the moon and stars; hot air balloons, city lights, and fireworks; and nature and landscape photography. Hummel then moves on to discuss how photographers can use filters and camera-stabilizing tools to enhance the technical quality of their shots. Armed with the applications outlined in this book, photographers will be able to produce outstanding shots during off-peak hours.

The Concept of Non-Photography Francois Laruelle, 2011-04-01 A rigorous new thinking of the photograph in its relation to science, philosophy, and art, so as to discover an essence of photography that precedes its historical, technological, and aesthetic conditions. If philosophy has always understood its relation to the world according to the model of the instantaneous flash of a photographic shot, how can there be a "philosophy of photography" that is not viciously self-reflexive? Challenging the assumptions made by any theory of photography that leaves its own "onto-photo-logical" conditions uninterrogated, Laruelle thinks the photograph non-philosophically, so as to discover an essence of photography that precedes its historical, technological and aesthetic conditions. The Concept of Non-Photography develops a rigorous new thinking of the photograph in its relation to science, philosophy, and art, and introduces the reader to all of the key concepts of Laruelle's "non-philosophy."
